Luxury And Public Happiness In The Italian Enlightenment:

Luxury and Public Happiness Till Wahnbaeck, 2004 This work charts the development of political economy in 18th century Italy arguing that the focus on economic thought is characteristic of the Italian Enlightenment at large Through an analysis of the debate about luxury it traces the shaping of a new language of political economy

The Books that Made the European Enlightenment Gary Kates, 2022-08-11 In contrast to traditional Enlightenment studies that focus solely on authors and ideas Gary Kates employs a literary lens to offer a wholly original history of the period in Europe from 1699 to 1780 Each chapter is a biography of a book which tells the story of the text from its inception through to the revolutionary era with wider aspects of the Enlightenment era being revealed through the narrative of the book's publication and reception Here Kates joins new approaches to book history with more traditional intellectual history by treating authors publishers and readers in a balanced fashion throughout Using a unique database of 18th century editions representing 5 000 titles the book looks at the multifaceted significance of bestsellers from the time It analyses key works by Voltaire Adam Smith Madame de Graffigny Jean Jacques Rousseau and David Hume and champions the importance of a crucial innovation of the age the rise of the erudite blockbuster which for the first time in European history helped to popularize political theory among a large portion of the middling classes Kates also highlights how when and why some of these books were read in the European colonies as well as incorporating the responses of both ordinary men and women as part of the reception histories that are so integral to the volume

Global Commerce in the Age of Enlightenment J. Bohorquez, 2022-12-30 Combining contextual institutional and global perspectives this book evaluates the impact of international trade on eighteenth century economic thought It meticulously delineates how economic ideas and institutions flowed between North and South Europe and across the Indian and Atlantic Oceans during the Age of Enlightenment *Global Commerce in the Age of Enlightenment* carefully explores contemporary debates about economic institutions which were a crucial element in the race for controlling international trade Eighteenth century thinkers devoted much attention to the relative merits of existing institutions such as free ports grasped the dangers of economic dependence and appraised emerging conceptions of property rights The author draws on an impressive range of sources including pamphlets and travel accounts and work from lesser known figures such as Pierre Poivre and Ange Goudar This volume will be valuable reading for advanced students and researchers of the history of economic thought economic history political economy the history of ideas and global history

Suffering and Happiness in England 1550-1850: Narratives and Representations Michael J. Braddick, Joanna Innes, 2017-07-26 *Suffering and Happiness in England 1550-1850* pays tribute to one of the leading historians working on early modern England Paul Slack and his work as a historian and enters into discussion with the rapidly growing body of work on the history of emotions The themes of suffering and happiness run through Paul Slack's publications the first being more prominent in his early work on plague and poverty the second in his more recent work on conceptual frameworks for social

thought and action Though he has not himself engaged directly with the history of emotions assembling essays on these themes provides an opportunity to do that The chapters explore in turn shifting discourses of happiness and suffering over time the deployment of these discourses for particular purposes at specific moments and their relationship to subjective experience In their introduction the editors note the very diverse approaches that can be taken to the topic they suggest that it is best treated not as a discrete field of enquiry but as terrain in which many paths may fruitfully cross The history of emotions has much to offer as a site of encounter between historians with diverse knowledge interests and skills

Luxury and Gender in European Towns, 1700-1914 Deborah Simonton, Marjo Kaartinen, Anne Montenach, 2014-09-04 This book conceives the role of the modern town as a crucial place for material and cultural circulations of luxury It concentrates on a critical period of historical change the long eighteenth and nineteenth centuries that was marked by the passage from a society of scarcity to one of expenditure and accumulation from ranks and orders to greater social mobility from traditional aristocratic luxury to a new bourgeois and even democratic form of luxury This volume recognizes the notion that luxury operated as a mechanism of social separation but also that all classes aspired to engage in consumption at some level thus extending the idea of what constituted luxury and blurring the boundaries of class and status often in unsettling ways It moves beyond the moral aspects of luxury and the luxury debates to analyze how the production distribution purchase or display of luxury goods could participate in the creation of autonomous selves and thus challenge gender roles

Luxury in Global Perspective Karin Hofmeester, Bernd-Stefan Grewe, 2016-11-28 Global history is predicated on connections and exchange how connections between far flung people places and objects are forged through a variety of exchanges As world history has matured as a field its practitioners have found the movement of commodities between peoples places and time a fruitful vehicle for research and teaching Studies of bulk items like salt spices coffee and other globally traded commodities abound but few scholars have examined the role of luxury goods from a global perspective This anthology charts the many different contexts in which luxury objects have been used across the globe ranging from the social practices linked to these objects to their production exchange and consumption as well as how these practices varied over time and space and how different societies attributed diverse meanings to the same objects Using luxury goods as a conduit *Luxury in Global Perspective* enriches our understanding of global history

