Media Science Before The Great War:

Media Science before the Great War Peter Broks, 1997-01-12 The rise of the mass media and professional science makes the years before the Great War an important formative period in the history of popular science Peter Broks explores the magazines of the time and uncovers the scientist as hero and villain science for and against religion animal biographies and a new empathy with nature technology as evolutionary progress utopian visions and degenerationst fears Through this cultural analysis of popular science he shows how Victorian hopes turned into Edwardian disillusion *Media Science Before the Great War* Peter Broks, 1996 The rise of the mass media and professional science makes the years before the Great War an important formative period in the history of popular science Peter Broks explores the magazines of the time and uncovers the scientist as hero and villain science for and against religion animal biographies and a new empathy with nature technology as evolutionary progress utopian visions and degenerationst fears Through this cultural analysis of popular science he shows how Victorian hopes turned into Edwardian disillusion The Sciences' Media Connection -Public Communication and its Repercussions Simone Rödder, Martina Franzen, Peter Weingart, 2011-12-02 The Yearbook addresses the overriding question what are the effects of the opening up of science to the media Theoretical considerations and a host of empirical studies covering different configurations provide an in depth analysis of the sciences media connection and its repercussions on science itself They help to form a sound judgement on this recent development **Science, Fiction, and the Fin-de-Siècle Periodical Press** Will Tattersdill, 2016-03-29 Explores the first appearance of science fiction in the pages of late nineteenth century general interest periodicals **Loving Faster than Light** Katy Price, 2024-05-31 In November 1919 newspapers around the world alerted readers to a sensational new theory of the universe Albert Einstein s theory of relativity Coming at a time of social political and economic upheaval Einstein s theory quickly became a rich cultural resource with many uses beyond physical theory Media coverage of relativity in Britain took on qualities of pastiche and parody as serious attempts to evaluate Einstein s theory jostled with jokes and satires linking relativity to everything from railway budgets to religion The image of a befuddled newspaper reader attempting to explain Einstein s theory to his companions became a set piece in the popular press *Loving Faster than Light* focuses on the popular reception of relativity in Britain demonstrating how abstract science came to be entangled with class politics new media technology changing sex relations crime cricket and cinematography in the British imagination during the 1920s Blending literary analysis with insights from the history of science Katy Price reveals how cultural meanings for Einstein s relativity were negotiated in newspapers with differing political agendas popular science magazines pulp fiction adventure and romance stories detective plots and esoteric love poetry *Loving Faster than Light* is an essential read for anyone interested in popular science the intersection of science and literature and the social and cultural history of physics **Archaeologists in Print** Amara Thornton, 2018-06-25 *Archaeologists in Print* is a history of popular publishing in archaeology in the nineteenth and twentieth

centuries a pivotal period of expansion and development in both archaeology and publishing. It examines how British archaeologists produced books and popular periodical articles for a non scholarly audience and explores the rise in archaeologists public visibility. Notably it analyses women s experiences in archaeology alongside better known male contemporaries as shown in their books and archives. In the background of this narrative is the history of Britain s imperial expansion and contraction and the evolution of modern tourism in the Eastern Mediterranean and Middle East. Archaeologists exploited these factors to gain public and financial support and interest and build and maintain a reading public for their work supported by the seasonal nature of excavation and tourism. Reinforcing these publishing activities through personal appearances in the lecture hall, exhibition space and site tour and in new media film, radio and television, archaeologists shaped public understanding of archaeology. It was spade-work scripted. The image of the archaeologist as adventurous explorer of foreign lands, part spy, part foreigner, eternally alluring, solidified during this period. That legacy continues undimmed today.

Praise for Archaeologists in Print This beautifully written book will be valued by all kinds of readers; you don t need to be an archaeologist to enjoy the contents which take you through different publishing histories of archaeological texts and the authors who wrote them. From the productive partnership of travel guide with archaeological interest to the women who feature so often in the history of archaeological publishing via closer analysis of the impact of John Murray, Macmillan and Co. and Penguin, this volume excavates layers of fascinating facts that reveal much of the wider culture of the late nineteenth and twentieth centuries. The prose is clear and the stories compulsive. Thornton brings to life a cast of people whose passion for their profession lives again in these pages.

