Reviewed by Aylla Andrianna Hamdani – 2014-8-1 001

## Overall Summary

Within this book, Crowe tell us the difference between the natural world from the man made world, their interaction and interpretation towards architecture and the world around us. The natural world refers to the environment which has not been touched by humans, a world which has developed on their own accord through time and evolution. Where plants, animals, and other feature developed naturally in the physical world. Nowadays we view nature as natural things which implies a distinction between natural and artificial which has been changed and produced by human mind. Therefore a man-made world is a world which humans has touched and changed, created by humans and opposed by nature. An example of a man-made world would be a lake which was created by machines, our houses which was constructed by natural materials and our cities which has changed the natural environment.

Human nature think and act differently than others, we can adapt and create environment to fit our needs to be able to survive. Like for example we create shelter to protect us from the rain and wild animals, reshape the natural environment to gain easy access to food and increase

the

number of shelter due to expansion of human growth. As we keep evolving we begin to change the natural environment into a man-made world, a reliable and much more suitable environment.

The man-made world is made by humans reflection of the natural world, nature becomes inspiration, characteristics and metaphor towards architecture. Architecture brings harmony between human habitation and the natural world through design approaches such as site, buildings, furniture and surroundings which becomes composition of a man made world. Everyone has different viewpoints on the way we approach the natural environment and the man-made environment. How we view the world depends on where we were brought up to, what we learn, our religion, culture and personal experiences. A person from a countryside will have different opinion on how they view natural resources from a city person. A countryman will appreciate their environment and food because they know what nature has given them, although a city man will not appreciate environment as much because they have not experienced it from the start.

Architecture uses nature to gain balance, ideals and beauty. A whole history could be told by a historic building, architecture becomes a tool to understand the creation of what human has constructed over time and the natural resources it used. Everything in architecture have its connection with the natural world, it could be from its materials, knowledge or metaphors. In Medieval and classical times nature becomes a starting point to construct architecture to gain perfection and balance. However after the world war, mass production become the key aspects where people needed places to live and mass houses were produced forgetting the implications to nature. After modernism and the use of vast materials which has caused harm to nature people began to recognize the damage we caused to nature.

There is always a balance between the natural world, there is life and death, day and night, plants and animals, a never ending cycle. However with the human intervention the natural world becomes unbalanced, we take too much than we can give back to nature, we destroy

decreases we began to understand that it is our fault and begin to build new environments to remind us of the natural world. We are connected to nature and the man-made world is hurting not only the environment but also ourselves.

## My Viewpoint

The man-made world reshape and develop the natural world to become more habitable for humans. During the process we uses our understanding on how the world around us work and our beliefs. We have changed so many things within this man made world which ~~doesn't seem~~ natural anymore.

The rapid expansion in human population that began after the Industrial Revolution, cities were relatively small, their impact on the natural world was limited. With the increase of population there has been wildlife extinction, deforestation, ecological footprint all caused by buildings and its surroundings. In the past the man-made world cared about the environment and only wanted to expand a little however as time passes, population increased, war begins and modernism appeared.

The man-made world changes and wanted to create better structures, technology and the increase of land use, forgetting the harm it has created to the environment. Global Warming is the consequences of what man-made world done against nature, forgetting the implications and going through with developments. It is now too late to bring back the natural environment as it is, we can only prevent further destruction.

*Constructing Place* Sarah Menin, 2004-02-24 This book is a cutting edge study exploring the field of the conception and the tectonic making of place as it impinges on and thus changes the site in which it is set *The Making of Things* Frank Jacobus, Angela Carpenter, Rachel Smith Loerts, Justin M. Tucker, Randal Dickinson, 2021-07-29 The Making of Things is about effect and intention in the schematic architectural model a deep dive into the nature of architectonic form as the underlying syntax for all architectural work By focusing on primitive geometries alongside fundamental principles of architectural thinking and making this book enhances the reader s capacity to intellectually and physically craft models that effectively communicate intention With over 650 diagrams this book acts as an expansive visual glossary that reveals the underlying structure of architectonics and acts as an encyclopedia of formal possibilities Supporting essays in the book explore the nature of perception abstraction and metaphor to provide a theoretical basis of formal effects in architecture This structure enables readers to make clear and direct connections between the things you construct and the reasons you construct them This book is a bridge from the what to the why of form making It is a pedagogical notebook a design primer that prompts discourse about the nature of objects This is a must have desk reference for beginning architecture and interior design students to stimulate their creative approaches and gain foundational knowledge of the underlying effects of formal typologies and how they manifest themselves in built forms around the world **Landscape Urbanism and its**

