Louis Kahn Carter Wiseman, 2020-11-10 The man who envisioned and realized such landmark buildings as the Salk Institute the Kimbell Art Museum and the National Assembly complex in Bangladesh Louis

Kahn was born in what is now Estonia immigrated to America and became one of the towering figures in his adopted country's built world. His works are unmistakable in their elegance, monolithic power, and architectural honesty. Written by Carter Wiseman, one of Kahn's most respected commentators, this book offers a succinct, accessible examination of the life and work of one of America's greatest architects. It traces the influence of his immigrant origins, his upbringing in poverty, his education, the impact of the Great Depression, and the arrival of Modernism on his life and work. Finally, it provides insight into why, as the legacy of many of his contemporaries has receded in importance, Kahn's has remained so durably influential. Louis Kahn: A Life in Architecture provides the best concise introduction available to this singular life and achievement. **The**

Architecture of Bathing Christie Pearson, 2020-10-06. A celebration of communal bathing: swimming pools, saunas, beaches, ritual baths, sweat lodges, and more, viewed through the lens of architecture and landscape. We enter the public pool, the sauna, or the beach with a heightened awareness of our bodies and the bodies of others. The phenomenology of bathing opens all of our senses toward the physical world, entwined with the social, while the history of bathing is one of shared space in both natural and built environments. In *The Architecture of Bathing*, Christie Pearson offers a unique examination of communal bathing and its history from the perspective of architecture and landscape. Engagingly written and richly illustrated with more than 260 illustrations, many in color, *The Architecture of Bathing* offers a celebration of spaces in which public and private, sacred and profane, ritual and habitual, pure and impure, nature and culture commingle. Pearson takes a wide-ranging view of her subject, drawing on architecture, art, and literary works. Each chapter is structured around an architectural typology and explores an accompanying theme, for example, tub, sensuality, river flow, waterfall, rejuvenation, and banya immersion. Offering examples, introducing relevant theory, and recounting personal experiences, Pearson effortlessly combines a practitioner's zest with astonishing erudition. As she examines these forms, we see that they are inextricable from landscapes, bodily practices, and cultural production. Looking more closely, we experience architecture itself as an immersive material and social space embedded in the interdependent environmental and cultural fabric of our world. *Women of Steel*

and Stone Anna Lewis, 2014-01-01. What caused a few women to counter the trends and choose these professions? What difficulties did they face in fields so new to them? And did the influences that marked their early histories reveal themselves in their work and careers? Anna Lewis's book raises these questions central for young people considering the future. Denise Scott Brown, cofounder of Venturi, Scott Brown, and Associates, *Women of Steel and Stone* tells the stories of 22 determined women who helped build the world we live in. Thoroughly researched and engaging profiles describe these builders and designers, strengths, passions, and interests as they were growing up, where those traits took them, and what they achieved. Inspiring a new generation of girls who are increasingly encouraged to engage in STEM (Science, Technology, Engineering, Math) education and professions, the biographies stress work, perseverance, creativity, and overcoming challenges and obstacles. Set against the backdrop of landmark events such as the women's suffrage movement, the civil rights movement, the

industrial revolution and more the profiles offer not only important historical context but also a look at some of the celebrated architects and engineers working today Sidebars on related topics source notes and a bibliography make this an invaluable resource for further study Anna M Lewis is an award winning toy inventor and creativity advocate Her company Ideasplash promotes child creativity through her writing websites and classes and presentations in schools She has contributed to Appleseeds Odyssey and Toy Design Monthly and currently teaches for Young Rembrandts an afterschool art program as well as classes on cartooning game design arts and crafts monster making and painting

Grace and Gravity Lars Spuybroek, 2020-11-26 How do we live well The first sentence of *Grace and Gravity* raises the fundamental question that constantly occupies our minds and of all those who lived before us Paradoxically the impossibility of answering this question opens up the very room needed to find ways of living well It is the gap where all disciplines fall short where architecture does not fit its inhabitants where economy is not based on shortage where religion cannot be explained by its followers and where technology works far beyond its own principles According to Lars Spuybroek the prize winning former architect this marks the point where the paradoxical machine of grace reveals its powers a point where we cannot say if we are moving or being moved Following the trail of grace leads him to a new form of analysis that transcends the age old opposition between appearances and technology Linking up a dazzling and often delightful variety of sources monkeys paintings lamp posts octopuses tattoos bleeding fingers rose windows robots smart phones spirits saints and fossils with profound meditations on living death consciousness and existence *Grace and Gravity* offers an eye opening provocation to a wide range of art historians architects theologians anthropologists artists media theorists and philosophers
