International Development Cooperation Today Patrick Develtere, Huib Huyse, Jan Van Ongevalle, 2021-04-14 Over the past 60 years high income countries have invested over 4000 billion euros in development aid With varying degrees of success these investments in low income countries contributed to tackling structural problems such as access to water health care and education Today however international development cooperation is no longer restricted to helping by giving Instead it is rather about opportunities mutual interests risk taking and an inclusive societal approach With the arrival of major new actors such as China India and Brazil and the manifestation of private companies and foundations like the Bill and Melinda Gates Foundation development aid is being eclipsed by new forms of international cooperation increasingly accompanied by investments trade and give and take exchanges The agenda for sustainable development adopted by all United Nations Member States in 2015 and to be realised by 2030 is a case in point of new influential frameworks that usher in a global rather than a traditional North South perspective This book reviews 60 years of international development aid and its relevant actors outlining today's challenges and opportunities Richly illustrated with case studies and examples

International Development Cooperation Today maps successes and failures and synthesises visions and discussions from all over the world By pointing out the radical shift from the traditional North South perspective to a global paradigm this book is essential reading for all practitioners academics and donors involved in development aid

The Business of Development in Post-Colonial Africa Véronique Dimier, Sarah Stockwell, 2021-03-13 This collection brings together a range of case studies by both established and early career scholars to

consider the nexus between business and development in post colonial Africa A number of contributors examine the involvement of European companies most notably those of former colonial powers in development in various African states at the end of empire and in the early post colonial era They explore how businesses were not just challenged by the new international landscape but benefited from the opportunities it offered particularly those provided by development aid Other contributors focus on the development agencies of the departing colonial powers to consider how far these served to promote the interests of European companies Together these case studies constitute an important contribution to our understanding of both business and development in post colonial Africa redressing an imbalance in existing histories of both business and development which focus predominantly on the colonial period This volume breaks new ground as one of the very first to bring the study of foreign companies and development aid into the same frame of analysis

Japan's Foreign Aid to Africa Pedro Amakasu Raposo,2013-09-05 The Tokyo International Conference on African Development TICAD was established in 1993 with the intention of creating opportunities for trade and investment on both sides and the promotion of sustainable development In 2003 the conference translated Japanese aid policy to Africa into three key pillars human centered development poverty reduction through economic growth and the consolidation of peace and since 2005 Africa has on several occasions been the largest recipient of Japanese overseas aid Tracing Japanese foreign aid to Africa during and after the Cold War this book examines how the TICAD process sits at the intersection of international relations and domestic decision making Indeed it questions whether the increase in aid has been driven by domestic changes such as demands from civil society and donor interest or pressures emanating from the international system Taking Angola and Mozambique as case studies the book explores how Japan s development cooperation with Africa has assisted previously war torn states make the transition from war to peace and in doing so demonstrates the centrality of human security to Japanese foreign policy as a means of ensuring sustainable development This book will have great interdisciplinary appeal to students and scholars of Japanese and African studies Japanese politics international relations theory foreign policy economic development and sustainable development

Shaping the International Relations of the Netherlands, 1815-2000 Ruud van Dijk,Samuël Kruizinga,Vincent Kuitenbrouwer,Rimko van der Maar,2018-02-28 This

book seeks to launch a new research agenda for the historiography of Dutch foreign relations during the nineteenth and twentieth centuries. It does so in two important ways. First, it broadens the analytical perspective to include a variety of non-state actors beyond politicians and diplomats. Second, it focuses on the transnational connections that shaped the foreign relations of the Netherlands, emphasizing the effects of post-colonialism and internationalism. Furthermore, this essay collection highlights not only the key roles played by Dutch actors on the international scene but also serves as an important point of comparison for the activities of their counterparts in other small states.

The UN and Development Olav Stokke, 2009-07-06. The UN and Development provides the first comprehensive overview of the development policies and activities of the United Nations system from the late 1940s to the present. With an explicit focus on the history of the ideas that have been generated, institutionalized and implemented by UN organizations, this book examines changing trends in development paradigms from the concept of technical assistance to underdeveloped countries as they were called in the late 1940s to development cooperation in the 21st century. Olav Stokke traces this fascinating story and demonstrates the UN's essential role and its future challenges in aiding the least developed countries and the globe's billion poorest inhabitants.

New Europe's New Development Aid Balázs Szent-Iványi, Simon Lightfoot, 2015-04-17. This book examines the international development policies of five East Central European new EU member states: the Czech Republic, Hungary, Poland, Slovakia, and Slovenia. These countries turned from being aid recipients to donors after the turn of the millennium in the run-up to EU accession in 2004. The book explains the evolution subsequent to EU accession and current state of foreign aid policies in the region and the reasons why these deviate from many of the internationally agreed best practices in development cooperation. It argues that after the turn of the millennium a Global Consensus has emerged on how to make foreign aid more effective for development. A comparison between the elements of the Global Consensus and the performance of the five countries reveals that while they have generally implemented little of these recommendations, there are also emerging differences between the countries with the Czech Republic and Slovenia clearly aspiring to become globally responsible donors. Building on the literatures on foreign policy analysis, international socialization, and interest group influence, the book develops a model of foreign aid policy making in order to explain the general reluctance of the five countries in implementing international best practices and also the differences in their relative performance.

