## **Natural Resource Policy And Income Distribution:**

**Natural Resource Policy and Income Distribution** Adam Rose, Brandt Stevens, Gregg Davis, 1988  
**Taxation and Management of Natural Resources in Africa** Mohammed Amidu, Abdallah Ali-Nakyea, Joshua Yindenaba Abor, 2024-05-20  
This book offers a comprehensive examination of the fundamental concepts and principles crucial to the taxation and management of natural resources specifically tailored to the unique challenges faced by developing African countries. It delves into the key instruments that comprise a resource tax policy providing invaluable insights into the tax reforms necessary to maximize economic rent for African nations. Written by experts in the field, this book explores the potential application of effective revenue management principles by African governments to achieve desired developmental outcomes. It covers a wide range of topics including socio-political risks, ethical dilemmas, accountability, and transparency, resource rent, and capital gains taxes, tax administration, and reforms, taxation of oil and gas revenue, environmental taxation, globalization's impact, and the promotion of inclusive development. Designed for scholars, tax professionals, and individuals interested in natural resources management and revenue mobilization strategy in Africa, this book bridges the gap between theory and practice, providing valuable insights and recommendations for sustainable and responsible management of Africa's rich natural resources.

*Natural Resource Policymaking in Developing Countries* William Ascher, Robert G. Healy, 1990  
Drawing on case studies developed over a two-year period (1987-1989) by Fellows in the Program in International Development Policy at Duke University, including experienced representatives from developing countries, the World Bank, and scholars, the authors integrate the growing interest in environmental protection and resource conservation into the existing body of knowledge about the political economy of developing countries. This book is about the links that tie resource use, environmental quality, and economic development and the way in which those links are affected by the distribution of income and resource ownership. The links may be relatively simple, as in the case of peasant farmers too poor to conserve resources for the future and with nothing to gain from sound environmental practices. Or they may be very complex, as the authors find when they demonstrate how achievement of higher incomes by the rich can increase environmentally destructive behavior by the poor. Many of the links in some way involve rural land use, whether for agriculture or forestry. *Natural Resource Policymaking in Developing Countries* argues that the policies that matter are not merely those dealing with resources and the environment but a much broader set that includes income distribution and asset ownership.  
**The Economics Of Environmental And Natural Resources Policy** J. A. Butlin, 2019-09-06  
The purpose of this collection of readings is to aid the student taking a course in environmental economics to place the issues in perspective. The text is designed for an undergraduate audience, and those readings that have appeared elsewhere have, with the permission of the holders of the copyright, been suitably abridged for this purpose. The book is designed to be used in conjunction with a conventional text on environmental economics or as an

adjunct to a comprehensive series of lectures in environmental and natural resource economics     Handbook of Environmental and Resource Economics Jeroen C. J. M. Van den Bergh, 2002-01-01 This major reference book comprises specially commissioned surveys in environmental and resource economics written by an international team of experts Authoritative yet accessible each entry provides a state of the art summary of key areas that will be invaluable to researchers practitioners and advanced students     Development Policies in Natural Resource Economies Jörg Mayer, Brian Chambers, Ayisha Farooq, 1999-05-26 An examination of the factors that influence economic growth and sustainable development in countries with a significant natural resource sector It looks at how to make the primary sector sufficiently productive to provide for investment in both itself and other sectors of the economy     Handbook of Sustainable Development Giles Atkinson, Simon Dietz, Eric Neumayer, Matthew Agarwala, 2014-09-26 This timely and important Handbook takes stock of progress made in our understanding of what sustainable development actually is and how it can be measured and achieved     **ECONOMICS INTERACTIONS WITH OTHER DISCIPLINES - Volume I** John M. Gowdy, 2009-10-14 Economics Interactions with Other Disciplines is the component of Encyclopedia of Development and Economic Sciences in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on Economics Interactions with Other Disciplines reflects the new interdisciplinary approach of economists focusing on the issues of health and the environment The chapters range from standard applications of economic theory to more radical approaches These two volumes are aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers NGOs and GOs     Understanding and Interpreting Economic Structure Geoffrey J.D. Hewings, Michael Sonis, Moss Madden, Yoshio Kimura, 2013-06-29 In 1976 volume 116 of the Lecture Notes in Economics and Mathematical Systems appeared in the library of the University of Illinois The title of the book Input Output Analysis and the Structure of Income Distribution was sufficiently intriguing to one of the present editors Hewings to command attention Some years later during the First World Congress of the Regional Science Association in Cambridge Massachusetts in 1980 Madden and Batey presented some of their work using their now familiar demographic economic modeling system Discussion ensued about the relationship between this system Miyazawa's formulation and the social accounting matrices most closely associated with the work of Stone During a year's residence at the University of Illinois Batey was able to produce a valuable typology of multipliers that began the process of integrating these several modeling systems into a coherent package Thereafter a number of regional scientists have exploited the ideas and insights proposed by Miyazawa especially the notion of the interrelational income multiplier and the ideas of internal and external multipliers     **Seventh Symposium on Systems Analysis in Forest Resources, Traverse City, Michigan, USA, May 28-31, 1997**, 2000     **Natural Resources and the Environment** Mark Kanazawa, 2021-05-18 Natural Resources and the Environment Economics Law Politics and Institutions provides a new

