Nature Reborn:

Ecotheology Kiara Jorgenson, Alan G. Padgett, 2020-09-24 Just as God loves creation so are Christians called to care for it. Now amid the accelerating degradation of our global environment that task has taken on greater urgency than ever. How should Christians respond to the climate crisis and widespread pollution of earth's shared commons: water and air? How might Christian communities think about human responsibility to other living creatures? In roundtable format, Richard Bauckham, Cynthia Moe Lobeda, Steven Bouma-Prediger, and John F. Haught navigate the layers of what it means for humans to live in right relationship with earth's lifeways. After each contributor's essay, the other three contributors issue a response, including points of disagreement and questions, thereby modeling for readers productive and respectful dialogue. The ecumenical conversations in *Ecotheology* represent the diverse viewpoints of contributors' theological and practical commitments exploring creation care through a variety of frameworks including natural science, biblical studies, systematic theology, and Christian ethics.

Creation Care Discipleship Steven Bouma-Prediger, 2023-10-17 Although our planet faces numerous ecological crises including climate change, many Christians continue to view their faith as primarily a spiritual matter that has little relationship to the world in which we live. But Steven Bouma-Prediger contends that protecting and restoring our planet is part and parcel of what it means to be a Christian. Making his case from Scripture, theology, and ethics, and including insights from the global church, Bouma-Prediger explains why Christians must acknowledge their identity as earthkeepers and therefore embrace their calling to serve and protect their home planet and fellow creatures. To help readers put an earthkeeping faith into practice, he also suggests numerous practical steps that concerned believers can take to care for the planet. Bouma-Prediger unfolds a biblical vision of earthkeeping and challenges Christians to view care for the earth as an integral part of Christian discipleship.

Nature, Human Nature, and God Ian G. Barbour, Ian Barbour offers analyses of the shape and import of evolutionary theory, indeterminacy, neuroscience, information theory, and artificial intelligence. He also addresses deeper philosophical issues and the idea of nature itself. Then Barbour advances to the interconnected religious questions at the core of contemporary debate: Are humans free? Does religion itself evolve? Are we immortal? Is God omnipotent? How does God act in nature? Barbour's work offers hope that newer religious insights and imperatives occasioned by deep interaction with science can address the environmental and global challenges posed by the relentless advance of science.

Before Nature H. Paul Santmire, 2014-05-01 *Before Nature* caps a set of themes first brought to the fore in Santmire's previous work, most notably the classic *The Travail of Nature*. Here Santmire continues the pursuit of a theology bound up with nature and its condition, especially the fragility and fervent expectation of nature's redemption. Santmire invites readers on a theological and spiritual journey to a prayerful and contemplative knowledge of the Triune God in which practitioners are inducted into a bountiful relationship with the cosmic and universal ministry of Christ and the Spirit, uniting all of nature in a single vision of hope and anticipation.