**Discontents** Andrés Duany, Emily Talen, 2013-03-01 Landscape Urbanism and New Urbanism negotiating the relationship between cities and the natural world In contemporary Western society urban development is regarded as an unfortunate blight from which nature provides a much needed respite This apparent dichotomy ignores the interdependence between human settlement and the natural world In fact one of the most pressing problems facing urban theorists today is determining how to resolve the tension between the built and natural environments in the process creating truly sustainable cities Landscape Urbanism and its Discontents is a collection of essays exploring the debate over urban reform now polarized around the two competing paradigms of Landscape Urbanism and the New Urbanism Landscape Urbanism is conceived as a more ecologically based approach while New Urbanism is more concerned with the built form Well known and influential urban theorists such as Andr s Duany and James Howard Kunstler delve into the impact of the tension between the two perspectives on Smart growth Neighborhood design Sustainable development Creating cities that are in balance with nature While there is significant overlap between Landscape Urbanism and the New Urbanism the former has assumed prominence amongst most critical theorists whereas the latter s proponents are more practically oriented Given that these two sets of ideas are at the forefront of sustainable urban design the analysis and potential reconciliation offered by Landscape Urbanism and its Discontents is long overdue Andr s Duany is a leading proponent of the New Urbanism and is a founding principal at Duany Plater Zyberk Company Emily Talen is a professor at Arizona State University and the author of four

these earlier volumes dealt with leisure and recreation the elderly personal space aesthetics energy behavioral approaches to environmental problems methodological issues social indicators industrial settings and the like Chapters were written by psychologists sociologists geographers and other social scientists and by authors from professional design fields such as urban planning operations research landscape architecture and so on Our goal in these first two volumes was to present a sampling of areas in the emerging environment and behavior field and to give readers some insight into the diversity of research and theoretical perspectives that characterize the field Beginning with the present volume our efforts will be directed at a series of thematic volumes The present collection of chapters is focused on children and the environment and as much as possible we invited contributions that reflect a variety of theoretical and empirical perspectives on this topic The next volume in the series now in preparation will address the area of culture and the environment Suggestions for possible future topics are welcome

Irwin Altman Joachim F **The Concept of Work** Herbert Applebaum, 1992-09-30 This book presents an analysis and review of work starting with the Homeric period then dealing with classical Greece and classical Rome the early Christians and Jews the early Middle Ages the era of Charlemagne the high Middle Ages the views of Luther and Calvin the English and French Enlightenment the nineteenth century the twentieth century and prospects for the future of work It offers a rich and varied tapestry on the complexity of values regarding work criss crossing through crafts occupations and professions through slave and free born employments through lay and religious figures and through rural and urban contexts The permutations of work and its meanings are traced and related to the social and cultural contexts of each period of history dealt with ancient medieval and modern Applebaum offers projections for work in the future based on modern day technologies along with work within the context of new social conditions created by industrial cultures in the modern period The future of work is examined as one of the key elements for the possibility of change in the social structure of industrial cultures At a time when so many people are questioning the work ethic this book provides a valuable perspective on work in past societies how it has developed and been transformed and what are its prospects for the future

*The Man-Made World* Charlotte Perkins Gilman, 2007-03-01 Here is a cry for feminist revolution In this work Charlotte Perkins Gilman details how male dominated culture has through the very social devices that keep it in place conspired to produce greater human suffering than is truly necessary In this landmark work she explains how economic status mobility and autonomy are at the root of the subjugation of women worldwide For anyone wanting to understand the feminist movement how far it has come and how much of its ambition is yet unfulfilled *The Man Made World* is a fascinating work of philosophy and biting social commentary American writer and social reformer CHARLOTTE PERKINS GILMAN 1860 1935 was a pioneer of modern feminism She is best remembered for her short story *The Yellow Wallpaper* 1890

**The Man-Made World; Or, Our Androcentric Culture** Charlotte Perkins Gilman, 2022-09-04 In *The Man Made World Or Our Androcentric Culture* Charlotte Perkins Gilman delivers a profound critique of the patriarchal structures that shape society Through a blend of

incisive social commentary and philosophical inquiry Gilman explores the implications of a culture predominantly influenced by male perspectives The text employs a distinctive literary style that seamlessly weaves together personal anecdotes sociological analysis and rhetorical questioning all underscored by a passionate call for gender equality Set against the backdrop of the early 20th century a period marked by burgeoning feminist movements Gilman s work challenges readers to reconsider traditional gender roles and the consequences of an androcentric worldview Charlotte Perkins Gilman was a prominent social reformer and a pivotal figure in the feminist movement Born in 1860 her own experiences with the limitations of womanhood informed her writings Gilman s advocacy for women s rights and her exploration of social issues are evident throughout her body of work most notably in her influential short story The Yellow Wallpaper This background positions her as a critical voice in understanding the cultural constraints placed upon women in her era The Man Made World is an essential read for anyone interested in gender studies sociology or the history of feminist thought Gilman s incisive observations and compelling arguments will not only challenge your existing beliefs but also inspire a deeper exploration of societal norms This book remains a timely contribution to contemporary discussions about gender and culture making it a must read for scholars and engaged citizens alike

**Man and Nature in the City** ,1969 Second Nature Crina Archer,2013-08 These essays collected here by both eminent and emerging scholars engage interlocutors from Machiavelli to Arendt Individually they contribute compelling readings of important political thinkers and add fresh insights to debates in areas such as environmentalism and human rights Together the volume issues a call to think anew about nature not only as a traditional concept that should be deconstructed or affirmed but also as a site of human political activity and struggle worthy of sustained theoretical attention

