pioneered the coupling of cellular physical chemistry with plant physiology providing a sound physicochemical interpretation
of the laws of diffusion to a rapidly expanding field of plant physiological ecology His classical textbook is the only one of its
kind to provide an extensive array of quantitative problems and solutions in the field of plant biophysics and ecophysiology
extending from the molecular to the ecological level In this festschrift former graduate students and postdocs as well as
colleagues of Prof Nobel present a series of reviews that include scales from sub cellular to global and topics that range from
desert succulent biology to the physiology of alpine plants encompassing basic research and applications in agronomy and
conservation biology This state of the field survey provides current and useful information for professionals and graduate

Science Human Nature Bonding and Protecting the Natural World Christian Diehm analyzes the relevance of the philosophy
of deep ecology to contemporary discussions of human nature connectedness Focusing on deep ecologists notion of

identification with nature Diehm argues that deep ecological theory is less conceptually problematic than is sometimes thought and offers valuable insights into what a sense of connection to nature entails what its attitudinal and behavioral effects might be and how it might be nurtured and developed This book is closely informed by and engages at length with conservation social science which Diehm draws on to assess the claims of deep ecology theorists resolve long standing problems associated with their work investigate the impacts of time outdoors on human nature bonding and critically review the biophilia hypothesis Emphasizing the foundational role of ecologically inclusive identities in pro environmental attitudes and behaviors Diehm demonstrates that having a sense of connection to nature is more important than many environmental advocates have realized and that deep ecology has much to add to the increasingly pressing conversations about it