Celebrating Nature by Faith H. Paul

Santmire,2020-09-09 Sometimes it is helpful to take one step backward in order to take two steps forward In this insightful volume H Paul Santmire draws on his long standing and widely recognized engagement with ecological theology to propose that the traditions of the Protestant Reformation rightly read offer rich resources today for those who are struggling to move forward to respond theologically to the crisis of a planet in peril and thereby to celebrate nature by faith **Development and Justice** Rajula Annie Watson,2004 Restoring the health of the land is indispensable not only because it is the ground of our sustenance and survival but also land has in itself the inherent worth This book challenges humanity s indulgence and activities of development science and technology and insists for human responsibility and moral duties towards the land the sustaining mother earth which is abused ransacked of its wealth and ignored of its intrinsic value The study attempts to bring together perspectives and values that are important for preserving the rights of the land and proposes the contour of a land ethic *Nature as Spiritual Practice* Steven Chase,2011-05-17 Chase s innovative work uses a compelling blend of theological scriptural historical and cultural discussions to reclaim the role of nature in the formation of Christian spiritual and moral identity **The Oxford Handbook of Mission Studies** Kirsteen Kim,Knud Jørgensen,Alison Fitchett-Climenhaga,2022-04-18 The Oxford Handbook of Mission Studies represents more than a century of scholarship related to the theology history and methodology of the propagation of Christian faith and the engagement of Christians with cultures religions and societies worldwide It contains more than 40 articles by experts from different disciplinary and ecclesial perspectives who are from all continents It not only offers a broad overview of key approaches and issues in mission studies but it also highlights current trends and suggests future developments The Handbook builds on renewed interest in mission studies this century generated by recent key statements on mission from ecumenical evangelical Catholic and Orthodox sources and by a spate of academic works on the topic Western church leaders now apply insights from foreign missions such as inculturation liberation interfaith work and power encounter to today s multicultural societies Meanwhile there are new initiatives in mission from the Majority World where most Christians live so that sending is not only from the west to the rest but from everywhere to everywhere Therefore this volume aims to reflect the voices of the receivers of mission as well as its protagonists and to raise awareness of new movements In a time of growing recognition of religions more generally this work examines and theorizes the missional dimensions of the world s largest religion its agendas growth outreach role in public life effect on cultures relevance for development and its approaches to other communities Earth & Nature Songs Jerry Silverman,2010-10-07 Perfect for Earth Day celebrations this is the book for any nature lover Many of the songs can be used for camp outs hiking or just pure fun Includes I Love the Mountains Land and Sea Morning Song America the Beautiful Down the River Earth Day Is Every Day a children s musical and many more Written for voice and piano with guitar chords Martin Luther and Buddhism Paul S. Perichoresis Bryan Jeongguk Lee, 2011-08-05 In the face of today's unprecedented ecological crisis Christianity is often seen not only as sharing in the guilt of causing this crisis but also as unwilling and incapable of providing any help in reenvisioning the required new way of life on earth This view is justified when we consider how modern Christian theology has tended to denigrate the natural world and how the prevalent world deserting Christian eschatology forms a spirituality that is fundamentally insensitive and indifferent to nature In light of this a meaningful Christian contribution to today's world of enormous ecological suffering must lie in envisioning a fundamentally new ecological vision of humanity's relationship to nature as well as providing an ethical energy to transform our current path of self destruction In this book Bryan J Lee finds in Jürgen Moltmann's eschatological panentheism a viable pathway toward a Christian ecological reenvisioning of the relationship between God and humanity and between humanity and nature Furthermore Lee demonstrates in a persuasive way how Christian worship can and should be the epicenter of ecological transformation of the society emphatically interpreting Christian worship as an ecological eschatological anticipation of God's cosmic perichoresis **Baptist Political**

Environmental Ethics Steven C. van den Heuvel, 2017-05-04 There is widespread understanding of the close connection between religion and the ecological crisis and that in order to amend this crisis theological resources are needed This monograph seeks to contribute to this endeavor by engaging the theology of Dietrich Bonhoeffer His theology is particularly suitable in this context due to its open ended nature and to the prophetic and radical nature of the questions he was prepared to ask that is why there are many other attempts to contextualize Bonhoeffer's theology in areas that he himself has not directly written about In this monograph Steven van den Heuvel first of all addresses the question of how to translate Bonhoeffer's theology in a methodologically sound way He settles on a modified form of the general method of correlation

Then secondly van den Heuvel sets out to describe five major concepts in Bonhoeffer's work bringing these into critical interplay with discussions in environmental ethics and eco theology. In making the correlations he thoroughly describes each concept situating it in the historic and intellectual background of Bonhoeffer's time. He then transposes these concepts to contemporary environmental ethics describing what contribution Bonhoeffer's theology can make.

Preaching Creation John C. Holbert, 2012-01-06 The human race along with the animals and plants that make up the creation of God face a difficult future due to the multiple ways that the ecosystem on which they all depend is currently under stress. Temperatures are rising along with the oceans. Rain forests are falling along with the polar ice caps. Questions of the environment are now front and center in any catalog of concerns. Those who are called to preach need to include in the subjects of their sermons these environmental issues. Our Bible contains significant resources often overlooked as bases on which powerful environmental sermons can be preached. This book introduces the subject of preaching and the environment offering close looks at important biblical passages that address the cosmos of God and presenting sample sermons founded on those passages. The book calls for preachers both to name the vast problems we face and to offer the hope of the gospel of God to address them.

