Josh Dean,2018-09-25 An incredible true tale of espionage and engineering set at the height of the Cold War a mix between The Hunt for Red October and Argo about how the CIA the U S Navy and America s most eccentric mogul spent six years and nearly a billion dollars to steal the nuclear armed Soviet submarine K 129 after it had sunk to the bottom of the Pacific Ocean all while the Russians were watching In the early hours of February 25 1968 a Russian submarine armed with three nuclear ballistic missiles set sail from its base in Siberia on a routine combat patrol to Hawaii Then it vanished As the Soviet Navy searched in vain for the lost vessel a small highly classified American operation using sophisticated deep sea spy equipment found it wrecked on the sea floor at a depth of 16 800 feet far beyond the capabilities of any salvage that existed But the potential intelligence assets onboard the ship the nuclear warheads battle orders and cryptological machines justified going to extreme lengths to find a way to raise the submarine So began Project Azorian a top secret mission that took six years cost an estimated 800 million and would become the largest and most daring covert operation in CIA history After the U S Navy declared retrieving the sub impossible the mission fell to the CIA s burgeoning Directorate of Science and Technology the little known division responsible for the legendary U 2 and SR 71 Blackbird spy planes Working with Global Marine Systems the country s foremost maker of exotic deep sea drilling vessels the CIA commissioned the most expensive ship ever built and told the world that it belonged to the reclusive billionaire Howard Hughes who would use the mammoth ship to mine rare minerals from the ocean floor In reality a complex network of spies scientists and politicians attempted a project even crazier than Hughes s reputation raising the sub directly under the watchful eyes of the Russians Cork Boat John

Pollack,2005-04-12 165 321 corks 1 boat Most people have childhood dreams few ever pursue them At the age of 34 John Pollack quit a prestigious speechwriting job on Capitol Hill to pursue an idea he had harbored since the age of six to build a boat out of wine corks and take it on an epic journey In Cork Boat Pollack tells the charming and uplifting story of this

unlikely adventure Overcoming one obstacle after another he convinces skeptical bartenders to save corks corrals a brilliant but disorganized partner and cajoles more than a hundred volunteers to help build the boat many until their fingers bleed
Hired as a speechwriter for President Clinton midway through construction Pollack soon has the White House saving corks too Ultimately he and his crew set sail down the Douro River in Portugal where the boat becomes a national sensation
Written with unusual grace and disarming humor Cork Boat is a buoyant tale of camaraderie determination and the power of imagination **Marine Engineer and Motorship Builder** ,1907 **Hearings** United States. Walker,2010-05-05 In the past three centuries the ship has developed from the relatively unsophisticated sail driven vessel which would have been familiar to the sailors of the Tudor navy to the huge motor driven container ships nuclear submarines and vast cruise liners that ply our seas today Who were the innovators and builders who during that span of time prompted and instigated the most significant advances In the past three centuries the ship has developed from the relatively unsophisticated sail driven vessel which would have been familiar to the sailors of the Tudor navy to the huge motor driven container ships nuclear submarines and vast cruise liners that ply our seas today Who were the innovators and builders who during that span of time prompted and instigated the most significant advances In this new book the author describes the lives and deeds of more the 120 great engineers scientists philosophers businessmen shipwrights naval architects and inventors who shaped ship design and shipbuilding world wide Covering the story chronologically and going back briefly even to Archimedes such well known names as Anthony Deane Peter the Great James Watt Robert Fulton and Isambard Kingdom Brunel share space with lesser known characters like the luckless Frederic Sauvage a pioneer of screw propulsion who unable to interest the French navy in his tests in the early 1830s was bankrupted and landed in debtors prison With the inclusion of such names as Ben Lexcen the Australian yacht designer who developed the controversial winged keel for the 1983 Americas Cup the story is brought right up to date Concise linking chapters place all these innovators in context so that a clear and fascinating history of the development of ships and shipbuilding emerges from the pages An original and important new reference book Journal of the Royal Institute of British Architects Royal Institute of British Architects,1918 **Marine Simulation and Ship Manoeuvrability** M.S. Chislett,1996-01-01 Real time interactive ship simulators limped onto the scene in the wake of flight simulators some years ago The maritime industries have a long history of conservatism but this is now changing rapidly The information age has also swept over ships and shipping and has been taken to heart to such an extent that for example flight simulators now cooperate with ship simulators and import useful new concepts and methodologies The more than 50 papers contained in this book show what and why Although traditionally conservative the marine world is also traditionally international and this has not changed The papers in the book are by leading authors from all over the world and provide a detailed snap shot of the rapidly advancing state of

the art together with pointers to the future The overall theme of MARSIM 96 and therefore also of this book is Vessel manoeuvrability and marine simulation research training and assessment and includes original papers on topics such as bridge resource management distant learning and simulators coupled via The Internet virtual reality neural networks rudder propeller hydrodynamics prime mover models squat in shallow water and many more **The Law Times Reports** ,1919
