Opposing Self:

The Opposing Self Lionel Trilling, 1955 **The New York Intellectuals Reader** Neil Jumonville, 2007 In the early 1930s in a small alcove at City College in New York a group of young passionate and politically radical students argued for hours about the finer points of Marxist doctrine the true nature of socialism and whether or not Stalin or Trotsky was the true heir to Lenin These young intellectuals went on to write for and found some of the most well known political and literary journals of the 20th century such as *The Masses* *Politics* *Partisan Review* *Encounter* *Commentary* *Dissent* and *The Public Interest* Figures such as Daniel Bell Nathan Glazer Sidney Hook Susan Sontag Dwight MacDonald and Seymour Lipset penned some of the most important books of social science in the mid twentieth century They believed above all else in the importance of argument and the power of the pen They were a vibrant group of engaged political thinkers and writers but most importantly they were public intellectuals committed to addressing the most important political social and cultural questions of the day Here with helpful head notes and a comprehensive introduction by Neil Jumonville *The New York Intellectuals Reader* brings the work of these thinkers back into conversation **Reading America** Denis Donoghue, 1988-01-01 Here is a selection by the distinguished critic of his essays and commentaries on American writing and writers from Emerson and Whitman through Auden and Ashbery Denis Donoghue examines the canon in the light of what he takes to be the central dynamic of the American enterprise the imperatives of a powerful national past versus the subversions of an irrevocably anarchic spirit

The Web of Violence Jennifer E. Turpin, Lester R. Kurtz, 1997 An excellent representation of the interdisciplinary thrust of peace studies Paul Joseph Tufts University Violence is a topic of concern everywhere in the media in churches in the halls of governments In every land and in every culture violence is considered by most to be taboo a last resort Yet under certain conditions from the level of the family to the level of nations violence is used as a mechanism of social control Various rationalizations thus emerge to distinguish between legitimate and illegitimate violence *The Web of Violence* explores the interrelationship among personal collective national and global levels of violence This unique collection brings together a number of internationally known contributors to address the genesis and manifestations of violence in the search for a remedy for this confounding social problem As the global community becomes more intimate we must better understand the nature of violence *The Web of Violence* supports this aim by examining the dangerous human phenomenon from many perspectives at different levels and using multiple methodologies CONTRIBUTORS Robert Jay Lifton Christopher G Ellison John P Bartkowski Yuan Horng Chu Philip Smith Robert Elias Birgit Brock Utne Riane Eisler Johan Galtung *Meeting the Shadow* Connie Zweig, PhD, Jeremiah Abrams, 2020-07-07 One does not become enlightened by imagining figures of light but by making the darkness conscious C G Jung Cheating lying jealousy blaming greed shame These forbidden feelings and behaviors erupt from the dark denied part of ourselves the personal shadow But they erupt with a purpose They are trying to tell us their secrets *Meeting the Shadow* is a landmark collection of 65 wide ranging essays by thought leaders including Carl

Jung Joseph Campbell Ken Wilber James Hillman Susan Griffin Harville Hendrix on the dark side of human nature as it appears in families intimate relationships sexuality work spirituality politics therapy and creativity It presents tools for shadow work that enable us to make a conscious relationship with the shadow defuse negative emotions release guilt and shame achieve a genuine self acceptance and heal our relationships Although we think of the shadow as containing only darkness as Jung stated its essence is pure gold Social Development Marion K. Jon Mills, 2012-02-01 Offering the first comprehensive examination of Hegel's theory of the unconscious abyss Jon Mills rectifies a much neglected area of Hegel scholarship Mills shows that the unconscious is the foundation for conscious and self-conscious life and is responsible for the normative and pathological forces that fuel psychic development In addition Mills illustrates how Hegel's idea of the unconscious abyss transcends his time and is a pivotal concept to his entire philosophical system one that advances the current understanding of the psychoanalytic mind *American Theorists of the Novel* Peter Rawlings, 2007-01-24 The American theorists Henry James Lionel Trilling and Wayne C Booth have revolutionized our understanding of narrative and have each championed the novel as an art form Concepts from their work have become part of the fabric of novel criticism today influencing theorists authors and readers alike Emphasizing the crucial relationship between the works of these three critics Peter Rawlings explores their understanding of the novel form and investigates their ideas on realism and representation authors and narration point of view and centres of consciousness readers reading and interpretation moral intelligence Rawlings demonstrates the importance of James Trilling and Booth for contemporary literary theory and clearly introduces critical concepts that underlie any study of narrative *American Theorists of the Novel* is invaluable reading for anyone with an interest in American critical theory or the genre of the novel **The Conservative**

