Nature Of Man Philosophers Theologians:

The Philosophical Theology of Jonathan Edwards Sang Hyun Lee, 2020-12-08 This book demonstrates the originality and coherence of Jonathan Edwards philosophical theology using his dynamic reconception of reality as the interpretive key. The author argues that what underlies Edwards writings is a radical shift from the traditional Western metaphysics of substance and form to a new conception of the world as a network of dispositions active and abiding principles that possess reality apart from their manifestations in actions and events. Edwards dispositional ontology enables him to restate the Augustinian Calvinist tradition in theology in a strikingly modern philosophical framework. A prime example of Edwards innovative reconstruction in philosophical theology is his conception of God as both eternal actuality and a disposition to repeat that actuality within God and also through creation. This view is a compelling alternative to the traditional Western doctrine of God as changeless actuality on the one hand and the recent process theologians excessive stress on God's involvement in change on the other. Edwards achievement was that he saw dynamic movement as essential to God's own life without compromising the traditional Christian tenets of God's prior actuality and transcendence. The author of this volume also explicates the way in which Edwards dynamic reconception of reality informs his theories of imagination, aesthetic perception, the knowledge of God, and the meaning of history. This expanded edition includes a new preface and a new appendix titled Jonathan Edwards on Nature. The Supremacy of Man. A Suggestive Inquiry Respecting the Philosophy and Theology of the Future, 1876

Kant as Philosophical Theologian Bernard M.G. Reardon, 1988-07-26 This book sets out to present Kant as a theological thinker. His critical philosophy was not only destructive of natural theology with its attempt to prove divine existence by logical argument; it also left no room for revelation in the traditional sense. Yet Kant himself, who was brought up in Lutheran pietism, certainly believed in God and could fairly be described as a religious man. But he held that religion can be based only on the moral consciousness, and in his last major work *Religion within the Limits of Reason Alone* discussed here in detail, he interpreted Christianity purely in terms of moral symbolism. It would be no exaggeration to claim that Kant's influence has been decisive for modern theology.

The Cambridge Companion to Christian Philosophical Theology Charles Taliaferro, Chad Meister, 2010 This Companion offers an up to date overview of the beliefs, doctrines, and practices of the key philosophical concepts at the heart of Christian theology. The sixteen chapters, commissioned specially for this volume, are written by an internationally recognized team of scholars and examine topics such as the Trinity, God's necessary existence, simplicity, omnipotence, omniscience, omnipresence, goodness, eternity, and providence, the incarnation, resurrection, atonement, sin, and salvation, the problem of evil, church, rites, revelation, and miracles, prayer, and the afterlife. Written in non-technical, accessible language, they not only offer a synthesis of scholarship on these topics but also suggest questions and topics for further investigation.

Philosophical Theology: The soul & its faculties Frederick Robert Tennant, 1928

Animals in Tillich's Philosophical Theology Abbey-Anne Smith, 2017-10-02 This book explores

how Paul Tillich's systematic theology focusing on the concepts of being and reason can benefit nonhuman animals while also analysing how taking proper account of nonhuman animals can prove immensely beneficial. The author first explains the body of Tillich's system examining reason and revelation, life and the spirit and history and the kingdom of God. The second section undertakes a critical analysis of Tillichian concepts and their adequacy in relation to nonhuman animals addressing topics such as Tillich's concept of technical reason and the multidimensional unity of life. The author concludes by discussing the positive concepts in Tillich's systematic theology with respect to nonhuman animals and creation including the concept of universal salvation and Tillich's interpretation of nonhuman animals and the Fall in Genesis.

Love, Divine and Human: Contemporary Essays in Systematic and Philosophical Theology Oliver D. Crisp, James M. Arcadi, Jordan Wessling, 2019-10-31. This volume offers an array of newly commissioned essays addressing the topic of love in the Christian tradition. Drawn from a range of expert theologians and philosophers in contemporary analytic and non-analytic theology, these essays join current debates within the theology of love and aim to propose new avenues for future research. Including the last essay written by Marilyn McCord Adams, *Love, Divine and Human* deals with a rich variety of issues related to divine and human love. The broad scope of the book includes divine transcendence and its methodological bearing on the doctrine of divine love, the nature and scope of divine love, the interrelation between God's love and wrath, the plausibility of an impassable God of love and the application of various conceptions of divine love to the problem of divine hiddenness, human ethics and human free will among other topics. This unified collection of cutting edge papers will advance discussion for all those focused on the theology of love.

