Medical Thinking A Historical Preface:

Medical Thinking Lester Snow King, 2014-07-14 Lester S King M D focuses on those aspects of medicine that remain constant through the centuries the problems that doctors always face and the critical judgment needed to solve them According to Dr King modern technological advances are really new ways of answering old questions while the basic modes of medical thinking have not changed Originally published in 1982 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *Medical Thinking* Lester Snow King, 1982 **Thinking with Cases** Charlotte Furth, Judith T. Zeitlin, Ping-chen Hsiung, 2007-02-28 Case studies fascinate because they link individual instances to general patterns and knowledge to action without denying the priority of individual situations over the generalizations derived from them In this volume an international group of senior scholars comes together to consider the use of cases to produce empirical knowledge in premodern China They trace the process by which the project of thinking with cases acquired a systematic and public character in the ninth century CE and after Premodern Chinese experts on medicine and law circulated printed case collections to demonstrate efficacy or claim validity for their judgments They were joined by authors of religious and philosophical texts The rhetorical strategies and forms of argument used by all of these writers were allied with historical narratives exemplary biographies and case examples composed as aids to imperial statecraft The innovative and productive explorations gathered here present a coherent set of interlocking arguments that will be of interest to comparativists as well as specialists on premodern East Asia For China scholars they examine the interaction of different fields of learning in the late imperial period the relationship of evidential reasoning and literary forms and the philosophical frameworks that linked knowledge to experience and action For comparativists the essays bring China into a global conversation about the methodologies of the human sciences Contributors Chu Honglam Charlotte Furth Hsiung Ping chen Jiang Yonglin Yasuhiko Karasawa Robert Sharf Pierre tienne Will WuYanhong Judith T Zeitlin Quo Vadis Medical Healing S. Elm, Stefan N. Willich, 2008-12-16 Medical healing implies knowledge of the assumptions that underlie our understanding of health and concomitantly how we define well being and its opposites illness and disease Today health health care business wellness recreation and medicine especially research driven scientific medicine have become separate entities with different institutions budgets marketing philosophies and corporate cultures Furthermore healing is individual and subjective yet at the same time also culturally determined The present volume brings together papers on these topics in a unique interdisciplinary approach The book provides an ethical framework for healthcare from a political perspective It discusses definitions of the terminology of healing and health and their ethical and

medical implications including their historical contexts A separate section expands the theme of the cultural constructedness of healing by the concepts of traditional Chinese medicine and homeopathy Modern medicine has a strong focus on acute care which urgently needs to place greater emphasis on preventive medicine including the crucial importance of social factors on health and on the emergence of public health The point of view of Business Concepts their potential and limitations are by no means neglected and the legal ramifications of genetic research and innovative medical strategies with regard to some of our most foundational notions are discussed

Elisha Bartlett's Philosophy of Medicine William Stempsey, 2005-06-14 The idea of preparing a new critical edition of Elisha Bartlett's Essay on the Philosophy of Medical Science was suggested to me several years ago by Dr H Tristram Engelhardt Jr Since that time it has been a pleasure to get to know the life and work of Elisha Bartlett I am pleased to be completing this book in the bicentennial year of Bartlett's birth Bartlett was born in 1804 in Smithfield Rhode Island less than twenty five miles from Worcester Massachusetts my present home a short journey even in Bartlett's day I have been able to walk at some of the sites to which Bartlett continually returned during his life Visiting Bartlett's grave in the Slatersville cemetery has been an inspiration for the preparation of this book Proximity to several institutions with rich holdings in Bartlett's works and in nineteenth century American history of medicine greatly facilitated my research First though I want to acknowledge the College of the Holy Cross for supporting my sabbatical leave for the academic year 2003 2004 The American Antiquarian Society in Worcester Massachusetts was generous in giving me access to its remarkable resources I was able to find many of Bartlett's published works and other nineteenth century medical literature there and the entire library staff provided quick and able research assistance

Doctor of Society Roy Porter, 2016-10-04 First published in 1992 this book explores how we come to hold our present attitudes towards health sickness and the medical profession Roy Porter argues that the outlook of the age of Enlightenment was crucially important in the creation of modern thinking about disease doctors and society To illustrate this viewpoint he focuses on Thomas Beddoes a prominent doctor of the eighteenth century and examines his challenging pugnacious radical and often amusing views on a wide range of issues concerning the place of illness and medicine in society Many modern debates in medicine continue to echo the topics which Beddoes himself discussed in his ever trenchant and provocative manner This book will be of interest to those studying the history of medicine social history and the Enlightenment

