Religious Fundamentalism in the Contemporary World

Santosh C. Saha, 2004-01-01 Today new and ever more pernicious forms of terrorist violence threaten the world Because these new forms of violence are so often linked to religious radicalism modern terrorism has challenged the secular ethics of contemporary civil society There is a pressing need to understand modern religious movements that have added militancy and belligerence as fundamental elements of religious practice Contributors to this volume painstakingly tackle the question of how to define the contours of current religious fundamentalism as they examine the private and public postures of fundamentalist rhetoric the importance of its regional variants and the damage it can do to regional and national education systems Their analysis tracks trends in religious movements that aspire to radicalize reform and violently topple governments and nations while highlighting the difference between fundamentalist interpretations and other longstanding juridical political and intellectual traditions

Islamic Leviathan

Seyyed Vali Reza Nasr, 2001-09-13 Islamization is commonly seen as the work of Islamist movements who have forced their ideology on ruling regimes and other hapless social actors There is little doubt that ruling regimes and disparate social and political actors alike are pushed in the direction of Islamic politics by Islamist forces However Islamist activism and its revolutionary and utopian rhetoric only partly explain this trend Here Nasr argues that the state itself plays a key role in embedding Islam in the politics of Muslim countries Focusing on Malaysia and Pakistan Nasr argues that the turn to Islam is a facet of the state s drive to establish hegemony over society and expand its powers and control

International Security and the United States Paul Bellamy, Karl DeRouen Jr., 2007-12-30 Shaped by often very dramatic events international security and the international system have changed significantly in recent years The conclusion of the Cold War the emergence of new political systems the growth of significant threats such as terrorism and the development of new security doctrines have driven global transformation These volumes provide detailed information on countries from every geographic region and continent on the globe evaluating their relationship with the United States and measuring the potential security threats posed by each The contributors consider factors such as geography and history the political systems of each state their human rights records the ability to maintain law and order and provide security within their own borders the impact of current administrations rulers or regimes on a nation s foreign policy and the regional factors that often dictate local politics in order to make their assessments All of the entries in this set follow a standardized outline and present a concise but detailed assessment of each country Each entry begins with a discussion of geography through which the contributors identify the state s natural resources environmental issues and the extent of its territorial jurisdiction The focus then shifts to social and political organizations Populations are broken down by not only numbers but by ethnic and religious affiliations access to health care education housing and income All of those aspects are often a reflection of the system of government in place Like the United States those governments are comprised of different parties or leaders with various interests The contributors assess those entities and interests within each country They measure the ways in which factors of religion nationalism and globalism impact and shape not only domestic policies but also foreign policy and ultimately the country s relationship to the United States Other areas such as military organizations and activities records on human rights and justice recognition of and adherence to international conventions and national attitudes towards security are also considered Every entry also includes an assessment of current and potential security issues and an analysis of current terrorist threats that may already be in place or that are beginning to develop in various nations Each entry concludes with a summary of current relationships with the United States Those relationships are defined by the identification and brief analysis of

formal trade aid or military treaties in place between the United States and other nations the general attitude of a nation's citizenry and its government towards the U S and finally identifying any social and cultural links between nations and the U S migration patterns language economies Finally possible changes and trends that will impact security issues are identified by the contributors Taken in their entirety these encyclopedias contain a wealth of information in a concise format that will serve as a valuable reference guide not only for specialists but general readers as well Civil Society and Pakistan's Economy Fayyaz Baqir, 2023-03-17 This book analyses the paradoxes of Pakistan's economy meritocratic domestic policy and the role of the state and the civil society It argues that the transition in the country's foreign policy from geo politics to geo economic depends on a fundamental domestic policy transition from kleptocracy to meritocracy Civil Society and Pakistan's Economy discusses how the prevalence of rent seeking practices has undermined merit based practices by increasing the cost of doing business and converting public loss into private profit by awarding inappropriate subsidies and imposing regressive taxes The analyses are supported by describing the instruments and mechanisms used for rent seeking practices and the creation of public awareness of options available to change these practices through citizen's action and civil society engagement The book also shows the path of transformation and the role of participation and argues that aspiring for and capturing power is not the only way to transform Pakistan A novel analysis depicting macro micro linkages of encroachment of socio economic space by the power elites and effective strategies used for its reappropriation by the people the book will be of interest to academics researching South Asian Studies in particular South Asian economics and politics
