French Encounters with the American Counterculture 1960-1980 Caroline Maniaque-Benton, 2016-12-05 French American interrelationships in the areas of design and creative thinking have been under acknowledged It is normally asserted that French architects looked to North America for technical lessons in the development of modern architecture in the 1960s but that the French cultural environment was generally hostile to American ideas This book includes interviews with French architects who visited the United States in the 1960s 1970s and then assumed influential positions in the press and education in France Some of these architects found in non mainstream America and its radical groups of architectural drop outs a liberating force free of the taint of American capitalism and the high investment technology Often living in alternative student communities they saw highly innovative low cost technical and structural systems placed in the service of collective forms of living which represented a critique not only of professional architectural practice but also of bourgeois forms of living Many of them also studied in American schools of architecture and came in contact with an intellectual and interdisciplinary style of architectural education unavailable in France at that time **HUD Newsletter**, 1978 *SERI-RR*, 1980 *Housing and Planning References*, 1981 **Ecological Landscape Design and Planning** Jala Makhzoumi, Gloria Pungetti, 2003-09-02 Based on both research and practical experience Ecological Landscape Design and Planning offers a holistic methodological approach to landscape design and planning It focuses on the scarcity of natural resources in the Mediterranean and the need to aim for long term ecological stability and environmental sustainability The principles of this
