Love, Sex, and Intimacy: Their Psychology, Biology, and History. By Elaine Hatfield and Richard L. Rapson. HarperCollins Publishers, New York, 1993, 320 pp.

Reviewed by Pamela C. Rapson, Ph.D.¹

Until recently, such "personal" experiences as love, sex, and intimacy were not viewed as legitimate topics of scientific inquiry. We tolerated songs, odes, and treatises on these experiences by poets, philosophers, and other starry-eyed sentimentalists, but we expected our rational, hard-headed scientists to know better than to waste valuable research time and money on such frivolous and irrational pursuits. It was such an attitude that led Senator William Proxmire to conclude that "right at the top of the list of the things we don't want to know is why a man falls in love with a woman and vice versa" (Hatfield and Walster, 1978, p. viii). But, millions of Americans want nothing more than an answer to that very question, as indicated by the proliferation of magazine "test" quizzes that purport to measure our sexual desirability, talk shows devoted to discussions of what to wear, say, and do to attract and keep a romantic partner, and self-help books that promise to teach us in 10 easy steps how to rekindle the sexual ashes of our fading romances.

Although this interest—both personal and professional—in interpersonal relationships is unlikely to disappear in the near future, there are notably few textbooks available that can serve as sources of general introduction to theory and research in this area (see, however, Bertha, 1993; Hendrick and Hendrick, 1992). Focusing specifically on romantic (i.e., dating, marital) relationships, Hatfield and Rapson's volume thus represents a particularly valuable addition to the existing literature.

In keeping with the interdisciplinary nature of the field of interpersonal relationships, the authors draw upon theory and research from social psychology, developmental psychology, sociology, communication studies, marriage and family therapy, and clinical psychology. The judicious use of cartoons and quotations gleaned from writers, poets, biographers, historians, philosophers, and entertainers prevents the text from becoming a mere catalog of theoretical models and empirical findings, and seems likely to capture and maintain the interest of students as well as members of the

general public. Similarly, the authors' discussion of their own relationship histories in the Preface, coupled with their friendly, conversational style, renders this book well suited to classroom use and public consumption.

Indeed, Hatfield and Rapson seem to have carefully considered these two audiences in constructing their book, for they appear as invested in teaching their readers how to understand and apply what is known about love, sex, and intimacy to their own lives and relationships as they do in reviewing the literature on these topics. For example, chapter 1 ("Beginnings") includes not only a discussion of the variables that influence interpersonal attraction (e.g., proximity, similarity, physical attractiveness) but also a section entitled, "Effective Strategies for Meeting Dates and Mates," which outlines some of the various approaches that might be used to successfully attract potential romantic partners. Similarly, chapter 10 ("Dealing With Problems: Communication") reviews theory and research on verbal and nonverbal communication and also provides concrete examples of ways in which to effectively transform vague gripes about the partner or the relationship into specific complaints and to then turn these more specific complaints into positive suggestions for change. In short, the authors have achieved an interesting and ultimately successful blend of literature review and self-help book. Although this may render the work less interesting to researchers than to other, nonprofessional audiences, it is refreshing to find well-known and influential psychologists who do not shy away from discussing the potential applicability of relationships theory and research to the lives and loves of the man or woman on the street.

This book is also nicely organized. Each chapter includes an introductory overview, definitions of the phenomena to be discussed (e.g., passionate love, intimacy, power), reviews of relevant research on the causes, manifestations, consequences, and correlates of those phenomena, and major conclusions and implications of this research for the individual and his or her romantic relationships. The book itself follows a similarly orderly progression. Chapter 1 focuses on the initial stages of a romantic relationship and introduces readers to theory and research on the factors that attract us to one another. Chapters 2 through 6 explore particular topics in the relationship literature, including passionate love, sexuality, companionate love, intimacy and commitment, and power. For example, in chapter 6, Hatfield and Rapson discuss how researchers have defined and operationalized power, review the ways in which individuals express power and resolve conflict in interpersonal situations, and examine the different power tactics and strategies employed by men and women in their sexual encounters and romantic relationships. The next three chapters deal with the many variables that conspire to create tension and problems between the members of a couple. Specifically, chapter 7 ("Emotional Problems") discusses

educational settings and in marketing studies indicate the theory's relevance for the real world. This volume, edited by Kjell Thörnblom and Ali Kazemi, is the wonderful Festschrift that Foa did not have because he died when he was too young by contemporary life expectancy standards. It includes chapters by many of the stars of the fields that social resource theory has influenced: Harry C. Triandis, Professor Emeritus, University of Illinois; Forty years ago, Edna and Uriel Foa began to spell out the unwritten social rules by which we trade on a daily basis: friendship, information, respect, gifts, favors, and other rewards and punishments. Sociologists, psychologists, economists, and others owe the editors a tremendous debt of gratitude for reminding us of the eloquence and indispensability of the original work on social resource theory and for bringing together a distinguished roster of scholars and scientists to reflect on the theory and to exercise it in the service of addressing an astonishing number and variety of important social and organizational problems. John T. Jost, Professor of Psychology and Politics, New York University: What material and symbolic goods count as resources? How do resources relate to power? How can the exchange and distribution of resources be understood in both interpersonal and societal terms? In this outstanding volume, Thörnblom and Kazemi bring together a constellation of experts from a variety of disciplines to address questions such as these. Taking as their basis the classic statement by Uriel and Edna Foa of the resource theory of social exchange, the *Handbook* moves through theoretical to practical analyses and presents both laboratory and field research conducted in a number of different countries. The book makes an excellent contribution to our understanding of social exchange theory in particular and of social relationships in general. The collection is both impressive and important. Faye J. Crosby, Professor of Psychology, University of California, Santa Cruz: A tour de force, this comprehensive volume presents cutting edge insights inspired by Foa and Foa's social resource theory. Thörnblom and Kazemi have brought together a stellar cast to address ageless questions about the cornerstones of social life and provide generative roadmaps for future theorizing and research. This volume is a rich resource for scholars as well as students and educated readers who want to know more about the complexities of social life. Linda J. Skitka, Professor of Psychology, University of Illinois at Chicago. *The Laws of Emotion*. Nico H. Frijda, 2017-09-25. *The Laws of Emotion* is an accessible work that reviews much of the insightful new research on emotions conducted over the last ten years. It expands on the theory of emotions introduced in Nico Frijda's earlier work and addresses a number of unanswered basic problems on emotion theory. The author's goal is to better understand the underlying psychological mechanisms of emotion. In this book, Professor Frijda also examines previously neglected topics of emotion such as determinants of emotional intensity, the duration of emotions, and sexual emotions. It touches on both evolutionary and neuroscientific explanations. The book begins by reviewing a number of principles governing emotion or the laws of emotion. The author then examines the passionate nature of emotions and the motivational processes underlying them, and the nature and causes of pleasure and pain. Professor Frijda then explores the processes that lead to emotional arousal, including cognitive influences and why people care more about certain things than others. Emotional intensity is then

discussed including the often neglected topic of the course of emotions over time The book concludes with the author's insights into complex emotional domains such as sex revenge and the need to commemorate past events The Laws of Emotion will appeal to social cognitive and developmental psychologists social scientists philosophers and neuroscientists as well as anyone interested in the workings of the mind It also serves as a text for advanced courses in the psychology of emotions or the neuroscience of emotions Asleep in the Helix: Survival & the Science of Self Realization M.A.
