Re-Creating Nature James T. Bradley,2019-09-24 An exploration of the moral and ethical implications of new biotechnologies Many of the ethical issues raised by new technologies have not been widely examined discussed or indeed settled For example robotics technology challenges the notion of personhood Should a robot capable of making what humans would call ethical decisions be held responsible for those decisions and the resultant actions Should society reward and punish robots in the same way that it does humans Likewise issues of safety environmental concerns and distributive justice arise with the increasing acceptance of genetically modified organisms GMOs in food production nanotechnology in

engineering and medicine and human gene therapy and enhancement The problem of dual use when a technology can be used both to benefit and to harm exists with virtually all new technologies but is central in the context of emerging 21st century technologies ranging from artificial intelligence and robotics to human gene editing and brain computer interfacing In *Re Creating Nature Science Technology and Human Values in the Twenty First Century* James T Bradley addresses emerging biotechnologies with prodigious potential to benefit humankind but that are also fraught with ethical consequences Some actually possess the power to directly alter the evolution of life on earth including human Specifically these topics include stem cells synthetic biology GMOs in agriculture nanotechnology bioterrorism CRISPR gene editing technology three parent babies robotics and roboethics artificial intelligence and human brain research and neurotechnologies Offering clear explanations of these various technologies a pragmatic presentation of the conundrums involved and questions that illuminate hypothetical situations Bradley guides discussions of these and other thorny issues resulting from the development of new biotechnologies He also highlights the responsibilities of scientists to conduct research in an ethical manner and the responsibilities of nonscientists to become science literate in the twenty first century *Rewilding Your Life* Yves Earhart, 2024-10-11 *Rewilding Your Life* explores the vital connection between urban dwellers and nature offering practical strategies for reconnecting with the natural world in city environments This engaging guide tackles the challenge of nature deficit in urban areas emphasizing its impact on physical and mental well being The book presents three key approaches 1 Urban gardening 2 Forest bathing 3 Citizen science projects demonstrating how city residents can cultivate meaningful relationships with nature regardless of their surroundings Drawing from environmental psychology urban planning and public health research the book provides a comprehensive look at the benefits of urban rewilding It highlights successful initiatives from cities worldwide and shares personal accounts of transformation through nature connection What sets this book apart is its accessibility offering actionable steps for readers to implement in their daily lives from creating balcony gardens to organizing neighborhood nature walks The author balances scientific insights with practical advice making complex concepts easy to understand and apply As the book progresses it explores the intersection of environmental science psychology and urban design providing a holistic view of urban rewilding While focusing on individual actions it also touches on broader urban planning issues offering readers a comprehensive understanding of the subject Through its blend of research backed information and step by step guidance *Rewilding Your Life* presents a compelling case for the importance of nature connection in enhancing personal well being and environmental stewardship in urban settings *Discovering Life, Manufacturing Life* Pierre V. Vignais, Paulette M. Vignais, 2010-06-21 Francis BACON in his *Novum Organum* Robert BOYLE in his *Skeptical Chemist* and Ren DESCARTES in his *Discourse on Method* all of these men were witnesses to the 17th scientific revolution which in the 17th century began to awaken the western world from a long sleep In each of these works the author emphasizes the role of the experimental method in exploring the laws of Nature that is to say the way in which an experiment

is designed implemented according to tried and tested techniques and used as a basis for drawing conclusions that are based only on results with their margins of error taking into account contemporary traditions and prejudices Two centuries later Claude BERNARD in his Introduction to the Study of Experimental Medicine made a passionate plea for the application of the experimental method when studying the functions of living beings Twenty first century Biology which has been fertilized by highly sophisticated techniques inherited from Physics and Chemistry blessed with a constantly increasing expertise in the manipulation of the genome initiated into the mysteries of information technology and enriched with the ever growing fund of basic knowledge at times appears to have forgotten its roots
