Practical Medicine from Salerno to the Black Death Luis García Ballester, 1994 Essays on the practical aspects of medieval European medicine

Renaissance Surgeons Kristy Wilson Bowers, 2022-11-09 This book examines the lives careers and publications of a group of Spanish Renaissance surgeons as exemplars of both the surgical renaissance occurring across Europe and of the unique context of Spain In the sixteenth century European surgeons forged new identities as learned experts who combined university medical degrees with manual skills and practical experience No longer merely apprentice trained craftsmen engaged only with healing the exterior wounds and rashes of the body these learned surgeons actively engaged with the epistemic shifts of the sixteenth century including new forms of knowledge construction based in empiricism and knowledge circulation based in printing These surgeons have long been overshadowed by the innovative work of anatomists and botanists but were participants in the same intellectual currents reshaping many aspects of knowledge Active in communities across both Castile and Aragon learned surgeons formed an intellectual community of practitioners and scholars who helped reshape surgical knowledge and practice This book provides an overview of the Spanish learned surgeons known as *médicos y cirujanos* who were influential in universities on battlefields at court and in private practice It argues that the surgeons larger significance rests in their collective identity as part of the broader intellectual shift to empiricism and innovation of the Renaissance

Renaissance Surgeons Learning and Expertise in the Age of Print is essential reading for upper level students and scholars of the history of medicine and early modern Spain

Intercultural Contacts in the Medieval Mediterranean Benjamin Arbel, 2013-04-15 These essays by medievalists touch upon many aspects of intercultural links in the medieval Mediterranean covering not only strictly cultural and religious contacts but also political military ethnic social institutional scientific and technological relationships

Medicine in a Multicultural Society Luis García-Ballester, 2024-12-11 The present collection by Professor García Ballester deals with medicine and science i.e. natural philosophy in the Spanish kingdoms of Castile and Aragon between the 13th and the 17th centuries It includes a new English version of a major study first published in Spanish While sharing much including Galenism which is the subject of a further collection as a dominant medical doctrine with other parts of medieval and Renaissance Europe Spain was unique in having a medical marketplace uniting Christian Jewish Muslim and converso practitioners The complex processes of cultural interchange that resulted form the main theme in this book Together these studies have thrown new light on problems of theory and practice perceptions of health and disease and the doctor patient relationship as well as on the social and legal settings where the healers physicians surgeons barbers and apothecaries of these different religious communities were at work

The Measure of Multitude Peter Biller, 2000 This innovative study

challenges the view that medieval thought was fundamentally abstract He describes what medieval people thought about population studying the texts which contained their thought and examining the medieval realities which shaped it such as birth birth control sex ratio marriage ages length of life and the population of the Holy Land Medieval and Early Renaissance Medicine Nancy G. Siraisi, 2009-05-15 Western Europe supported a highly developed and diverse medical community in the late medieval and early Renaissance periods In her absorbing history of this complex era in medicine Siraisi explores the inner workings of the medical community and illustrates the connections of medicine to both natural philosophy and technical skills **Art of Illness** Wendy J. Turner, 2023-12-01 There is a long history of inventing illness such as pretending to be sick for attention or accusing others of being ill This volume explores the art of illness and the deceptions and truths around health and bodies from a multiplicity of angles from antiquity to the present The chapters which are based on primary source evidence ranging from antiquity to the late twentieth century are divided into three sections The first part explores how the idea of faking illness was understood and conceptualized across multiple fields locations and time periods The second part uses case studies to emphasize the human element of those at the center of these narratives and how their behavior was shaped by societal attitudes The third part investigates the development of regulations and laws governing malingering and malingerers Altogether they paint a picture of humans doing human actions cheating lying stealing but also hiding surviving working This book's careful accessible scholarship is a valuable resource for academics scientists and the sophisticated undergraduate audience interested in malingering narratives throughout history

