Anyone with an interest in or love for cats, and all those who have owned a cat, will find much to learn and enjoy in *The Cat: A Natural History*. **The Natural History of Cats** Claire Necker, 1977 *The Cat: Its Natural History; Domestic Varieties; Management and Treatment* Philip M. Rule, Bernard Perez, 1887 Natural History of the World Alfred Henry Miles, 1895 **Natural History of Oregon Coast Mammals**, 1981 *Wild Cats of the World* Mel Sunquist, Fiona Sunquist, 2017-05-15 Did you know that European royalty once used cheetahs to hunt deer or that caracals can capture birds by leaping six and a half feet straight up into the air from a standing start? Have you ever wondered whether domestic cats really do land on their feet when they fall or how Canada lynx can stalk their prey in the winter without falling through the deep snow? *Wild Cats of the World* is a treasure trove of answers to questions like these and many others for anyone who's interested in learning more about the world's felids, including the ones with whom we share our homes. Mel and Fiona Sunquist have spent more than a decade gathering information about cats from every available source, many of them quite difficult to find, including scientific papers, descriptions of hunts, archeological findings, observations by naturalists, and travelers' reports from government agencies and newsletters from a wide variety of organizations. Weaving information from these sources together with their own experiences observing wild cats around the world, the Sunquists have created the most comprehensive reference on felids available. Each of their accounts of the 36 species of cat contains a description of the cat, including human interactions with it, as well as detailed data on its distribution, ecology, and behavior, status in the wild, and efforts to conserve it. Numerous photographs, including more than 40 in full color, illustrate these accounts. Ranging from the two-pound black-footed cat to the five-hundred-pound tiger and from the African serval with its satellite dish ears to the web-footed fishing cat of Asia, *Wild Cats of the World* will fascinate and educate felid fans of any stripe or spot. **Library of Natural History** Richard Lydekker, 1902 *The Natural History of Rabies* George M. Baer, 2017-11-22 This book provides essential worldwide reference information regarding rabies for public health officials, veterinarians, physicians, virologists, epidemiologists, infectious disease specialists, laboratory diagnosticians, and wildlife biologists. The book is divided into six main sections covering topics such as the rabies virus, including antigenic and biochemical characteristics, pathogenesis, including the immune response to the infection, pathology, and latency, diagnostic techniques, rabies epidemiology in a variety of wild and domestic animals, rabies control, including vaccination of wild and domestic animals, as well as control on the international level, and finally, a discussion of rabies in humans, local wound and serum treatment, and human post-exposure vaccination. *Natural History of Rabies* First Edition has been the principal worldwide reference since 1975.