Warning: the final chapter on Archaeological Fictions will fill your to be read list with stacks of new titles to investigate. This is a highly readable, accessible exploration into the dynamic relationships between academic authors, publishers and readers. It is, in addition, an exemplar of how academic research can attract a wide general readership as well as a more specialised one: a stellar combination of rigorous scholarship with lucid, pacy prose. Highly recommended.

Einstein's Wake Michael H. Whitworth, 2001-12-13

The revolution in literary form and aesthetic consciousness called modernism arose as the physical sciences were revising their most fundamental concepts: space, time, matter and the concept of science itself. The coincidence has often been remarked upon in general terms but rarely considered in detail. Einstein s Wake argues that the interaction of modernism and the new physics is best understood by reference to the metaphors which structured these developments. These metaphors, widely disseminated in the popular science writing of the period, provided a language with which modernist writers could articulate their responses to the experience of modernity. Beginning with influential aspects of nineteenth century physics, Einstein s Wake qualifies the notion that Einstein alone was responsible for literary relativity; it goes on to examine the fine detail of his legacy in literary appropriations of scientific metaphors with particular attention to Virginia

Woolf D H Lawrence Wyndham Lewis and T S Eliot Reimagining Dinosaurs in Late Victorian and Edwardian Literature Richard Fallon, 2021-11-04 When the term dinosaur was coined in 1842 it referred to fragmentary British fossils In subsequent decades American discoveries including Brontosaurus and Triceratops proved that these so called terrible lizards were in fact hardly lizards at all By the 1910s dinosaur was a household word Reimagining Dinosaurs in Late Victorian and Edwardian Literature approaches the hitherto unexplored fiction and popular journalism that made this scientific term a meaningful one to huge transatlantic readerships Unlike previous scholars who have focused on displays in American museums Richard Fallon argues that literature was critical in turning these extinct creatures into cultural icons Popular authors skilfully related dinosaurs to wider concerns about empire progress and faith some of the most prominent like Arthur Conan Doyle and Henry Neville Hutchinson also disparaged elite scientists undermining distinctions between scientific and imaginative writing The rise of the dinosaurs thus accompanied fascinating transatlantic controversies about scientific authority **Haig** Brian Bond, Nigel Cave, 2009-04-20 Field Marshal Earl Haig s reputation continues to arouse as much interest and controversy as ever This volume represents the collaboration of two leading historical societies The British Commission for Military History and The Douglas Haig Fellowship Leading historians have produced a comprehensive and fascinating study of the most significant and frequently debated aspects of Haig s momentous career Suscribing to Faith? The Anglican Parish Magazine 1859-1929 Jane Platt, 2016-01-12 This book reveals the huge sales and propagandist potential of Anglican parish magazines while demonstrating the Anglican Church s misunderstanding of the real issues at its heart and its collective collapse of confidence as it contemplated social change *The Laboratory Revolution and the Creation of the Modern University, 1830-1940* Klaas Berkel, Ernst Homburg, 2025-10-01 The modern research university originated in Europe in the second half of the nineteenth century largely due to the creation and expansion of the teaching and research laboratory The universities and the sciences underwent a laboratory revolution that fundamentally changed the nature of both This revolutionary development began in chemistry where Justus Liebig is credited with systematically employing his students in his ongoing research during the 1830s Later this development spread to other fields including the social sciences and the humanities The consequences for the universities were colossal The expansion of the laboratories demanded extensive new building programs reshaping the outlook of the university The social structure of the university also diversified because of this laboratory expansion while what it meant to be a scientist changed dramatically This volume explores the spatial social and cultural dimensions of the rise of the modern research laboratory within universities and their consequent reshaping *Femininity, Mathematics and Science, 1880-1914* C. Jones, 2009-10-15 Through the prism of gender this text explores the contrasting cultures and practice of mathematics and science and asks how they impacted on women Claire Jones assesses nineteenth century ideas about women s intellect femininity and masculinity and assesses how these attitudes shaped women s experiences as students and practitioners **Introducing Science through Images** Maria E.

