gathered in a CAM consultation and help them develop effective and appropriate treatment programmes within the time constraints of a busy clinic. It provides an insight into the initial CAM consultation process offering possible treatment and collaborative referral options for individual cases rather than dictating diagnostic analysis or treatment protocols for specific conditions. Question suggestions have been provided to help the user collect the necessary information to develop a working diagnosis and treatment protocol for each individual case. Readers can then adapt questions, decision making tools and therapeutic recommendations to suit the needs of their own clients. Complementary practitioners are often uncertain about the legal and ethical boundaries regarding diagnosis and case management. This book will help CAM students and practitioners recognise situations requiring referral, understand their role in collaborative case management and confidently integrate a range of CAM modalities in treatment programmes. Provides a clear case analysis format which can be adapted to suit the requirements of individual case histories. Specific questioning format. Clearly identifies situations where cross or collaborative referral is necessary. Decision tables help readers prioritise treatment, refer appropriately and help guide clinical thinking when readers are faced with several treatment options. Class tested curriculum based.