Bibliography of the History of Medicine, 1990 **Medicine, Government and Public Health in Philip II's Spain** Michele L. Clouse, 2016-04-22 Bridging the gap between histories of medicine and political institutional histories of the early modern crown this book explores the relationship between one of the most highly bureaucratic regimes in early modern Europe Spain and crown interest in and regulation of medical practices Complementing recent histories that have emphasized the interdependent nature of governance between the crown and municipalities in sixteenth century Spain this study argues that medical policies were the result of negotiation and cooperation among the crown the towns and medical practitioners During the reign of Philip II 1556-1598 the crown provided unique opportunities for advancements in the medical field among practitioners and support for the creation and dissemination of innovative medical techniques In addition crown support for and regulation of medicine served as an important bureaucratic tool in the crown's effort to expand and solidify its authority over the distinct kingdoms and territories under Castilian authority and the municipalities within the kingdom of Castile itself The crown was not the only agent of change in the medical world however Medical policies and their successful implementation required consensus and cooperation among competing political authorities Bringing to life a cast of characters from early modern Spain from the female empiric who practiced bonesetting and surgery to the university trained Latin physician whose medical textbook standardized medical education in the universities the book

will broaden the scope of medical history to include not only the development of medical theory and innovative practice but also address the complex tensions between various authorities which influenced the development and nature of medical practice and perceptions of public health in early modern Europe Juxtaposing the history of medicine with the history of early modern state building brings a unique perspective to this challenging book that reassesses the relationship between the monarch and intellectual milieu of medicine in Spain It further challenges the dominance of studies of medical regulation from France and England and illuminates a diverse and innovative world of Spanish medical practice that has been neglected in standard histories of early modern medicine

Medicine and the Reformation Andrew Cunningham, Ole Peter Grell, 2013-05-13 The tremendous changes in the role and significance of religion during Reformation and the Catholic Counter Reformation affected all of society Yet there have been few attempts to view medicine and the ideas underpinning it within the context of the period and see what changes it underwent Medicine and the Reformation charts how both popular and official religion affected orthodox medicine as well as more popular healers Illustrating the central part played by medicine in Lutheran teachings the Calvinistic rationalization of disease and the Catholic responses the contributors offer new perspectives on the relation of religion and medicine in the early modern period It will be of interest to social historians as well as specialists in the history of medicine

Caring for the Living Soul Naama Cohen-Hanegbi, 2017-05-08 Caring for the Living Soul identifies the fundamental role emotions played in the development of learned medicine and in the formation of the social role of the physicians of the body in the western Mediterranean between 1200 and 1500 The book explores theoretical debates and practical advice concerning the treatment of the accidentia anime in diverse medical sources Contextualizing this literature within the developments in natural philosophy and pastoral theology during the period and alongside local and social contexts of medical practice emotions are revealed to have been a malleable topic through which change and innovation in the field of medicine transpired Bringing together a wide range of untapped sources and creating connections between emotions religious authorities and medical practitioners this study sheds light on the centrality of the discourses of emotions to the formation of the social fabric

Women's Healthcare in the Medieval West Monica H. Green, 2024-10-28 In this collection of seven major essays one of them published here for the first time Monica Green argues that a history of women's healthcare in medieval western Europe has not yet been written because it cannot yet be written the vast majority of texts relating to women's healthcare have never been edited or studied Using the insights of women's history and gender studies Green shows how historians need to peel off the layers of unfounded assumption and stereotype that have characterized the little work that has been done on medieval women's healthcare Seen in their original contexts medieval gynecological texts raise questions of women's activity as healthcare providers and recipients as well as questions of how the sexual division of labor literacy and professionalization functioned in the production and use of medical knowledge on the female body An

