Szczepanowska,2013 Conservation of Cultural Heritage covers the methods and practices needed for future museum professionals who will be working in various capacities with museum collections and artifacts It also assists current professionals in understanding the complex decision making processes that face conservators on a daily basis The uniqueness of this book lies in correlating the aspects of material science and the behaviour of artifacts in a museum environment It will be of special benefit to museum professionals not trained in conservation Covering a broad range of topics that are key to sound conservation in the museum Conservation of Cultural Heritage is an important tool for students and professionals alike in ensuring that best practice is followed in the preservation of important collections **The Publishers' Trade List Annual** ,1976 [A Conservation Manual for the Field Archaeologist](#) Catherine Sease,1994-12-31 Conservation treatments and techniques for the

archaeologist in the field emphasizing how to conserve an excavated object before it is taken to a trained conservator offsite. Safety procedures and conservation supplies and materials are recommended. Techniques for lifting, cleaning, consolidating, marking, and storing are discussed along with methods for treating specific artifact materials e.g. amber, wood. Appendixes cover impressions and chemical preparations.

The Archaeologist's Laboratory Edward B. Banning, 2020-07-27. This second edition of the classic textbook *The Archaeologist's Laboratory* is a substantially revised work that offers updated information on the archaeological work that follows fieldwork such as the processing and analysis of artifacts and other evidence. An overarching theme of this edition is the quality and validity of archaeological arguments and the data we use to support them. The book introduces many of the laboratory activities that archaeologists carry out and the ways we can present research results including graphs and artifact illustrations. Part I introduces general topics concerning measurement error, data quality, research design, typology, probability, and databases. It also includes data presentation, basic artifact conservation, and laboratory safety. Part II offers brief surveys of the analysis of lithics and ground stone, pottery, metal artifacts, bone and shell artifacts, animal and plant remains, and sediments, as well as dating by stratigraphy, seriation, and chronometric methods. It concludes with a chapter on archaeological illustration and publication. A new feature of the book is illustration of concepts through case studies from around the world and from the Palaeolithic to historical archaeology. The text is appropriate for senior undergraduate students and will also serve as a useful reference for graduate students and professional archaeologists.