**In Search of Human Nature** Carl N. Degler,1992-11-05 Winner of the Pulitzer Prize in History in 1972 and a past president of both the Organization of American Historians and the American Historical Association Carl Degler is one of America s most eminent living historians He is also one of the most versatile In a forty year career he has written brilliantly on race Neither Black Nor White which won the Pulitzer Prize women s studies At Odds which Betty Friedan called a stunning book Southern history the New Deal and many other subjects Now in The Search for Human Nature Degler turns to perhaps his largest subject yet a sweeping history of the impact of Darwinism and biological research on our understanding of human nature providing a fascinating overview of the social sciences in the last one hundred years Just how much of human nature is determined by genetics With this sweeping book Pulitzer prize winning historian Carl Degler provides an engrossing account of how we have grappled with that question by tracing the impact of Darwinism on the social sciences in the last hundred years The idea of biological roots to human nature was almost universally accepted at the turn of the century and was used to reinforce prejudice against women non whites and the poor whose positions were seen as the result of genetic weakness until it was discredited by the likes of Franz Boas Margaret Mead and B F Skinner But more recently Degler writes under the influence of Konrad Lorenz Jane Goodall Edward O Wilson

and others a more objective approach has uncovered new links between evolution and human behavior A masterful work by one of America s preeminent historians In Search of Human Nature sheds brilliant new light on an essential question and how changing times have influenced the answers we have found      **What Else Is Pastoral?** Ken Hiltner,2011-03-18

Pastoral was one of the most popular literary forms of early modern England Inspired by classical and Italian Renaissance antecedents writers from Ben Jonson to John Beaumont and Abraham Cowley wrote in idealized terms about the English countryside It is often argued that the Renaissance pastoral was a highly figurative mode of writing that had more to do with culture and politics than with the actual countryside of England For decades now literary criticism has had it that in pastoral verse hills and crags and moors were extolled for their metaphoric worth rather than for their own qualities In What Else Is Pastoral Ken Hiltner takes a fresh look at pastoral offering an environmentally minded reading that reconnects the poems with literal landscapes not just figurative ones Considering the pastoral in literature from Virgil and Petrarch to Jonson and Milton Hiltner proposes a new ecocritical approach to these texts We only become truly aware of our environment he explains when its survival is threatened As London expanded rapidly during the sixteenth and seventeenth centuries the city and surrounding rural landscapes began to look markedly different Hiltner finds that Renaissance writers were acutely aware that the countryside they had known was being lost to air pollution deforestation and changing patterns of land use their works suggest this new absence of nature through their appreciation for the scraps that remained in memory or in fact A much needed corrective to the prevailing interpretation of pastoral poetry What Else Is Pastoral shows the value of reading literature with an ecological eye      **Artificial Paradise** Sharona E. Ben-Tov,2025-10-01

The Artificial Paradise shows how science fiction is a powerful purveyor of cultural myths rooted in the history of the West myths that shape American attitudes toward nature technology and the pursuit of happiness Sharona Ben Tov posits the theory that science fiction is an American national mode of thinking which seeks to replace nature with technological worlds paradoxically in hope of regaining a mythic magical American Eden Science fiction imagery from fifties sci fi through women s sci fi and cyberpunk keeps alive the desires of and anxieties born during the Scientific Revolution when the Western view of nature changed radically Ben Tov discusses sci fi classics like Dune The Dispossessed Neuromancer Vonnegut s fiction and the Aliens movie in relation to ancient and modern myths of nature to scientific projects like the atom bomb Strategic Defense Initiative robotics virtual reality and to cultural psychology The book will appeal to those interested in popular culture literature and feminist studies It will also enchant general readers who are interested in science fiction especially readers who want to understand more about the relationship between technology and society The Artificial Paradise sets out to map the cultural anxieties that have beset Western thinking since the Scientific Revolution and to investigate the ills that flow from the split in Western thinking between nature and culture and subject and object and how the split is expressed and reinforced in popular culture and particularly in written science fiction A thought provoking wide ranging book written in an admirably lucid style Sarah

Lefanu author of *Feminism and Science Fiction* The examination of America's uneasy relationship with nature is an illuminating approach which draws together science fiction studies and American studies The witty and readable style should attract a wide readership Brian Attbery Idaho State University *The Artificial Paradise* is at once intellectually provocative knowledgeable and literate As our lives become increasingly determined by technology we will need to turn to such thinkers as Dr Ben Tov to guide us through its dangers and pleasures Alan Lightman Massachusetts Institute of Technology Sharona Ben Tov is Assistant Professor of Creative Writing and English Bowling Green State University She is author of *During Ceasefire* Harper Collins a book of poems     Outcasts from Eden Edward Picot, 1997-01-01 A re evaluation in terms of their contributions to the landscape genre of five important post war poets Philip Larkin R S Thomas Charles Tomlinson Ted Hughes and Seamus Heaney     *Research Reports* ,1972     **Population, Resources, and the Environment** Ronald Gene Ridker, 1972     **Hegel and Modern Society** Charles Taylor, 1979-04-05 Introduction to Hegel's thought for the student and general reader emphasizing in particular his social and political thought and his continuing relevance to contemporary problems
