**Natural History of the Albany Pine Bush** Jeffrey K. Barnes, 2003      **The Northeast** Stephen J. Pyne, 2019-04-09

Repeatedly if paradoxically the Northeast has led national developments in fire. Its intellectuals argued for model preserves in the Adirondacks and at Yellowstone oversaw the first mapping of the American fire scene for the 1880 census staffed the 1896 National Academy of Sciences forest commission that laid down guidelines for the national forests and spearheaded legislation that allowed those reserves to expand by purchase. It trained the leaders who staffed those protected areas and produced most of America's first environmentalists. The Northeast has its roster of great fires beginning with dark days in the late 18th century followed by a chronicle of conflagrations continuing as late as 1903 and 1908 with a shocking after tremor in 1947. It hosted the nation's first forestry schools. It organized the first interstate and international fire compact. And it was the Northeast that pioneered the transition to the true Big Burn industrial combustion as America went from burning living landscapes to burning lithic ones. In this new book in the *To the Last Smoke* series renowned fire expert Stephen J. Pyne narrates this history and explains how fire is returning to a place not usually thought of in America's fire scene. He examines what changes in climate and land use mean for wildfire, what fire ecology means for cultural landscapes and what experiments are underway to reintroduce fire to habitats that need it. The region's great fires have gone, its influence on the national scene has not. The Northeast A Fire Survey samples the historic and contemporary significance of the region and explains how it fits into a national cartography and narrative of fire. Included in this volume: How the region shaped America's understanding and policy toward fire. How fire fits into the region today and what that means for the country overall. What changes in climate, land use and institutions may mean for northeastern fire, both wild and tame.      Late Pleistocene Archaeology and Ecology in the Far Northeast Claude Chapdelaine, 2012-09-18. The Far Northeast, a peninsula incorporating the six New England states, New York east of the Hudson, Quebec south of the St. Lawrence River and Gulf of St. Lawrence and the Maritime Provinces, provided the setting for a distinct chapter in the peopling of North America. Late Pleistocene Archaeology and Ecology in the Far Northeast focuses on the Clovis pioneers and their eastward migration into this region inhospitable before 13,500 years ago, especially in its northern latitudes. Bringing together the last decade or so of research on the Paleoindian presence in the area, Claude Chapdelaine and the contributors to this volume discuss among other topics the style variations in the fluted points left behind by these migrating peoples, a broader disparity than previously thought. This book offers not only an opportunity to review new data and interpretations in most areas of the Far Northeast, including a first glimpse at the Cliche Rancourt Site, the only known fluted point site in Quebec, but also permits these new findings to shape revised interpretations of old sites. The accumulation of research findings in the Far Northeast has been steady and this timely book presents some of the most interesting results, offering fresh perspectives on the prehistory of this important region.      *To the Last Smoke* Stephen J. Pyne, 2020-04-21. From boreal Alaska to subtropical Florida, from the chaparral of

California to the pitch pine of New Jersey America boasts nearly a billion burnable acres In nine previous volumes Stephen J Pyne has explored the fascinating variety of flame region by region In *To the Last Smoke* An Anthology he selects a sampling of the best from each *To the Last Smoke* offers a unique and sweeping view of the nation s fire scene by distilling observations on Florida California the Northern Rockies the Great Plains the Southwest the Interior West the Northeast Alaska the oak woodlands and the Pacific Northwest into a single readable volume The anthology functions as a color commentary companion to the play by play narrative offered in Pyne s *Between Two Fires* A Fire History of Contemporary America The series is Pyne s way of keeping with it to the end encompassing the directive from his rookie season to stay with every fire to the last smoke
