Goossen, 1979      **Navajo Made Easier**, 1986      The Green Book of Language Revitalization in Practice Leanne Hinton, Kenneth Hale, 2013-06-13 With world wide environmental destruction and globalization of economy a few languages especially English are spreading rapidly in use while thousands of other languages are disappearing taking with them important cultural philosophical and environmental knowledge systems and oral literatures We all stand to suffer from such a loss none more so than the communities whose very identity is being threatened by the impending death of their languages In response to this crisis indigenous communities around the world have begun to develop a myriad of projects to keep their languages alive This volume is a set of detailed accounts about the kind of work that is going on now as people struggle for their linguistic survival It also serves as a manual of effective practices in language revitalization Following are the key features 23 case studies of language revitalization in practice from Native American languages Australian languages Maori Hawaiian Welsh Irish and others written primarily by authors directly involved in the programs short introductions situate the languages to help make the languages more real in the minds of readers each chapter gives a detailed overview of the various kinds of programs and methods in practice today introductions and maps for each of the languages represented familiarize the reader with their history linguistic structure and sociolinguistic features and strong representation in authorship and viewpoint of the people and communities whose languages are threatened gives the readers an inside understanding of the issues involved and the community internal attitudes toward language loss and revitalization This book was previously published by Academic Press under ISBN 978 01 23 49354 5      RTF Pocket Guide Sean M. Burke, 2003-07-22 Rich Text Format or RTF is the internal markup language used by Microsoft Word and understood by dozens of other word processors RTF is a universal file format that pervades practically every desktop Because RTF is text it s much easier to generate and process than binary doc files Any programmer working with word processing documents needs to learn enough RTF to get around whether it s to format text for Word or almost any other word processor to make global changes to an existing document or to convert Word files to or from another format RTF Pocket Guide is a concise and easy to use tutorial and quick reference for anyone who occasionally ends up mired in RTF files As the first published book to cover the RTF format in any detail this small pocket guide explains the syntax of RTF with examples throughout including special sections on Unicode RTF and MSHelp RTF and several full programs that demonstrate how to work in RTF effectively Most word processors produce RTF documents consisting of arcane and redundant markup This book is the first step to finding order in the disorder of RTF      **Tinman** David Cope, 2008-12-04 Offering insight into the creative processes of a contemporary composer Tinman presents 150 vignettes from author David Cope s life Some of the notable individuals discussed in this innovative biography are John Cage Karlheinz Stockhausen Pierre Boulez Aaron Copland Warren Zevon Carl Sagan Frank Drake Douglas Hofstadter Arthur Knight Danny Glover Steven

Spielberg George Lucas Dorothy Freeman Arthur C Clarke Isaac Asimov and Philip Jos Farmer Tinman offers a fond music journey including two encounters with Bach Rachmaninoff s classic Prelude in C sharp minor Beethoven s Fifth Symphony Pierre Boulez and the sadness of Igor Stravinsky s death The title borrowed from L Frank Baum s book The Wizard of Oz is an aphorism affectionately attached to Cope in the late 1990s The reference reflects the many attitudes about his work with his computer music program Experiments in Musical Intelligence critics felt the results of this program lack heart Though Tinman covers many other aspects of Cope s life from his love of the cello to his days as a graduate student at the University of Southern California and to his work as a composer author and teacher the main theme centers on his search for self identity