approach to the study of environmental and natural resource economics. It augments current contributions from the fields of public choice, law and economics, and the burgeoning field of what used to be called the New Institutional Economics to describe, explain, and interpret how these new developments have been applied to better understand the economics of natural resources and the environment. This textbook takes a multi-disciplinary approach which is essential for understanding complex environmental problems and examines the issue from not only an economic perspective but also taking into account law, politics, and institutions. In doing so, it provides students with a realistic understanding of how environmental policy is created and presents a comprehensive examination of real-world environmental policy. The book provides a comprehensive coverage of key issues including renewable energy, climate change, agriculture, water resources, land conservation, and fisheries, with each chapter accompanied by learning resources such as recommended further reading, discussion questions, and exercises. This textbook is essential reading for students and scholars seeking to build an interdisciplinary understanding of natural resources and the environment.

**Natural Capital** Peter Kareiva, 2011-04-07. In 2005, The Millennium Ecosystem Assessment (MA) provided the first global assessment of the world's ecosystems and ecosystem services. It concluded that recent trends in ecosystem change threatened human wellbeing due to declining ecosystem services. This bleak prophecy has galvanized conservation organizations, ecologists, and economists to work toward rigorous valuations of ecosystem services at a spatial scale and with a resolution that can inform public policy. The editors have assembled the world's leading scientists in the fields of conservation, policy analysis, and resource economics to provide the most intensive and best technical analyses of ecosystem services to date. A key idea that guides the science is that the modelling and valuation approaches being developed should use data that are readily available around the world. In addition, the book documents a toolbox of ecosystem service mapping, modeling, and valuation models that both The Nature Conservancy and the World Wide Fund for Nature (WWF) are beginning to apply around the world as they transform conservation from a biodiversity-only to a people and ecosystem services agenda. The book addresses land, freshwater, and marine systems at a variety of spatial scales and includes discussion of how to treat both climate change and cultural values when examining tradeoffs among ecosystem services.

*Sustainable Economic Development* Mohamed Sami Ben Ali, Ewa Lechman, 2024-06-27. This book provides readers with a comprehensive understanding of the general framework of sustainable development paths in relation to where countries stand at present by outlining the main challenges they face and the potential pathways ahead to foster the Sustainable Development Goals (SDGs). In connecting different SDGs, the collection of chapters teases out the multifarious relationships and influences on policy, balancing economic, social, and environmental dimensions for development, making qualitative distinctions between high-income and low-income countries in the SDGs context. In doing so, the book emphasizes that with the rapid upliftment from extreme poverty and subsistence, globally growing economic and social gaps have expanded with unprecedented speed. Widening divides in material wealth are shown to some extent as a side effect of fast economic growth and development. This

book draws out these connections between economic progress expressed through shifts on per capita income and the achievements and setbacks to meeting each of the SDGs respectively Beyond its place in social scientific discourse relevant to scholars researching the various aspects of sustainable economic development this book s findings also have important implications for policymakers development specialists and economists in both developed and developing countries
