**Sociology for Human Rights** David Brunsma,Keri Iyall Smith,Brian Gran,2019-07-19 As sociologists deepen their examinations of human rights in their teaching research and thinking it is essential that such work is conducted in a manner that is both mindful and critical of the knowledge we are building upon in sociology and human rights As the authors of this volume reveal creating sociological knowledge that examines human rights for the expansion of human rights is something that sociologists are well equipped to undertake whether through the use of mathematics comparative historical analysis the study of emotions conversations or social psychology In these chapters you will find the roots of the study of human rights deep within sociological research and thinking as well as emerging techniques that will push the discipline as it seeks to expand understanding of human rights together with so many other aspects of the social condition

**Movements for Human Rights** David L. Brunsma,Keri Iyall Smith,Brian Gran,2016-09-07 How do people work together to advance human rights Do people form groups to prevent human rights from being enforced Why In what ways do circumstances matter to the work of individuals collectively working to shape human rights practices Human society is made of individuals within contexts tectonic plates not of the earth s crust but of groups and individuals who scrape and shift as we bump along competing for scarce resources and getting along These movements large and small are the products of actions individuals take in communities within families and legal structures These individuals are able to live longer yet continue to remain vulnerable to dangers arising from the environment substances struggles for power and a failure to understand that in most ways we are the same as our neighbors Yet it is because we live together in layers of diverse communities that we want our ability to speak to be unhindered by others use spirituality to help us understand ourselves and others possess a space and objects that are ours alone and join with groups that share our values and interests including circumstances where we do not know who our fellow neighbor is For this reason sociologists have identified the importance of movements and change in human societies When we collaborate in groups individuals can change the contours of their daily lives Within this book you will find the building blocks for human rights in our communities To understand why sometimes we enjoy human rights and

other times we experience vulnerability and risk sociologists seek to understand the individual within her context Bringing together prominent sociologists to grapple with these questions **Movements for Human Rights Locally and Globally** offers insights into the ways that people move for and against human rights **Neurodiversity Studies** Hanna Rosqvist, Nick Chown, Anna Stenning, 2020-06-02 Building on work in feminist studies queer studies and critical race theory this volume challenges the universality of propositions about human nature by questioning the boundaries between predominant neurotypes and others including dyslexics autistics and ADHDers This is the first work of its kind to bring cutting edge research across disciplines to the concept of neurodiversity It offers in depth explorations of the themes of cure prevention eugenics neurodivergent wellbeing cross neurotype communication neurodiversity at work and challenging brain bound cognition It analyses the role of neuro normativity in theorising agency and a proposal for a new alliance between the Hearing Voices Movement and neurodiversity In doing so we contribute to a cultural imperative to redefine what it means to be human To this end we propose a new field of enquiry that finds ways to support the inclusion of neurodivergent perspectives in knowledge production and which questions the theoretical and mythological assumptions that produce the idea of the neurotypical Working at the crossroads between sociology critical psychology medical humanities critical disability studies and critical autism studies and sharing theoretical ground with critical race studies and critical queer studies the proposed new field neurodiversity studies will be of interest to people working in all these areas Chapter 7 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license **Medical Sociology** William C. Cockerham, 2017-04-21 The most thorough major academic textbook available this classic text presents the most important research studies in the field The author also integrates engaging first person accounts from patients physicians and other health care providers throughout the text A much greater number of first person accounts and updated examples are added to the new fourteenth edition Other updates include Coverage of Zika Ebola MERS and updates on other pandemics Expanded discussion of obesity as a disease Coverage of the widening gap in life expectancy between the rich and the poor New information on the decline of life expectancy among American white women especially those who live in rural counties New material on biomarkers gene environment interaction and stress Analysis of the role of the hidden curriculum in medical schools Exiting the Affordable Care Act **The Sociology of Health and Illness** Peter Conrad, Valerie Leiter, 2023-06-12 This anthology for Medical Sociology courses brings together a collection of readings from the scholarly literature on health medicine and health care covering some of the most timely health issues of our day **New Directions in the Sociology of Chronic and Disabling Conditions** G. Scambler, 2016-04-30 Bringing together disability theorists and medical sociologists for the first time in this cutting edge collection contributors examine chronic illness and disability disability theory doctor patient encounters lifeworld issues and the new genetics **Institutions Unbound** David Brunsma, Keri Iyall Smith, Brian

Gran,2016-03-02 Institutions like education family medicine culture and law are powerful social structures shaping how we live together As members of society we daily express our adherence to norms and values of institutions as we consciously and unconsciously reject and challenge them Our everyday experiences with institutions not only shape our connections with one another they can reinforce our binding to the status quo as we struggle to produce social change Institutions can help us do human rights Institutions that bridge nation states can offer resources including norms to advance human rights These institutions can serve as touch stones to changing minds and confronting human rights violations Institutions can also prevent us from doing human rights We create institutions but institutions can be difficult to change Institutions can weaken if not outright prevent human rights establishment and implementation To release human rights from their institutional bindings sociologists must solve riddles of how institutions work and determine social life This book is a step forward in identifying means by which we can loosen human rights from institutional constraints      **Medical Law and Ethics** Jonathan Herring,2025
