Luminous Stars And Abociations In Galaxies:

Luminous Stars and Associations in Galaxies International Astronomical Union. Symposium, 1986-06-30 Proceedings of the 116th Symposium of the International Astronomical Union held at Porto Heli Greece May 26 31 1985 **Luminous Stars and Associations in Galaxies** International Astronomical Union. Symposium, 1986 **Literature 1986, Part 1** Prof. Dr. Roland Wielen, S. Böhme, U. Esser, H. Hefele, Inge Heinrich, W. Hofmann, D. Krahn, V. R. Matas, Dr. Lutz D. Schmalde, G. Zech, 2013-04-17 **Massive Stars in Starbursts** Claus Leitherer, Space Telescope Science Institute (U.S.), 1991-05-16 This book reviews the importance of massive stars in several areas of astrophysics Massive stars are objects that are 10 100 times the mass of our Sun Above ten solar masses loss through stellar winds begins to have a major impact on the evolution of a star The upper limit of 100 solar masses is derived from observations Significant progress has now been achieved in massive star research New models along with high quality observations have improved our understanding of the formation structure atmosphere and evolution of these massive objects They are formed in violent bursts of star formation and are probably related to the phenomena observed in active galactic nuclei The workshop at the Space Telescope Science Institute examined the interplay between the astrophysics of massive stars and their location in extragalactic starburst regions There are eighteen chapters by leading researchers Each has been carefully edited to ensure that the book is a comprehensive introduction to the theory and observation of massive stars in starburst regions Starbursts and Galaxy Evolution Xuan Thuan Trinh, Thierry Montmerle, J. Thanh Van Tran, 1987 **Stellar Astrophysics for the Local Group** A. Aparicio, A. Herrero, F. Sánchez, 1998-06-13 A review of the new subject of extragalactic stellar astrophysics for both graduate students and researchers working in astrophysics **Violent Star Formation** Guillermo Tenorio-Tagle, Instituto de Astrofísica de Canarias, Royal Greenwich Observatory, 1994-09-22 A valuable overview and a timely update on all aspects of violent star formation in a host of objects for graduate students and researchers across a broad range of research interests *Galactic and Extragalactic Star Formation* Ralph E. Pudritz, Michel Fich, 2012-12-06 Recent advances in the instrumentation used to observe star forming regions in both our own Milky Way and in external galaxies have transformed the subject from a phenomenological pursuit into an increasingly unified physical science High resolution centimetre millimetre infrared and optical studies of local star forming clouds have allowed us to probe the physics of star formation down to spatial scales approaching those of the solar system These developments make it possible to better constrain the basic physical processes underlying star formation itself At the same time these new instruments have placed extragalactic studies on a footing detailed enough to allow comparison with star forming regions within our own galaxy This revolution means that we will soon be able to link the physics of local star forming regions to the global star forming properties of galaxies The entire structure of this NATO Advanced Study Institute was designed to explore this new view of the subject This Institute on Galactic and Extragalactic Star Formation was held from June 21 July 4 1987 at the Conference Centre in the village of Whistler British

Columbia Canada The informal atmosphere of this lovely mountain resort stimulated many valuable scientific exchanges The Institute was funded by a major grant from NATO Scientific Affairs Additional financial and logistical assistance was provided by the Canadian Institute for Theoretical Astrophysics CITA and McMaster University *Exploring the Universe with the IUE Satellite* Y. Kondo, Willem Wamsteker, A. Boggess, M. Grewing, C. de Jager, A.L. Lane, Jeffrey L. Linsky, R.

Wilson, 2013-12-11 This book was conceived to commemorate the continuing success of the guest observer program for the International Ultraviolet Explorer IUE satellite observatory It is also hoped that this volume will serve as a useful tutorial for those pursuing research in related fields with future space observatories As the IUE has been the product of the three way collaboration between the U S National Aeronautics and Space Administration NASA European Space Agency ESA and the British Engineering and Research Council SERC so is this book the fruit of the collaboration of the American and European participants in the IUE As such it is a testimony to timely international cooperation and sharing of resources that open up new possibilities The IUE spacecraft was launched on the 26th of January in 1978 into a geosynchronous orbit over the Atlantic Ocean The scientific operations of the IUE are performed for 16 hours a day from Goddard Space Flight Center in Greenbelt Maryland U S A and for 8 hours a day from ESA Villafranca Satellite Tracking Station near Madrid Spain
