Horse Aid challenges the idea of Western capacity building particularly the notion that introduced technologies related to food production are essential ingredients for sustainable livelihoods among farmers Walsh argues that the well intentioned organizations working in Jalq a communities paid insufficient attention to longstanding knowledge that has supported human survival in regions where the natural world has the upper hand Walsh goes beyond a critical review of misguided aid to offer reflections on the relationship between indigenous knowledge and resilience theory the hopeful future of development assistance and the contradictions in her own hybrid role as researcher and development practitioner In light of growing global concern over the worsening food crisis and interconnected climate extremes Trojan Horse Aid offers an important critique of development practices that undermine peasant strategies as well as suggestions for more effective approaches for the future

**Virtualism, Governance and Practice** James G. Carrier, Paige West, 2009 Many scholars who examine large scale environmentalist organisations highlight the knowledge power and governance that underlie organisations policies and projects as virtualising efforts to bring the world into conformity with their environmentalist thought and vision This important collection reveals how the concerns of those critics are justified on one level but not on another The contributors not only examine how environmental organisations seek this world of conformity but also show how these organisations are constrained in their ability to achieve their goals The collection argues that the critics concern with knowledge power governance and virtualism seems justified when we look at those organisations environmentalist visions policies and programs However they are much less justified when we look at the practical operation of such organisations and their ability to generate and carry out projects intended to reshape the world Book Jacket [PLA Notes 24: Critical Reflections from Practice](#) ,

**Organizing Innovation** Marcel Veenswijk, 2006 New Public Management as an administrative reform ideology as well as conceptual innovation has changed the outlook of public administration during the last ten years Public administration and public administration reform should not only be concerned with the improvement of the efficiency and coherence which play an important role in public administration but also political values like liberty equity and security as well as legal values like the rule of the law The modernization agenda of public administration has a rather internal focus while the ultimate test for the modernization of public administration is the way in which governments are able to respond to changing social cultural and economic conditions and the wicked policy problems which result from them This publication contains interesting contributions to the science and practice of public administration *Imagining Transgender* David Valentine, 2007-08-30 An ethnography in which the author s fieldwork with transgendered and transsexual individuals in New York City demonstrates the creation and confusion of gender identity labels
