Teaching Children to Love Nature Dueep Jyot Singh, John Davidson, 2018-03-31 Table of Contents Introduction A Healthy Outdoors Diet Planning Your Nature Diet Bird baths and bird houses Coconut Birdhouse A Little Bit of Dirt Kids and Water Conclusion Author Bio Publisher Introduction It is surprising that it had to take scientific researchers to tell a large number of parents out there that it is necessary for them to make sure that their children had a regular dose of sun fresh air water and oxygen in order to keep healthy When I saw this research which was very well publicized I blinked Were there people really in the world who needed scientific research to prove something which was self evident before they would take their families into the lap of nature It is then that I began to analyze the social lifestyles and trends being set for the younger generation with the elder generation as an example The elder generation the parents had begun living a hectic lifestyle where survival of the fittest especially on the financial front was paramount Thus bothering about rest and recuperation in the lap of nature began to take a backseat way back in the 90s This lapse also caused ever growing statistics in tension stress

depression obesity a low immunity system vulnerability to a number of diseases Also children began growing up with underdeveloped cognitive abilities and also physical resilience because they had not learned about the beneficial qualities of Nature to help keep you healthy naturally and give you long term health benefits at the same time Also the parents are not to blame When a child was young if he had not been taught by his own parents to walk run jog explore go adventuring in the lap of nature you would not expect him to grow up deciding that he had better become a nature loving Wild Kid all of a sudden I have seen a large number of my city bred friends who would shudder at the idea of tiring themselves on nature hikes or go adventuring in woods you know all those insects and snakes and bugs and sabertooth tigers out there shudder shiver

Discovering Nature with Young Children: Trainer's Ingrid Chalufour, Karen Worth, 2003-10-01 Field tested across the country this comprehensive curriculum expands and extends the role science has traditionally played in the early childhood classroom The first in a new series Discovering Nature with Young Children explores the wide ranging elements that make up the natural world around us The curriculum replaces simple fact feeding practices with the development of long term scientific reasoning including literacy skills and numeracy skills such as hypothesis inference prediction and estimation A companion to the curriculum this trainer's guide serves as an indispensable handbook for trainers and administrators interested in introducing staff to the curriculum from planning to implementation Special sections outline the curriculum and introduce scientific reasoning to adults and eight workshops detail the complete curriculum for staff members The guide also includes strategies for supporting teachers over time through mentoring and guided discussions

Nature Interpretation for Children and Young People in the Nordic Countries Nordic Council of Ministers, Paul Hjulmann Seidler, 2013-05-22 This TEMA Nord report is a result of a one year project with all of the Nordic countries participating The primary goal of the project has been to collect develop and mediate a series of good examples of how nature interpretation aimed at children and young people can encourage children's understanding of nature and inspire them to involve themselves with questions on humans nature and thus help contribute to sustainable development Several issues should be considered when planning nature interpretation activities if nature interpretation aims to lead to sustainable development These points of view are concerned especially with how nature interpreters can encourage children and young people to take ownership to be involved with their body and mind and to reflect and put the experience and the activities in nature into a wider context

Children, Nature and Cities Claire Freeman, Yolanda van Heezik, 2018-06-14 That children need nature for health and well being is widely accepted but what type of nature Specifically what type of nature is not only necessary but realistically available in the complex and rapidly changing worlds that children currently live in This book examines child nature definitions through two related concepts the need for connecting to nature and the processes by which opportunities for such contact can be enhanced It analyses the available nature from a scientific perspective of habitats species and environments together with the role of planning to identify how children in cities can and do connect with nature

This book challenges the notion of a universal child and childhood by recognizing children's diverse life worlds and experiences which guide them into different and complex ways of interacting with the natural world. Unfortunately not all children have the freedom to access the nature that is present in the cities where they live. This book addresses the challenge of designing biodiverse cities in which nature is readily accessible to children. **Theokratia** George Kendall, 1653