Gigante,2018-06-01 An examination of how images can serve as communication tools to popularize science in the public eye As funding for basic scientific research becomes increasingly difficult to secure public support becomes essential Because of its promise for captivating nonexpert publics the practice of merging art and imagery with science has been gaining traction in the scientific community While images have been used with greater frequency in recent years their value is often viewed as largely superficial To the contrary Maria E Gigante posits in *Introducing Science through Images* the value of imagery goes far beyond mere aesthetics visual elements are powerful communication vehicles The images examined in this volume drawn from a wide range of historical periods serve an introductory function that is they appear in a position of primacy relative to text and like the introduction to a speech have the potential to make audiences attentive and receptive to the forthcoming content Gigante calls them portal images and explicates their utility in science communication both to popularize and mystify science in the public eye Gigante analyzes how science has been represented by various types of portal images frontispieces portraits of scientists popular science magazine covers and award winning scientific images from Internet visualization competitions Using theories of rhetoric and visual communication she addresses the weak connection between scientific communities and the public and explores how visual elements can best be employed to garner public support for research

Victorian Sensation James A. Secord,2024-05-31 Fiction or philosophy profound knowledge or shocking heresy When *Vestiges of the Natural History of Creation* was published anonymously in 1844 it sparked one of the greatest sensations of the Victorian era More than a hundred thousand readers were spellbound by its startling vision an account of the world that extended from the formation of the solar system to the spiritual destiny of humanity As gripping as a popular novel *Vestiges* combined all the current scientific theories in fields ranging from astronomy and geology to psychology and economics The book was banned it was damned it was hailed as the gospel for a new age This is where our own public controversies about evolution began In a pioneering cultural history James A Secord uses the story of *Vestiges* to create a panoramic portrait of life in the early industrial era from the perspective of its readers We join apprentices in a factory town as they debate the consequences of an evolutionary ancestry We listen as Prince Albert reads aloud to Queen Victoria from a book that preachers denounced as blasphemy vomited from the mouth of Satan And we watch as Charles Darwin turns its pages in the flea ridden British Museum library fearful for the fate of his own unpublished theory of evolution Using secret letters Secord reveals how *Vestiges* was written and how the anonymity of its author was maintained for forty years He also takes us behind the scenes to a bustling world of publishers printers and booksellers to show how the furor over the book reflected the emerging industrial economy of print Beautifully written and based on painstaking research *Victorian Sensation* offers a new approach to literary history the history of reading and the history of science Profusely illustrated and full of fascinating stories it is the most comprehensive account of the making and reception of a book other than the Bible ever attempted Winner of the 2002 Pfizer Award from the History of Science Society **The Victorian Press**

Domesticating Electricity Graeme Gooday, 2016-09-12 This is an innovative and original socio cultural study of the history of electricity during the late Victorian and Edward periods Gooday shows how technology authority and gender interacted in pre World War I Britain The rapid take up of electrical light and domestic appliances on

both sides of the Atlantic had a wide ranging effect on consumer habits and the division of labour within the home Electricity was viewed by non experts as potential threat to domestic order and welfare This broadly interdisciplinary study relates to a website developed by the author on the history of electricity

The Invention of Telepathy, 1870-1901 Roger Luckhurst, 2002 The Invention of Telepathy explores one of the enduring concepts to emerge from the late nineteenth century Telepathy was coined by Frederic Myers in 1882 He defined it as the communication of any kind from one mind to another independently of the recognised channels of sense By 1901 it had become a disputed phenomenon amongst physical scientists yet was the royal road to the unconscious mind Telepathy was discussed by eminent men and women of the day including Sigmund Freud Thomas Huxley Henry and William James Mary Kingsley Andrew Lang Vernon Lee W T Stead and Oscar Wilde Did telepathy signal evolutionary advance or possible decline Could it be a means of binding the Empire closer together or was it used by natives to subvert imperial communications Were women more sensitive than men and if so why Roger Luckhurst investigates these questions in an exciting and accessible study that mixes history of science with cultural history and literary analysis