Handbook of Constructionist Research James A. Holstein, Jaber F. Gubrium, 2013-10-21 Constructionism has become one of the most popular research approaches in the social sciences But until now little attention has been given to the conceptual and methodological underpinnings of the constructionist stance and the remarkable diversity within the field This cutting edge handbook brings together a dazzling array of scholars to review the foundations of constructionist research how it is put into practice in multiple disciplines and where it may be headed in the future The volume critically examines the analytic frameworks strategies of inquiry and methodological choices that together form the mosaic of contemporary

constructionism making it an authoritative reference for anyone interested in conducting research in a constructionist vein

The Shape of Spectatorship Scott Curtis, 2015-09-22 Scott Curtis draws our eye to the role of scientific medical educational and aesthetic observation in shaping modern spectatorship Focusing on the nontheatrical use of motion picture technology in Germany between the 1890s and World War I he follows researchers teachers and intellectuals as they negotiated the fascinating at times fraught relationship between technology discipline and expert vision As these specialists struggled to come to terms with motion pictures they advanced new ideas of mass spectatorship that continue to affect the way we make and experience film Staging a brilliant collision between the moving image and scientific or medical observation visual instruction and aesthetic contemplation *The Shape of Spectatorship* showcases early cinema s revolutionary impact on society and culture and the challenges the new medium placed on ways of seeing and learning

Handbook of Narratology Peter Hühn, Jan Christoph Meister, John Pier, Wolf Schmid, 2014-10-10 This handbook provides a systematic overview of the present state of international research in narratology and is now available in a second completely revised and expanded edition Detailed individual studies by internationally renowned narratologists elucidate central terms of narratology present a critical account of the major research positions and their historical development and indicate directions for future research

Bittersweet Chris Feudtner, 2004-01-21 One of medicine s most remarkable therapeutic triumphs was the discovery of insulin in 1921 The drug produced astonishing results rescuing children and adults from the deadly grip of diabetes But as Chris Feudtner demonstrates the subsequent transformation of the disease from a fatal condition into a chronic illness is a story of success tinged with irony a revealing saga that illuminates the complex human consequences of medical intervention *Bittersweet* chronicles this history of diabetes through the compelling perspectives of people who lived with this disease Drawing on a remarkable body of letters exchanged between patients or their parents and Dr Elliot P Joslin and the staff of physicians at his famed Boston clinic Feudtner examines the experience of living with diabetes across the twentieth century highlighting changes in treatment and their profound effects on patients lives Although focused on juvenile onset or Type 1 diabetes the themes explored in *Bittersweet* have implications for our understanding of adult onset or Type 2 diabetes as well as a host of other diseases that thanks to drugs or medical advances are being transformed from acute to chronic conditions Indeed the tale of diabetes in the post insulin era provides an ideal opportunity for exploring the larger questions of how medicine changes our lives

Medicine and Society in Early

Modern Europe Mary Lindemann, 2010-07 A concise and accessible introduction to health and healing in Europe from 1500 to 1800

Staying Human during Residency Training Allan D. Peterkin, MD, Derek Puddester, MD, 2024-03-26 The ultimate survival guide for medical students interns residents and fellows *Staying Human during Residency Training* provides time tested advice and the latest information on every aspect of a resident s life from choosing a residency program to coping with stress enhancing self care and protecting personal and professional relationships The book features hundreds of tips on

how to cope with sleep deprivation time pressures and ethical and legal issues Updated to reflect the latest research and resources the seventh edition provides new emphasis on virtual practice gender diversity and accountability in the context of medical education It offers practical strategies learned from new technologies and new insight on the COVID 19 pandemic regarding public health virtual appointment protocols and AI developments Presenting practical antidotes regarding cynicism careerism and burnout the book also offers guidance on fostering more empathic connections with patients and deepening relationships with colleagues friends and family Acknowledged by thousands of doctors across North America as an invaluable resource Staying Human during Residency Training has helped to shape notions of trainee well being for medical educators worldwide Offering wise compassionate and professional counsel this new edition again shows why it is required reading for medical students and new physicians pursuing postgraduate training

Cholera, Chloroform, and the Science of Medicine Peter Vinten-Johansen, Howard Brody, Nigel Paneth, Stephen Rachman, Michael Rip, David Zuck, 2003-05-01 The product of six years of collaborative research this fine biography offers new interpretations of a pioneering figure in anesthesiology epidemiology medical cartography and public health It modifies the conventional rags to riches portrait of John Snow by synthesizing fresh information about his early life from archival research and recent studies It explores the intellectual roots of his commitments to vegetarianism temperance and pure drinking water first developed when he was a medical apprentice and assistant in the north of England The authors argue that all of Snow's later contributions are traceable to the medical paradigm he imbibed as a medical student in London and put into practice early in his career as a clinician that medicine as a science required the incorporation of recent developments in its collateral sciences chiefly anatomy chemistry and physiology in order to understand the causes of disease Snow's theoretical breakthroughs in anesthesia were extensions of his experimental research in respiratory physiology and the properties of inhaled gases Shortly thereafter his understanding of gas laws led him to reject miasmatic explanations for the spread of cholera and to develop an alternative theory in consonance with what was then known about chemistry and the physiology of digestion Using all of Snow's writings the authors follow him when working in his home laboratory visiting patients throughout London attending medical society meetings and conducting studies during the cholera epidemics of 1849 and 1854 The result is a book that demythologizes some overly heroic views of Snow by providing a fairer measure of his actual contributions It will have an impact not only on the understanding of the man but also on the history of epidemiology and medical science

