Operation Evangeline:

The Aetherian Gambit Harrison Blackwood, The brass gears of the Celestial Observatory clicked in perfect rhythm as Professor Evangeline Thorne adjusted the massive telescope s focus Steam hissed from the intricate network of pipes that powered the complex mechanism sending wisps of vapor into the cool evening air above New Londinium Through the eyepiece she could see the approaching airship fleet their copper hulls gleaming in the gaslight that illuminated the city s towering spires They re early she murmured her gloved fingers tracing the calculations she had made across the leather bound logbook The Meridian Trading Company s vessels weren t supposed to arrive until dawn yet here they were cutting through the night sky like mechanical leviathans Behind her the heavy oak door to the observatory creaked open and the familiar sound of mechanical footsteps announced the arrival of her assistant Cogsworth The brass automaton s optical sensors whirred as they focused on Evangeline s position at the telescope Professor Thorne Cogsworth s voice resonated with the perfect diction that only the finest steam powered vocal apparatus could produce there has been a development regarding the copper shipments you ve been monitoring Evangeline straightened her emerald eyes reflecting the amber glow of the gas lamps that lined the observatory s walls At twenty eight she had already earned a reputation as one of the most brilliant strategic minds in the Aetherian Empire though her unconventional methods often raised eyebrows among her more traditional colleagues at the Royal Academy of Sciences What kind of development she asked stepping away from the telescope and pulling her burgundy coat tighter against the evening chill

Board, 1962 Brass and Bone Cordelia Ashworth, The copper pipes hissed with escaping steam as Evangeline Hartwell tightened the final brass fitting on the atmospheric pressure regulator Her workshop tucked beneath the cobblestone streets of New Victorium thrummed with the steady rhythm of clockwork mechanisms and the gentle whoosh of pneumatic tubes Oil stains marked her leather apron like badges of honor and her auburn hair escaped from its careful morning arrangement framed her face in wayward curls that caught the amber light of gas lamps There she murmured wiping her hands on a cloth already stained beyond redemption That should maintain proper pressure for the hydraulic lift system The device before her was her latest commission a revolutionary elevator mechanism for the newly constructed Meridian Tower which would soon stand as the tallest building in the district Unlike the crude steam powered lifts that dominated the city s architecture Evangeline s design utilized a sophisticated network of weighted counterbalances and pressurized chambers that could transport passengers smoothly between floors without the jerky unpredictable movements that left riders queasy and architects nervous A sharp rap echoed through the workshop followed by the distinctive three pause two pattern that indicated an official visitor Evangeline frowned glancing toward the heavy oak door that separated her sanctuary from the bustling street above Government inspectors rarely visited at this hour and she had already filed all the necessary permits for her current projects **Federal Energy Regulatory Commission Reports** United States.