Aid and Technical Cooperation as a Foreign Policy Tool for Emerging Donors Déborah Barros Leal Farias, 2018-06-13. The question of why countries give aid and assistance to other countries has long been a topic of debate: is it altruism or selfishness? The assumption is sometimes made that donors from developing countries might be more motivated by altruism than traditional western donors. This book demonstrates that on the contrary, the provision of development assistance can be used to serve national interests, allowing so-called emerging donors to gain soft power in the international sphere by improving their image and global influence. Technical cooperation or the transfer of knowledge is an area of particular interest as it can enable

donors to position themselves as a global leader in a given field with a unique set of skills and expertise in a knowledge area. This book uses the Brazilian case to demonstrate how a country such as Brazil can seek power and influence by providing no strings attached technical assistance. The empirical analysis unpicks the motivations behind development assistance and how it can be used as a foreign policy tool. In doing so, the book sheds light upon the similarities and variations in the provision of technical cooperation as a foreign policy tool by China, India, and Brazil. This book will be of interest to researchers of International Development, South-South Cooperation, International Relations, and those working on Brazil specifically.

The Politics of Aid Selectivity Wil Hout, 2007-06-28. The first extended analysis of selectivity policies of important bilateral and multilateral aid donors, this book combines a policy analytical with a quantitative empirical approach. Bringing out the conflicts that may exist between foreign assistance agendas and the desire of governments in developing countries to set priorities for their national development.

Rights and Riches Kjetil Fretheim, 2008. Development aid has recently become an important part of international politics in general and Norwegian foreign policy in particular. This study explores the moral discourse of contemporary Norwegian development aid organisations and professional development workers. Adopting a discourse analytical and multi-disciplinary approach, key concepts such as human rights, charity, justice, and compassion are discussed. Furthermore, the notions of professionalism and partnerships in development are addressed, as well as the role and life style of the individual development worker. The following development agencies have been analysed: Norwegian Ministry of Foreign Affairs, Norwegian Church Aid, Save the Children Norway, and Norwegian People's Aid. Twenty-three staff members and representatives of these organisations have been interviewed.

The Despot's Guide to Wealth Management J. C. Sharman, 2017-03-07. An unprecedented new international moral and legal rule forbids one state from hosting money stolen by the leaders of another state. The aim is to counter grand corruption or kleptocracy rule by thieves when leaders of poorer countries such as Marcos in the Philippines, Mobutu in the Congo, and more recently those overthrown in revolutions in the Arab world and Ukraine, loot billions of dollars at the expense of their own citizens. This money tends to end up hosted in rich countries. These host states now have a duty to block, trace, freeze, and seize these illicit funds and hand them back to the countries from which they were stolen. In *The Despot's Guide to Wealth Management*, J. C. Sharman asks how this anti-kleptocracy regime came about, how well it is working, and how it could work better. Although there have been some real achievements, the international campaign against grand corruption has run into major obstacles. The vested interests of banks, lawyers, and even law enforcement often favor turning a blind eye to foreign corruption proceeds. Recovering and returning looted assets is a long, complicated, and expensive process. Sharman used a private investigator, participated in, and observed anti-corruption policy and conducted more than a hundred interviews with key players. He also draws on various journalistic exposés, whistle-blower accounts, and government investigations to inform his comparison of the anti-kleptocracy records of the United States, Britain, Switzerland, and Australia. Sharman calls for better policing, preventative measures, and use of

gatekeepers like bankers lawyers and real estate agents He also recommends giving nongovernmental organizations and for profit firms more scope to independently investigate corruption and seize stolen assets European Civil Society and International Development Aid Balázs Szent-Iványi, 2022-10-26 This book explains how and why European non governmental development organisations NGDOs engage in advocacy towards the European Union EU It analyses the heterogenous structure of the sector with examples ranging from large multinational networks to essentially single person NGDOs The book provides a detailed map of the topics which have featured in NGDO advocacy since 2006 arguing that NGDOs have generally been reactive in their advocacy towards the EU The author explains how they have contested a number of policy issues on the agendas of the EU institutions especially around the diversion of aid to manage migration and leverage private sector investments Furthermore some NGDOs have used the COVID 19 pandemic as an opportunity to re package their pre existing policy demands Based on an analytical framework focused around three variables namely moral vision funding concerns and the need to build maintain a good reputation the book explains these advocacy choices and argues that much of NGDO advocacy seems to be consistent with funding motivations The author highlights the importance of moral vision and reputational concerns in moderating how far NGDOs will go with funding driven advocacy arguing that motivations need to be looked at in their complexity and within the specific policy context Drawing on a range of quantitative and qualitative data sets to provide a rich and varied picture of the advocacy work of European development NGOs European Civil Society and International Development Aid is a key reference for researchers and practitioners working in the field The European Union and Humanitarian Crises Francesca Pusterla, 2016-03-09 Over the last few decades international organisations national governments and governmental and private actors have all multiplied their efforts to limit the extent to which natural catastrophes man made atrocities and political and economic breakdowns affect civil populations The European Union and Humanitarian Crises Patterns of Intervention addresses the allocation of foreign aid within the framework of the European Union s Humanitarian Aid policy and analyses different Member States intervention strategies designed to cope with these emergencies Joining the debate about bilateral and multilateral allocation of foreign aid in crisis situations and exploring the cooperative actions undertaken by the European Union and its Member States to cope with them the book questions how the context of the crises themselves impacts on strategies of intervention and investigates how strategies change depending on the characteristics of the crisis
