Futter,Christina M. Anderson,2022-02-24 The 19th century in Western culture was a time of both confidence and turbulence Industrial development produced a growing middle class as well as efficiency convenience and innovation across a range of fields from engineering to architecture Alongside these improvements the century began with the extended period of the Napoleonic Wars and was further disrupted by rebellions and revolutions both within Europe and in India South America and other parts of the world Slavery was abolished and urbanization increased dramatically These myriad developments were reflected throughout the period in the proliferation of types of furniture along with their categorization as industrial art at the

international exhibitions and world fairs and the increasingly adventurous range of materials that were sometimes used in their construction. Nonetheless a strong antiquarian historicist strand also prompted interest in the revival of past styles in areas of art and design including furniture. Drawing upon a wealth of visual and textual sources this volume of *A Cultural History of Furniture* presents essays that examine key characteristics of the furniture of the period on the themes of design and motifs, makers, making and materials, types and uses, the domestic setting, the public setting, exhibition and display, furniture and architecture, visual representations and verbal representations.

The entire two-volume anthology follows the full range of architectural literature from classical times to present transformations. An ambitious anthology bringing together over 300 classic and contemporary essays that survey the key developments and trends in architecture. Spans the period from 1871 to 2005 from John Ruskin and the Arts and Crafts movement in Great Britain through to the development of L'Esprit Nouveau in Paris and the creation of a metropolis in the East China Sea. Organized thematically, featuring general and section introductions and headnotes to each essay, written by a renowned expert on architectural theory. Places the work of architects like Louis Kahn, Frank Lloyd Wright and Le Corbusier alongside the work of prominent architectural critics, offering a balanced perspective on current debates. Includes many hard-to-find texts and works never previously translated into English.