The Case for The Enlightenment John Robertson, 2005-10-27 The Case for the Enlightenment is a comparative study of the emergence of Enlightenment in Scotland and in Naples Challenging the tendency to fragment the Enlightenment in eighteenth century Europe into multiple Enlightenments the distinguished intellectual historian John Robertson demonstrates the extent to which thinkers in two societies at the opposite ends of Europe shared common intellectual preoccupations Before 1700 Scotland and Naples faced a bleak future as backward provincial kingdoms in a Europe of aggressive commercial states Yet by 1760 Scottish and Neapolitan thinkers were in the van of those advocating the cause of Enlightenment by means of political economy By studying the social and

institutional contexts of intellectual life in the two countries and the currents of thought promoted within them The Case for the Enlightenment explains this transformation John Robertson pays particular attention to the greatest thinkers in each country David Hume and Giambattista Vico

The Rise of Economic Societies in the Eighteenth Century K. Stapelbroek, J. Marjanen, 2012-08-30 This collection of essays explores the emergence of economic societies in the British Isles and their development into a European American and global reform movement in the eighteenth century Its fourteen contributions demonstrate the intellectual horizons and international networks of this widespread and influential phenomenon

The Science of Wealth Tony Aspromourgos, 2008-09-18 This study clarifies the character of political economy as a distinct and separable intellectual discipline in the generic sense in the texts of Adam Smith It focuses upon the scope and fundamental conceptualizations of the new science Smith's conceptualization of economic analysis is shown to constitute a unified intellectual piece for understanding economic society and its dynamics Smith's fundamental economic language is exhaustively examined in all his texts with a view to clarifying the meaning of the basic concepts of his system As well the prehistories of those concepts in literature prior to Smith back to the earliest times are quite comprehensively treated thereby placing his political economy in its larger historical context and conveying a rich sense of the history of these ideas over the whole course of our civilization A quite complete account of Smith's economics as a whole is also entailed by this undertaking his key substantive economic doctrines are thoroughly

considered as well and all the elements of his economic theory receive attention To that extent notwithstanding the focus on concepts an interpretation of the substance of Smith's political economy is also provided This focus is partly motivated by the view that Smith's intellectual triumph in the history of social science is not so much about the success of specific doctrines His more considerable theoretical success is at a deeper level gaining a wide and long lasting acquiescence in the conceptual universe framed by the fundamental structures of his system for a newly emerging discipline Those who subsequently contested Smithian doctrine did so within Smith's framework they did so on his terms While the book's primary purpose is to reconstruct the character of Smith's political economy as a distinct intellectual enterprise it also addresses its relevance to modern economics and to policy and practice in contemporary liberal society

The Economy of Renaissance Florence

Richard A. Goldthwaite, 2011-01-07 Winner 2010 Phyllis Goodhart Gordan Book Prize the Renaissance Society of America 2009 Outstanding Academic Title Choice Honorable Mention Economics 2009 PROSE Awards Professional and Scholarly Publishing division of the Association of American Publishers Richard A Goldthwaite a leading economic historian of the Italian Renaissance has spent his career studying the Florentine economy In this magisterial work Goldthwaite brings together a lifetime of research and insight on the subject clarifying and explaining the complex workings of Florence's commercial banking and artisan sectors Florence was one of the most industrialized cities in medieval Europe thanks to its thriving textile industries The importation of raw materials and the exportation of finished cloth necessitated the creation of commercial and banking practices that extended far beyond Florence's boundaries Part I situates Florence within this wider international context and describes the commercial and banking networks through which the city's merchant bankers operated Part II focuses on the urban economy of Florence itself including various industries merchants artisans and investors It also evaluates the role of government in the economy the relationship of the urban economy to the region and the distribution of wealth throughout the society While political social and cultural histories of Florence abound none focuses solely on the economic history of the city The Economy of Renaissance Florence offers both a systematic description of the city's major economic activities and a comprehensive overview of its economic development from the late Middle Ages through the Renaissance to 1600

The Economic Turn

Steven Kaplan, Sophus Reinert, 2019-01-16 The mid eighteenth century witnessed what might be dubbed an economic turn that resolutely changed the trajectory of world history