Elders studies it against the background of the attempts of the great philosophers of the past to penetrate deeper into the knowledge of God While the Introduction treats the nature of philosophical theology according to Aquinas Chapter One presents a concise history of the idea of God in Western philosophical thinking Chapters Two and Three deal with the question of the cognoscibility of God and the Five Ways of St. Thomas New solutions are proposed of some difficulties in the Third and Fourth Ways The attributes of God are studied in the order of the Summa theologiae I Chapter Seven considers the grammar of God's language The following chapters examine divine knowledge, foreknowledge of future events, divine will and providence as well as creation The last chapter deals with the problem of the co-existence of God and finite creatures This study shows that the philosophical theology of St. Thomas Aquinas is a coherent whole of impressive depth and beauty It has its basis in our daily experience of the world and the general principles of being but its conclusions reach the summits of negative theology **A Religious Encyclopaedia: Or Dictionary of Biblical, Historical, Doctrinal, and Practical Theology** Philip

Schaff, Samuel Macauley Jackson, 1889 **Philosophy, Theology, and Hegel's Berlin Philosophy of Religion, 1821-1827** Philip M. Merklinger, 1993-01-01 This book examines Hegel's contribution to the debate about the relationship between philosophy and theology reason and faith The author locates the debate within the philosophy of religion displaying that there is a need for philosophy to enter into dialogue with and to reflect upon the contents of theology Utilizing the recently published critical editions of Hegel's Berlin Lectures on the Philosophy of Religion the author substantiates this insight by tracing dialectically the development of Hegel's notion of the philosophy of religion through the 1821 1824 and 1827 lecture series on religion Not only does the author demonstrate that philosophy needs to incorporate theology in its thinking but he also establishes that such incorporation means that the philosophy of religion will be a continuously developing mode of reflection Indeed the author notes this developing philosophy of religion can for Hegel only take place through dialectical interaction with the leading theologies and theologians of one's time The book shows that this inner development of the philosophy of religion is also the inner development of the Spirit itself Critical Essays Nicholas Churchich, 2005 A nuanced discussion of the connections between philosophy theology and science written by a scholar who is also a values oriented Christian Churchich believes unlike naturalistic theorists and biological evolutionists that nature offers a very limited picture of reality and that our origin and destiny are one in the realm of God The Oxford Handbook of Philosophical Theology Thomas P. Flint, Michael Rea, 2011-03-17 Philosophical theology is aimed primarily at theoretical understanding of the nature and attributes of God and of God's relationship to the world and its inhabitants During the twentieth century much of the philosophical community both in the Anglo American analytic tradition and in Continental circles had grave doubts about our ability to attain any such understanding In recent years the analytic tradition in particular has moved beyond the biases that placed obstacles in the way of the pursuing questions located on the interface of philosophy and religion The result has been a rebirth of serious widely discussed work in philosophical theology The Oxford Handbook of Philosophical Theology attempts both to familiarize readers with the directions in which this scholarship has gone and to pursue the discussion into hitherto under examined areas Written by some of the leading scholars in the field the essays in the Handbook are grouped in five sections In the first Theological Prolegomena articles focus on the authority of scripture and tradition on the nature and mechanisms of divine revelation on the relation between religion and science and on theology and mystery The next section Divine Attributes focuses on philosophical problems connected with the central divine attributes aseity omnipotence omniscience and the like In Section Three God and Creation essays explore theories of divine action and divine providence questions about petitionary prayer problems about divine authority and God's relationship to morality and moral standards and various formulations of and responses to the problem of evil The fourth section Topics in Christian Philosophy examines philosophical problems that arise in connection with such central Christian doctrines as the trinity the incarnation the atonement original sin resurrection and the Eucharist Finally Section Five Non
