Film Programming Peter Bosma, 2015-06-09 This study explores artistic choices in cinema exhibition focusing on film theaters film festivals and film archives and situating film curating issues within an international context Artistic and commercial film availability has increased overwhelmingly as a result of the digitization of the infrastructure of distribution and exhibition The film trade s conventional structures are transforming and in the digital age supply and demand can meet without the intervention of traditional gatekeepers everybody can be a film curator in a passive or active way This volume addresses three kinds of readers those who want to become film curators those who want to research the film curating phenomenon and those critical cinema visitors who seek to investigate the story behind the selection process of available films and the way to present them *The Avant-Garde Feature Film* William E.B. Verrone, 2011-11-08 Here is a critical and historical overview of unconventional and aesthetically challenging films all of feature length The author focuses on the particular forms of contemporary avant garde films which often rely on characteristics associated with historical films of the same genre Included are works by such visionary filmmakers as David Lynch Luis Bunuel Jean Cocteau Jean Luc Godard Guy Maddin and Derek Jarman The first of the two appendices contains a filmography of key avant garde feature films from Haxan Witchcraft Through the Ages 1922 to Maximum Shame 2010 The second appendix offers a brief list of directors who have made significant contributions to films that take alternative approaches to cinematic practice establishing new grounds for analysis and evaluation Beyond the Screen Marta Braun, Charlie Keil, Rob King, Paul Moore, 2012-08-22 This scholarly anthology presents a new framework for understanding early cinema through its usage outside the realm of entertainment From its earliest origins until the beginning of the twentieth century cinema provided widespread access to remote parts of the globe and immediate reports on important events Reaching beyond the nickelodeon theatres cinema became part of numerous institutions from churches and schools to department stores and charitable organizations Then in 1915 the Supreme Court declared moviemaking a business pure and simple entrenching the film industry s role as a producer of harmless entertainment In Beyond the Screen contributors shed light on how pre 1915 cinema defined itself through institutional interconnections and publics interested in science education religious uplift labor organizing and more *The Greatest Films Never Seen* Claudy Op den Kamp, 2025-10-01 Orphan works or artworks for which no copyright holder is traceable pose a growing problem for museums archives and other heritage institutions As they come under more and more pressure to digitize and share their archives they are often hampered by the uncertain rights status of items in their collections *The Greatest Films Never Seen* The Film Archive and the Copyright Smokescreen uses the prism of copyright to reconsider human agency and the politics of the archive and asks what the practical implications are for educational institutions the creative industries and the general public

Ruins and Resilience Karel Doing, 2024-07-23 Experimental film practice from an international and transdisciplinary perspective Karel Doing is an experimental filmmaker and researcher who has worked across the globe with fellow artists and filmmakers creating a body of work that is difficult to pinpoint with a simple catchphrase In *Ruins and Resilience* he weaves autobiographical elements and critical reviews together with his wide ranging interdisciplinary approach reflecting on his own practice by positioning key works within the context of a vibrant experimental film scene in Europe North and South America and Asia Doing demonstrates how experimental filmmakers have continued to renew their practice despite the almost total demise of analog motion picture film and the constant neglect of this art form by institutions and critics Written in a fluent and accessible style the book looks into the connections between the work of groundbreaking artists within the field and subjects such as transgression improvisation collectivity materiality phenomenology and perception Specifically intersections with music and sound are investigated appealing to the idea of the cross modal brain the ability to perceive sounds and images in an integrated way Instead of looking again at the golden era of experimental film the book starts in the 1980s showing how this art form has never ceased to surprise and inspire The author's hands on engagement with the medium is formational for his more theoretical approach and writing making the book a highly original contribution in the field that is informative and inspiring for academic and practitioners alike

Towards a Philosophy of Cinematography Alexander Nevill, 2021-06-01 This book presents three interrelated essays about cinematography which offer a theoretical understanding of the ways that film practitioners orchestrate light in today's post digital context Cinematography is a practice at the heart of film production which traditionally involves the control of light and camera technologies to creatively capture moving imagery During recent years the widespread adoption of digital processes in cinematography has received a good deal of critical attention from practitioners and scholars alike however little specific consideration about evolving lighting practices can be found amongst this discourse Drawing on new materialist ideas actor network theory and the concept of co creativity these essays examine the impact of changing production processes for the role and responsibilities of a cinematographer with a specific focus on lighting Each essay advances a new perspective on the discipline moving from the notion of light as vision to light as material from technology as a tool to technology as a network and from cinematography as an industry to cinematography as a collaborative art

The Second Century of Cinema Wheeler W. Dixon, 2000-03-02 Contemplates the future of cinema in light of emerging digital technologies and new systems of distribution
