MacAdam William Joseph Reader,1980-01-01 Transport in the Industrial Revolution Derek Howard Aldcroft,1983

Genealogies in the Library of Congress Marion J. Kaminkow,2012-09 A complement to genealogies in the Library of Congress t p of fifth v A History of Britain's Transport Jeremy Black,2025-02-28 Covers the evolution of transport history from walking and packhorses to modern rail motoring and air travel An accessible book to draw on popular interest in transport history routes vehicles and experiences Transport history is social and industrial national history Passengers and freight will be covered including all types of transport from walking and packhorses that predominated for much of national history both of which tend to be underrated to changes brought by improvements to road transport from the Romans to medieval bridgebuilders and eighteenth century turnpikes and in parallel river coastal and canal travel again from the Romans to the eighteenth century The story moves to the age of rail motoring and lastly air All forms overlap as well as being sequential **Roads to Power** Jo Guldi,2012-01-01 Guldi narrates how Britain built the first nation connected by infrastructure how a libertarian revolution destroyed a national economy and how technology caused strangers to stop speaking The new infrastructure state saw unprecedented control by bureaucrats over everyday life and gave rise to competing visions of community still debated today **The Complete History of Wheeled Transportation** Britannica Educational Publishing,2011-11-01 While the wheel itself has changed little over time it has immeasurably altered the nature of transportation This insightful volume examines the various wheeled conveyances that have been instrumental in agriculture and commerce carts and wagons for instance as well as those that have facilitated human travel coaches bicycles cars and buses among others Also explored is the evolution of roads as they have expanded to accommodate various modes of wheeled transportation **Creating Paradise** Richard Wilson,2000-12-01 Building or rebuilding their houses was one of the main concerns of the English nobility and gentry some might say their greatest achievement This is the first book to look at the building of country houses as a whole Creating Paradise shows why owners embarked on building programmes often following the Grand Tour or excursions around other houses in England where they looked for architectural inspiration and assistance and how the building was actually done It deals not only with great houses including Holkham and Castle Howard but also the diversity of smaller ones such as Felbrigg and Dyrham and shows the cost not only of building but of decorating and furnishing houses and of making their gardens Creating Paradise is an important and original contribution to its subject and a highly readable account of the attitude of the English ruling class to its most important **The Enlightenment of Thomas Beddoes** Trevor Levere,Larry Stewart,Hugh Torrens,Joseph Wachelder,2016-11-10 Thomas Beddoes 1760 1808 lived in decidedly interesting times in which established orders in politics and science were challenged by revolutionary new ideas Enthusiastically participating in the heady atmosphere of Enlightenment debate Beddoes career suffered from his radical views on politics and science Denied a professorship at Oxford he set up a medical practice in Bristol in 1793 Six

years later with support from a range of leading industrialists and scientists including the Wedgwoods Erasmus Darwin James Watt James Keir and others associated with the Lunar Society he established a Pneumatic Institution for investigating the therapeutic effects of breathing different kinds of air on a wide spectrum of diseases The treatment of the poor gratis was an important part of the Pneumatic Institution and Beddoes who had long concerned himself with their moral and material well being published numerous pamphlets and small books about their education wretched material circumstances proper nutrition and the importance of affordable medical facilities Beddoes democratic political concerns reinforced his belief that chemistry and medicine should co operate to ameliorate the conditions of the poor But those concerns also polarized the medical profession and the wider community of academic chemists and physicians many of whom became mistrustful of Beddoes projects due to his radical politics Highlighting the breadth of Beddoes concerns in politics chemistry medicine geology and education including the use of toys and models this book reveals how his reforming and radical zeal were exemplified in every aspect of his public and professional life and made for a remarkably coherent program of change He was frequently a contrarian but not without cause as becomes apparent once he is viewed in the round as part of the response to the politics and social pressures of the late Enlightenment The Texture of Industry Robert B. Gordon, Patrick M.

Malone, 1997 While historians have given ample attention to stories of entrepreneurship invention and labor conflict they have told us little about actual work places and how people worked Workers seldom wrote about their daily employment However they did leave behind their tools products shops and factories as well as the surrounding industrial landscapes and communities In this book Gordon and Malone look at the industrialization of North America from the perspective of the industrial archaeologist Using material evidence from such varied sites as Indian steatite quarries automobile plants and coal mines they examine manufacturing technology transportation systems and the effects of industrialization on the land Their research greatly expands our understanding of industry and focuses attention on the contributions of anonymous artisans whose skills shaped our industrial heritage

Charles Dickens's Networks Jonathan H. Grossman, 2012-03 The same week in February 1836 that Charles Dickens was hired to write his first novel *The Pickwick Papers* the first railway line in London opened Charles Dickens's *Networks* explores the rise of the global high speed passenger transport network in the nineteenth century and the indelible impact it made on Dickens's work The advent first of stage coaches then of railways and transoceanic steam ships made unprecedented round trip journeys across once seemingly far distances seem ordinary and systematic Time itself was changed The Victorians overran the separate local times kept in each town establishing instead the synchronized standard time which now ticks on our clocks Jonathan Grossman examines the history of public transport's systematic networking of people and how this revolutionized perceptions of time space and community and how the art form of the novel played a special role in synthesizing and understanding it all Focusing on a trio of road novels by Charles Dickens he looks first at a key historical moment in the networked community's coming together then at a subsequent

recognition of its tragic limits and finally at the construction of a revised view that expressed the precarious limited omniscient perspective by which passengers came to imagine their journeying in the network
