Phenomenology, Neuroscience, and the Nature of Experience Richard Brown, 2013-08-23 This volume is product of the third online consciousness conference held at <http://consciousnessonline.com> in February and March 2011. Chapters range over epistemological issues in the science and philosophy of perception; what neuroscience can do to help us solve philosophical issues in the philosophy of mind; what the true nature of black and white vision, pain, auditory, olfactory, or multi-modal experiences are; to higher order theories of consciousness; synesthesia among others. Each chapter includes a target article, commentaries, and in most cases a final response from the author. Though wide-ranging, all of the papers aim to understand consciousness both from the inside as we experience it and from the outside as we encounter it in our science. The Online Consciousness Conference, founded and organized by Richard Brown, is dedicated to the rigorous study of consciousness and mind. The goal is to bring philosophers, scientists, and interested lay persons together in an online venue to promote high-level discussion and exchanging of views, ideas, and data related to the scientific and philosophical study of consciousness.
