Slinger,2021-12-06 This book is based upon the edX MOOCs Engineering Building with Nature and Beyond Engineering Building with Nature The Engineering Building with Nature MOOC explores the use of natural materials and ecological processes in achieving effective and sustainable hydraulic infrastructure designs distilling Engineering and Ecological Design Principles In the Beyond Engineering Building with Nature course the missing element of Social Design Principles is developed and taught Join us in exploring the interface between hydraulic engineering nature and society Note For full functionality of the interactive elements i e exercises and assignments of this e book you need Adobe Acrobat Reader which is freely available for download for Windows and MacOS at <https://get.adobe.com/uk/reader>      Nature as Heritage Council of Europe,Centre Naturopa,2002-01-01 The latest concept of heritage is one that encompasses both cultural and natural forms of heritage This publication presents the contributions of experts given at a seminar held in France in June 1999 These papers explore approaches to the environment as cultural heritage and the need for environmental protection and biodiversity      **Nature's Evil** Alexander Etkind,2021-08-12 This bold and wide ranging book views the history of humankind through the prism of natural resources how we acquire them use them value them trade them exploit them History needs a cast of characters and in this story the leading actors are peat and hemp grain and iron fur and oil each with its own tale to tell The uneven spread of available resources was the prime mover for trade which in turn led to the accumulation of wealth the growth of inequality and the proliferation of evil Different sorts of raw material have different political implications and give rise to different social institutions When a country switches its reliance from one commodity to another this often leads to wars and revolutions But none of these crises go to waste they all lead to dramatic changes in the relations between matter labour and the state Our world is the result of a fragile pact between people and nature As we stand on the verge of climate catastrophe nature has joined us in our struggle to distinguish between good and evil And since we have failed to change the world now is the moment to understand how it works      **Shakespeare's Theater of Nature** Aaron Kitch,2025-03-06 Shakespeare s Theater of Nature argues that Shakespeare combined art and nature in new ways while experimenting with relations between words images and objects as sources of knowledge and pleasure Shakespeare s re centering of nature as a source of theatrical representation in a range of plays follows debates in natural philosophy and theology about how to understand divinity in and through the order of nature ordo creationis Early chapters analyze early modern reframing of nature by printed books of botany cosmology and history as well Tudor interludes that center nature as a subject while later chapters offer readings of eight plays by Shakespeare that draw on classical medieval and early modern debates in natural philosophy and theology to create new modes of dramatic mimesis      **An inquiry into the nature and causes of the wealth of nations. tropical rain forests is big business Individuals and companies channel their resources to the preservation of nature through various ways one of which is the funding of environmental non governmental organizations ENGOs and community based organizations CBOs This book is the first to comprehensively address this issue and focus on a dominant theme in environmental philanthropy the links between ENGOs and CBOs and their sponsors especially the private sector It has been argued that donor support is based on recipient s perceived expertise and needs with no favouritism of flagship environmental organizations as recipients of donor funds A counterview holds that the private sector prefers to fund mainstream ENGOs for environmental research and policy reforms congenial to industrial capital The authors show that the debate about these arguments together with the empirical evidence on which they are based may shed light on certain aspects of the nature of environmental philanthropy The book evaluates practical examples of environmental philanthropy from Africa and elsewhere against philosophical questions about the material and geographical expressions of philanthropy and the North South connections among philanthropists and ENGOs and CBOs **Baudelaire and Nature** F.