Eco-Reformation Lisa E. Dahill, Jim B. Martin-Schramm, 2016-10-31 In 2017 Christians around the world will mark the five hundredth anniversary of the Reformation. In the midst of many appeals for reformation today a growing number of theologians, scholars and activists around the world believe Reformation celebrations in 2017 and beyond need to focus now on the urgent need for an Eco Reformation. The rise of industrial fossil fuel driven capitalism and the explosive growth in human population endanger the fundamental planetary life support systems on which life as we know it has evolved. The collective impact of human production, consumption and reproduction is undermining the ecological systems that support human life on Earth. If human beings do not reform their relationship with God's creation, unspeakable suffering will befall many, especially the weakest and most vulnerable among all species. The conviction at the heart of this collection of essays is that a gospel call for ecological justice belongs at the heart of the five hundredth anniversary observance of the Reformation in 2017 and as a if not the central dimension of Christian conversion, faith and practice into the foreseeable future. Like Luther's Ninety Five Theses, this volume brings together critical biblical, pastoral, theological, historical and ethical perspectives that constructively advance the vision of a socially and ecologically flourishing Earth.

Naturalizing Phenomenology Jean Petitot, 1999 This ambitious work aims to shed new light on the relations between Husserlian phenomenology and the present day efforts toward a scientific theory of cognition with its complex structure of disciplines, levels of explanation and conflicting hypotheses. The book's primary goal is not to present a new exegesis of Husserl's writings although it does not dismiss the importance of such interpretive and critical work. Rather the contributors assess the extent to which the kind of phenomenological investigation Husserl initiated favors the construction of a scientific theory of cognition particularly in contributing to specific contemporary theories either by complementing or by questioning them.

What clearly emerges is that Husserlian phenomenology cannot become instrumental in developing cognitive science without undergoing a substantial transformation. Therefore the central concern of this book is not only the progress of contemporary theories of cognition but also the reorientation of Husserlian phenomenology. Because a single volume could never encompass the numerous facets of this dual aim, the contributors focus on the issue of naturalization. This perspective is far reaching enough to allow for the coverage of a great variety of topics ranging from general structures of intentionality to the nature of the founding epistemological and ontological principles of cognitive science to analyses of temporality and perception and the mathematical modeling of their phenomenological description. This book then is a collective reflection on the possibility of utilizing a naturalized Husserlian phenomenology to contribute to a scientific theory of cognition that fills the explanatory gap between the phenomenological mind and brain.

Spirit and Nature Timothy Hessel-Robinson, Ray Maria McNamara, 2011-08-01 *Spirit and Nature* is a collection of essays exploring how the resources of Christian spirituality can inform the practice of a more ecologically sustainable faith. Our current ecological situation calls for people of religious faith to reexamine the way they envision the practice of spirituality. As environmental ethicists have called us to reconsider the human Earth relationship so that the planet is not seen as simply an endless supply of resources to fill human wants and needs, so these essays call us to reconsider spiritual practice as it relates to Earth's ecology. Rather than viewing spirituality as an escape from the material world, the authors describe the embodiment of the God quest within the human nature relationship. Drawing on diverse disciplinary perspectives, these essays examine a variety of topics including the relationship between Earth and humans in the Bible, the role of nature's beauty in Christian spirituality, the practice of Christian discernment and contemplation in light of the natural sciences, the role of nature in liturgical prayer, and others. These essays consider how scholarship in Christian spirituality can contribute to reimagining faith in ways that better cherish the Earth's fragile beauty.

Doctrine in Shades of Green Andrew J. Spencer, 2022-01-13 How we come to our conclusions about ethical issues matters as much as the specific policies or practices we commend. This book argues that four key doctrines form a theological perspective for environmental ethics. They are the key ideas upon which people build their ethics of the environment. By looking at the doctrines of revelation, creation, anthropology, and eschatology, we can find points of contact to work together more effectively for the common good and have more meaningful debates when our positions differ. This book uses examples from four different theological positions: ecotheology, theological liberalism, fundamentalism, and evangelicalism, to show that a creation-positive ethic is possible from all of these positions and it explores why people who stand within various theological streams may engage in environmental issues in diverse ways.

Issues in Contemporary Christian Thought Duane Olson, Olson's clear and concise overview roots contemporary questions firmly in Christian responses to the Enlightenment. He discusses the range of contemporary opinions, their rationales, and what's at stake. Olson illustrates these alternate frameworks as they play out in central concerns over the being of God in relation to the universe.

how to understand the figure of Christ today and the distinctively new notions of being human Specifically geared to the novice theologian in college or seminary settings Olson s text includes Reflection Research Questions Suggestions for Further Reading and a Glossary *The Truth About You* Johnny Young Jr.,2012-01-10 The truth about you reveals the secrets to living in victory and fulfilling the will of God for your life by understanding your covenant identity ability and relationship with Christ