appendix lists all known medieval gynecological texts in Latin and the western European vernacular languages Iberia and the Mediterranean World of the Middle Ages, Volume II Kagay, Padilla, Paul Chevedden, 2021-09-20 Brill's series The Medieval Mediterranean has established itself as the main forum for studies exploring all aspects of the Mediterranean world during a period of 1000 years In the medieval period the Mediterranean experienced a multiplicity of developments in social political and economic structures and in populations religions and cultures The centuries between the Late Roman world of the fourth and fifth century and the early modern Braudelian Mediterranean of the sixteenth century were characterised by sweeping changes including the establishment of post Roman kingdoms in the west the emergence of Slav societies in the Balkans the struggle between Christians and Muslims in Spain and the movement of crusaders Founded in 1993 The Medieval Mediterranean series reflects the complexity of this period with a wide variety of high quality scholarly works from broad surveys to diachronic studies of particular areas or cities investigations of individual themes or issues conference proceedings text editions and fully annotated translations Top specialists in a range of fields have contributed to the series and the volumes which have appeared so far have been warmly welcomed by reviewers This series is indispensable for readers with interests in the history of later antiquity the Middle Ages Byzantium Islam the Balkans and the Black Sea area Publication schedule At present 3 volumes of around 350 pages each are published in the series each year The vast majority of the books in the series are in the English language although works of outstanding quality in French or German may also be included Volumes contain illustrations and maps where appropriate **The Literature of Misogyny in Medieval Spain** Michael Solomon, 1997-11-13 An examination of two fifteenth century misogynist Iberian works **Setting Performance Standards** Gregory J. Cizek, 2001-03-01 This volume brings together current concrete information regarding the newest standard setting methods The need for standard setting spans a range of context from elementary school to the professions education commercial applications government private organizations **Communities of Violence** David Nirenberg, 2015-05-26 In the wake of modern genocide we tend to think of violence against minorities as a sign of intolerance or even worse a prelude to extermination Violence in the Middle Ages however functioned differently according to David Nirenberg In this provocative book he focuses on specific attacks against minorities in fourteenth century France and the Crown of Aragon Aragon Catalonia and Valencia He argues that these attacks ranging from massacres to verbal assaults against Jews Muslims lepers and prostitutes were often perpetrated not by irrational masses laboring under inherited ideologies and prejudices but by groups that manipulated and reshaped the available discourses on minorities Nirenberg shows that their use of violence expressed complex beliefs about topics as diverse as divine history kinship sex money and disease and that their actions were frequently contested by competing groups within their own society Nirenberg's readings of archival and literary sources demonstrates how violence set the terms and limits of coexistence for medieval minorities The particular and contingent nature of this coexistence is underscored by the book's juxtapositions some systematic for example that of the Crown of

Aragon with France Jew with Muslim medieval with modern and some suggestive such as African ritual rebellion with Catalan riots Throughout the book questions the applicability of dichotomies like tolerance versus intolerance to the Middle Ages and suggests the limitations of those analyses that look for the origins of modern European persecutory violence in the medieval past

Medieval Medicine Faith Wallis, 2010-01-01 In this collection of over 100 primary sources many translated for the first time Faith Wallis reveals the dynamic world of medicine in the Middle Ages that has been largely unavailable to students and scholars

Making Women's Medicine Masculine Monica H. Green, 2008-03-20 Making Women's Medicine Masculine challenges the common belief that prior to the eighteenth century men were never involved in any aspect of women's healthcare in Europe Using sources ranging from the writings of the famous twelfth century female practitioner Trota of Salerno all the way to the great tomes of Renaissance male physicians and covering both medicine and surgery this study demonstrates that men slowly established more and more authority in diagnosing and prescribing treatments for women's gynaecological conditions especially infertility and even certain obstetrical conditions Even if their hands on knowledge of women's bodies was limited by contemporary mores men were able to establish their increasing authority in this and all branches of medicine due to their greater access to literacy and the knowledge contained in books whether in Latin or the vernacular As Monica Green shows while works written in French Dutch English and Italian were sometimes addressed to women nevertheless even these were often re appropriated by men both by practitioners who treated women and by laymen interested to learn about the secrets of generation While early in the period women were considered to have authoritative knowledge on women's conditions hence the widespread influence of the alleged authoress Trotula by the end of the period to be a woman was no longer an automatic qualification for either understanding or treating the conditions that most commonly afflicted the female sex with implications of women's exclusion from production of knowledge on their own bodies extending to the present day
