Boyd,2017-03-02 This book brings together philosophical and theological perspectives on agapistic love The aim of the text is to illuminate the nature of unlimited love by distinct and integrative approaches to the intersection of the divine and the human Various scientific approaches to human forms of love seem to shed light on our nature as social beings But to what extent are the natural desires for affection sexual love and friendship augmented revised perfected or replaced by the gift of grace In other words we can ask how is it that agap modifies or shapes the natural loves Diverse theological and moral traditions address the question in quite startling contrast Thomists follow the dictum that Grace does not destroy nature but perfects it Lutherans draw a sharp contrast between law and Gospel while Wesleyans see charity as the sanctifying power of the Holy Spirit Some feminist theorists see the idea of self giving love as contrary to genuine self fulfilment while the neo

Kantians see love as a duty to others and some Kierkegaardians see the command to love as an unusual manifestation of divine command ethics. These diverse approaches in light of contemporary research in the natural and social sciences can provide fertile ground for the exploration of the intersection of human and divine love. To date there is no text available that brings scholars from various theological and philosophical backgrounds together to engage in interdisciplinary dialogue on this important and much neglected aspect of research into the human and divine loves. This book offers a significant attempt to remedy the situation.

The Film Daily Year Book of Motion Pictures, 1938 **A Classical Response to Relational Theism** Brian J. Orr, 2022-02-17

The classical doctrine of God expresses that the God of the Bible is triune: a self-simple, immutable, impassible, eternal, and the sovereign Lord over his creation which he created from himself. Modern streams of theology within the evangelical circle continue to promote a doctrine of God that sharply contrasts the classical view, the traditional view of God in Christian theism. Therefore, a critical response to such a theology is needed. This study is a comprehensive analysis and sustained critique of Thomas Jay Oord's open relational doctrine of God. Oord's model substitutes process metaphysics for classical metaphysics while attempting to retain foundational Christian doctrines that were established within a classical metaphysical framework.

Dating and Interpersonal Relationships Nicolae Sfetcu, 2014-05-01

An introduction to interpersonal relationship methods, advice, and tips for friendship, dating, and online dating, intimate relationship, love, and kiss, flirting, seduction, romance, marriage, and wedding. Interpersonal relationships are social associations, connections, or affiliations between two or more people. They vary in differing levels of intimacy and sharing, implying the discovery or establishment of common ground and may be centered around something shared in common. The study of relationships is of concern to sociology, psychology, and anthropology. Dating is a form of courtship consisting of social activities done by two persons with the aim of each assessing the other's suitability as a partner in an intimate relationship or as a spouse.

International Motion Picture Almanac, 1939 Defining Love Thomas Jay Oord, 2010-06-01

Some scientific studies suggest that human beings are innately selfish and that Christian virtues like self-sacrifice are a delusion. In this intriguing volume, esteemed theologian Thomas Jay Oord interprets the scientific research and responds from a theological and philosophical standpoint, providing a state-of-the-art overview of love and altruism studies. He offers a definition of love that is scientifically, theologically, and philosophically adequate. As Oord helps readers arrive at a clearer understanding of the definition, recipients, and forms of love, he mounts a case for Christian agape and ultimately for a loving God.

Theology and the Science of Moral Action James A. Van Slyke, Gregory Peterson, Warren S. Brown, Kevin S. Reimer, Michael Spezio, 2012-11-12

The past decade has witnessed a renaissance in scientific approaches to the study of morality. Once understood to be the domain of moral psychology, the newer approach to morality is largely interdisciplinary, driven in no small part by developments in behavioural economics and evolutionary biology, as well as advances in neuroscientific imaging capabilities among other fields. To date, scientists studying moral cognition and behaviour have paid

little attention to virtue theory while virtue theorists have yet to acknowledge the new research results emerging from the new science of morality Theology and the Science of Moral Action explores a new approach to ethical thinking that promotes dialogue and integration between recent research in the scientific study of moral cognition and behaviour including neuroscience moral psychology and behavioural economics and virtue theoretic approaches to ethics in both philosophy and theology More particularly the book evaluates the concept of moral exemplarity and its significance in philosophical and theological ethics as well as for ongoing research programs in the cognitive sciences **Film Year Book**, 1938 *The Psychology of Love* Robert J. Sternberg, Michael L. Barnes, Michael L.. Barnes, 1988-01-01 Essays discuss theories of love types of love the maintenance of love relationships marriage and lust
