Marter, 2011 Arranged in alphabetical order these 5 volumes encompass the history of the cultural development of America with over 2300 entries *Art + DIY Electronics* Garnet Hertz, 2023-05-30 A systematic theory of DIY electronic culture drawn from a century of artists who have independently built creative technologies Since the rise of Arduino and 3D printing in the mid 2000s do it yourself approaches to the creative exploration of technology have surged in popularity But the maker movement is not new it is a historically significant practice in contemporary art and design This book documents tracks and identifies a hundred years of innovative DIY technology practices illustrating how the maker movement is a continuation of a long standing creative electronic subculture Through this comprehensive exploration Garnet Hertz develops a theory and language of creative DIY electronics drawing from diverse examples of contemporary art including work from renowned electronic artists such as Nam June Paik and such art collectives as Survival Research Laboratories and the Barbie Liberation Front Hertz uncovers the defining elements of electronic DIY culture which often works with limited resources to bring new life to obsolete objects while engaging in a critical dialogue with consumer capitalism Whether hacking blackboxed technologies or deploying culture jamming techniques to critique commercial labor practices or gender norms the artists have found creative ways to make personal and political statements through creative technologies The wide range of innovative works and practices profiled in *Art DIY Electronics* form a general framework for DIY culture and help inspire readers to get creative with their own adaptations fabrications and reimaginings of everyday technologies **Acrobatic Modernism from the Avant-Garde to Prehistory** Jed Rasula, 2020-02-27 This is a book about artistic modernism contending with the historical transfigurations of modernity As a conscientious engagement with modernity's restructuring of the lifeworld the modernist avant garde raised the stakes of this engagement to programmatic explicitness But even beyond the vanguard the global phenomenon of jazz combined somatic assault with sensory tutelage Jazz like the new technologies of modernity re-calibrated sensory ratios The criterion of the new as self making also extended to names pseudonyms and heteronyms The protocols of modernism solicited a pragmatic arousal of bodily sensation as artistic resource validating an acrobatic sensibility ranging from slapstick and laughter to the pathos of bereavement Expressivity trumped representation The artwork was a diagram of perception not a mimetic rendering For artists the historical pressures of altered perception provoked new models and Ezra Pound's slogan Make It New became the generic rallying cry of renovation The paradigmatic stance of the avant garde was established by Futurism but the discovery of prehistoric art added another provocation to artists Paleolithic caves validated the spirit of all over composition unframed and dynamic Geometric abstraction

Constructivism and Purism and Surrealism were all in quest of a new mythology Making it new yielded a new pathos in the sensation of radical discrepancy between futurist striving and remotest antiquity The Paleolithic cave and the USSR emitted comparable siren calls on behalf of the remote past and the desired future As such the present was suffused with the pathos of being neither but subject to both     For the Millions A. Joan Saab,2009-04-24 An intriguing look at the changing roles of artists in modern America     **Corporate Patronage of Art and Architecture in the United States, Late 19th Century to the Present** Monica E. Jovanovich,Melissa Renn,2019-04-18 This interdisciplinary collection of case studies rethinks corporate patronage in the United States and reveals the central role corporations have played in shaping American culture This volume offers new methodologies and models for the subject of corporate patronage and contains an extensive bibliography on corporate patronage art collections and exhibitions sponsorship and philanthropy in the United States The case studies herein go beyond the usual focus on corporate sponsorship and collecting to explore the complex organizational networks and motivations behind corporate commissions Featuring chapters on Margaret Bourke White Julie Mehretu Maxfield Parrish Pablo Picasso Diego Rivera Eugene Savage Millard Sheets and Kehinde Wiley as well as studies on Andrew Carnegie Andrew Mellon John D Rockefeller Sr and Jr and Dorothy Shaver and companies such as Herman Miller and Lord and Taylor this volume looks at a wide array of works ranging from sculpture photography mosaics and murals to advertisements department store displays sportswear medical schools and public libraries     *Writing Design* Grace Lees-Maffei,2013-09-12 How do we learn about the objects that surround us As well as gathering sensory information by viewing and using objects we also learn about objects through the written and spoken word from shop labels to friends recommendations and from magazines to patents But even as design commentators have become increasingly preoccupied with issues of mediation the intersection of design and language remains under explored Writing Design provides a unique examination of what is at stake when we convert the material properties of designed goods into verbal or textual description Issues discussed include the role of text in informing design consumption designing with and through language and the challenges and opportunities raised by design without language Bringing together a wide range of scholars and practitioners Writing Design reveals the difficulties ethics and politics of writing about design     **Hooked Rugs** Cynthia Fowler,2017-07-05 Through a close look at the history of the modernist hooked rug this book raises important questions about the broader history of American modernism in the first half of the twentieth century Although hooked rugs are not generally associated with the avant garde this study demonstrates that they were a significant part of the artistic production of many artists engaged in modernist experimentation Cynthia Fowler discusses the efforts of Ralph Pearson and of Zoltan and Rosa Hecht to establish modernist hooked rug industries in the 1920s uncovering a previously undocumented history The book includes a consideration of the rural workers used to create the modernist narrative of the hooked rug as cottage industries were established throughout the rural Northeast and South to serve the ever increasing demand for hooked rugs

by urban consumers Fowler closely examines institutional enterprises that highlighted and engaged the modernist hooked rugs such as key exhibitions at the Museum of Modern Art and the Metropolitan Museum of Art in the 1930s and 40s This study reveals the fluidity of boundaries among art craft and design and the profound efforts of a devoted group of modernists to introduce the general public to the value of modern art

**Museum Space** Kali Tzortzi, 2016-03-09 Museums are among the iconic buildings of the twenty first century as remarkable for their architectural diversity as for the variety of collections they display But how does the architecture of museums affect our experience as visitors This book proposes that by seeing space as common ground between architecture and museology and so between the museum building and its display we can illuminate the individuality of each museum and the distinctive experience it offers for example how some museums create a sense of personal exploration while others are more intensely didactic and how the visit in some cases is transformed into a spatial experience and in other cases into a more social event The book starts with an overview of the history of museum buildings and display strategies and a discussion of theoretical and critical approaches It then focuses on specific museums as in depth case studies and uses methods of spatial analysis to look at the key design choices available to architects and curators and their effects on visitors behaviour Theoretically grounded methodologically original and richly illustrated this book will equip students researchers and professionals in the fields of architecture museum studies curating exhibition design and cultural studies with a guide for studying museums and a theoretical framework for their interpretation