Turn Michael Kimmage, 2009-07-31 The Conservative Turn tells the story of postwar America's political evolution through two fascinating figures Lionel Trilling and Whittaker Chambers who went on to intellectual prominence sharing the questions crises and challenges of their generation Kimmage argues that the divergent careers of these two men exemplify important developments in postwar American politics the emergence of modern conservatism and the rise of moderate liberalism

Logics of Genocide Anne O'Byrne, Martin Shuster, 2020-05-27. This book is concerned with the connection between the formal structure of agency and the formal structure of genocide. The contributors employ philosophical approaches to explore the idea of genocidal violence as a structural element in the world. Do mechanisms or structures in nation states produce types of national citizens that are more susceptible to genocidal projects? There are powerful arguments within philosophy that in order to be the subjects of our own lives, we must constitute ourselves specifically as national subjects and organize ourselves into nation states. Additionally, there are other genocidal structures of human society that spill beyond historically limited episodes. The chapters in this volume address the significance, moral, ethical, political, of the fact that our very form of agency suggests or requires these structures. The contributors touch on topics including birthright citizenship, contemporary mass incarceration, anti-black racism, and late capitalism. *Logics of Genocide* will be of interest to scholars and advanced students working in philosophy, critical theory, genocide studies, Holocaust and Jewish studies, history, and anthropology.

The After Hours David W. Plath, 2023-11-15 This book explores how modernization has influenced Japan especially in terms of its people's quest for enjoyment and leisure within the context of their industrialized and democratic society The author describes Japan not as an exotic or mysterious culture but as a cultural opposing self that provides a contrasting perspective on the human condition shaped by industrialization and democracy Unlike Western societies where terms like alienation and mass leisure have defined social challenges Japan's unique approach to modernization invites a fresh examination of how people engage in enjoyment beyond mere work In modern Japan the pursuit of enjoyment is not defined by rigid Western ideals of pursuit of happiness or hedonism Instead Japanese culture has its own nuanced relationship with leisure which the author terms the search for enjoyment This concept encompasses not just leisure but the broader desire for well being and fulfillment in life which may differ significantly from Western interpretations Japanese culture according to the author resists Western biases that view leisure merely as a break from work instead it integrates work and enjoyment allowing for a fluid transition between the two Through an ethnographic approach combining field observations surveys and popular media the book provides a comprehensive look at Japanese life particularly outside of traditional work hours The after hours are more than just periods of rest they serve as a reflection of Japanese identity and values in a modernized world capturing the ways people seek balance leisure and cultural fulfillment The author's perspective is both empathetic and critical acknowledging Japan's unique synthesis of modernity while examining how the quest for enjoyment differs from Western models Ultimately the book argues that Japan's modern journey offers valuable insights for Western readers seeking to understand how non Western societies approach the challenges of industrialized living enjoyment and identity within a globalized context This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1964

The Objective Society Everett Knight,2022-03-07 First published in 1959 The Objective Society elaborates that any objective society has two functions to transmit a cultural heritage through education and to think for that great majority of men who have no access to the stores of information upon which thought must feed if it is to live However it has long ceased to do either of these things The masses of the people are indifferent to culture as it is understood in the universities and academics do not think they gather and catalogue facts Any attempt to use the facts to some practical end or more generally to organize them into an ideology which might restore to our civilisation a purpose and a direction is considered an offence to objectivity This book indicates the path that must be taken to avoid complete cultural stagnation Explicating on themes resonant with the current socio political climate this book will be an interesting read for students of philosophy and literature