The discipline of economics itself emerged amidst this turn and it is frequently traced back to the work of François Quesnay and his school of Physiocracy. Though lionized by the subsequent historiography of economics, the theoretical postulates and policy consequences of Physiocracy were disastrous at the time, resulting in a veritable subsistence trauma in France. This galvanized relentless and diverse critiques of the doctrine not only in France but also throughout the European world that have hitherto been largely neglected by scholars. Though Physiocracy was an integral part of the economic turn, it was rapidly overcome both theoretically and practically, with durable and important consequences for the history of political economy. The Economic Turn brings together some of the leading historians of that moment to fundamentally recast our understanding of the origins and diverse natures of political economy in the Enlightenment. [The Academy of Fisticuffs](#) Sophus A. Reinert, 2018-12-28. The Italian Enlightenment, no less than the Scottish, was central to the emergence of political economy and creation of market societies. Sophus Reinert turns to Milan in the late 1700s to recover early socialists' preoccupations with the often lethal tension among states, markets, and human welfare, and the policies these ideas informed. **Love, Self-Deceit and Money** Koen Stapelbroek, 2008-04-05. Love drives and gives life to the commerce of mankind. Thus the sixteen-year-old Ferdinando Galiani (1728-1787) presented his project to understand the sociable nature of man. This observation, a reflection of his own position on the relation between trade and virtue, hinted at what the mature works of Galiani, one of the most noteworthy economists and wits in eighteenth-century Italy, would eventually yield. In *Love, Self-Deceit and Money*, Koen Stapelbroek reconstructs the Early Neapolitan Enlightenment debate on the morality of market societies, a debate that hinged on the preservation of Naples' independent statehood in a global arena of commercial and military competition. Galiani rejected the moralizing and mercantile ideas of his contemporaries regarding the dangers threatening Naples, and in his *Della moneta* (1751) he justified the systems set in place by the Neapolitan government. With reference to early, previously unstudied lectures on self-deceptive Platonic love, Koen Stapelbroek examines Galiani's role in the wider debate, arguing that his early moral, philosophical, and historical work suggests a great deal about his political-economic stance, including his assertion that money is the ultimate ordering principle in the universe. As a study of one of the most idiosyncratic minds of the Enlightenment period, *Love, Self-Deceit and Money* shows how diverse ideas of the development of individual passions into social dispositions, commerce, and reform politics dovetailed seamlessly in the intellectual climate of eighteenth-century Europe. *Enlightened Reform in Southern Europe and its Atlantic Colonies, c. 1750-1830* Gabriel Paquette, 2016-05-06. Efforts to ascertain the influence of enlightenment thought on state action, especially government reform in the long eighteenth century, have long provoked stimulating scholarly quarrels. Generations of historians have grappled with the elusive intersections of enlightenment and absolutism of political ideas and government policy. In order to complement, expand, and rejuvenate the debate, which has so far concentrated largely on Northern, Central, and Eastern Europe, this volume brings together historians of Southern Europe, broadly defined, and its ultramarine empires. Each chapter

has been explicitly commissioned to engage with a common set of historiographical issues in order to reappraise specific aspects of enlightened absolutism and enlightened reform as paradigms for the study of Southern Europe and its Atlantic empires In so doing it engages creatively with pressing issues in the current historical literature and suggests new directions for future research No single historian working alone could write a history that did justice to the complex issues involved in studying the connection between enlightenment ideas and policy making in Spanish America Brazil France Italy Portugal and Spain For this reason this well conceived balanced volume drawing on the expertise of a small carefully chosen cohort offers an exciting investigation of this historical debate **The Enlightenment** Dorinda Outram,2019-06-13 An engaging and accessible overview of the Enlightenment as a global phenomenon with updated material and additional online resources

The Free Port of Livorno and the Transformation of the Mediterranean World Corey Tazzara,2017-10-20 In the twilight of the Renaissance the grand duke of Tuscany a scion of the fabled Medici family of bankers invited foreign merchants artisans and ship captains to settle in his port city of Livorno The town quickly became one of the most bustling port cities in the Mediterranean presenting a rich tableau of officials merchants mariners and slaves Nobody could have predicted in 1600 that their activities would contribute a chapter in the history of free trade Yet by the late seventeenth century the grand duke's invitation had evolved into a general program of hospitality towards foreign visitors the liberal treatment of goods and a model for the elimination of customs duties Livorno was the earliest and most successful example of a free port in Europe The story of Livorno shows the seeds of liberalism emerging not from the studies of philosophers such as Adam Smith but out of the nexus between commerce politics and identity in the early modern Mediterranean Idea of Commercial Society in the Scottish Enlightenment Christopher J Berry,2015-04-08 Christopher Berry explains why Enlightenment thinkers considered commercial society to be wealthier and freer than earlier forms looking at key works from Adam Smith David Hume and Adam Ferguson alongside lesser known figures *Introduction to the Spanish Universalist School* Pedro Aullón de Haro, Davide Mombelli,2020-06-29 Introduction to the Spanish Universalist School presents the most significant authors works and concepts of a distinctive humanistic and scientific intellectual community one mostly comprised of ex Jesuits exiled to Italy at the end of the eighteenth century The study of this corner of the Hispanic Enlightenment marked especially by the work of Juan Andrés Lorenzo Hervás and Antonio Eximeno offers contributions to the history of European sciences and letters to the history of ideas and to the concepts of universality and globalization