Genetic Medicine Barton Childs, 2003-09-15 In *Genetic Medicine A Logic of Disease* Barton Childs demonstrates that knowledge of the ways both genes and environment contribute to disease provides a rational basis for medical thinking This genetic medicine he explains should help the physician use the results of laboratory tests to perceive the uniqueness of the patient as well as that of the family and the cultural conditions in which the patient's condition arose Childs thus provides a conceptual framework within which to teach and practice a humane medicine

Romantic Medicine and John Keats Hermione De

Almeida,1991 Using original research in scientific treatises philosophical manuscripts and political documents this pioneering study describes the neglected era of revolutionary medicine in Europe through the writings of the English poet and physician John Keats De Almeida explores the four primary concerns of Romantic medicine the physician s task the meaning of life the prescription of disease and health and the evolution of matter and mind and reveals their expression in Keats s poetry and thought By delineating a distinct but unknown era in the history of medicine charting the poet s milieu within this age and providing close reading of his poems in these contexts Romantic Medicine and John Keats illustrates the interdisciplinary bonds between the two healing arts of the Romantic period medicine and poetry *Diseases in the District of Maine 1772 - 1820* Richard J. Kahn,2020 Jeremiah Barker Background Education and Writings Obtaining and Sharing Medical Literature 1780 1820 The Old Medicine and the New why Barker wrote this manuscript for whom was it written and why was it not published Alkaline Doctor and A Dangerous Innovator Thoughts to Consider While Reading Barker s Manuscript *Discovering Design* Richard Buchanan,Victor Margolin,1995-04-15 Discovering Design reflects the growing recognition that the design of the everyday world deserves attention not only as a professional practice but as a subject of social cultural and philosophic investigation Victor Margolin cofounder and an editor of the journal Design Issues and Richard Buchanan also an editor of the journal bring together eleven essays by scholars in fields ranging from psychology sociology and political theory to technology studies rhetoric and philosophy The essayists share the editors concern first made clear in Margolin s Design Discourse History Theory Criticism with the the development of design studies as a field of interdisciplinary research The contributors Gianfranco Zaccai Albert Borgmann Richard Buchanan Augusto Morello Tufan Orel Nigel Cross Victor Margolin Langdon Winner Carl Mitcham Tony Fry and Ezio Manzini focus on three broad themes that form a sequence of fundamental issues how to shape design as a subject matter how to distinguish the activity of designing in the complex world of action and how to address the basic questions of value and responsibility that persistently arise in the discussion and practice of design The editors introduction provides a useful overview of these questions and offers a multidisciplinary framework for design studies The essays discuss such topics as the relation of aesthetics to technology the place of design in social action the role of the consumer in design decisions and the need for ethical practice in contemporary design Manzini s concluding essay shows how the issue of ethics should connect responsible behavior to decisions made every day in the manufacture of objects *Doctors' Stories* Kathryn Montgomery Hunter,2020-06-30 A patient s job is to tell the physician what hurts and the physician s job is to fix it But how does the physician know what is wrong What becomes of the patient s story when the patient becomes a case Addressing readers on both sides of the patient physician encounter Kathryn Hunter looks at medicine as an art that relies heavily on telling and interpreting a story the patient s story of illness and its symptoms *The Educated Eye* Nancy A. Anderson,2012 The creation and processing of visual representations in the life sciences is a critical but often overlooked aspect of scientific pedagogy The Educated Eye follows the nineteenth

century embrace of the visible in new spectatoria or demonstration halls through the twentieth century cinematic explorations of microscopic realms and simulations of surgery in virtual reality With essays on Doc Edgerton s stroboscopic techniques that froze time and Eames s visualization of scale in Powers of Ten among others contributors ask how we are taught to see the unseen *Consumption and Literature* C. Lawlor, 2006-10-31 This book seeks to explain how consumption a horrible disease came to be the glamorous and artistic Romantic malady It tries to explain the disparity between literary myth and bodily reality by examining literature and medicine from the Renaissance to the late Victorian period covering a wide range of authors and characters
