Reading the Book of Nature in the Dutch Golden Age, 1575-1715 Eric Jorink, 2010-10-25 Traditionally Dutch scientific culture of the Golden Age is regarded as rational pragmatic and utilitarian The role of Christiaan Huygens Johannes Swammerdam and Antoni van Leeuwenhoek in the so called Scientific Revolution was recognised long ago as was the fact that the revolutionary philosophy of René Descartes made its first impact in the Netherlands This book challenges the traditional picture First it shows how nature was regarded as a second book of God next to the Bible For many contemplating investigating representing and collecting natural objects was a religious activity Secondly this book demonstrates that the deconstruction of the old view of nature was partly caused by the pioneering exegetical research conducted in the Dutch Republic more specifically the emergence of radical biblical criticism
