[A Field Notebook for Oral History](#)

Stacy Erickson,1996-02 Presents in simple outline form basic information about the oral history process. A step-by-step outline to procedures, techniques, problems, and organizational methods which have proved most useful. Primarily directed towards those who have no experience with oral history. The book provides a structured methodology for building interest and trust among veterans to conduct interviews, design oral history projects, and archive and use these oral history interviews. It includes background on the evolution of veterans' oral history, the nuts and bolts of interviewing, ethical guidelines, procedures, and the overall value of veterans' oral history. The methodology emphasizes how memory evolves over the years when a veteran becomes more distant from the events of war; the experiences become individualized and personalized for each veteran based on location, time, place, and purpose of their service. The book also aims to improve understanding of the personal, ethical, and psychological issues involved in listening compassionately to veterans' stories that may contain issues of trauma, gender, socioeconomics, race, disability, and ethnicity. Practicing Oral History with Military and War Veterans is an invitation to community scholars, students, oral historians, and families of veterans to actively participate in the oral history process and to embrace methodology that may help with designing and conducting oral history projects and interviewing war veterans. *Oral history in South Africa* Sekgothe

Mokoatšana,2025-05-06 Colonial and apartheid era historical narratives in South Africa often disregard oral testimonies, leaving significant gaps in understanding the country's rich and complex past. This scholarly book explores the methodologies

and ethics of oral history to address these omissions and to elevate oral testimonies as vital tools in historical scholarship. This book brings together ten chapters authored by leading academics and researchers. It critically examines how oral history methodologies can be contextualised within South Africa's diverse and multifaceted society. Rather than focusing on Eurocentric approaches, it emphasises the need to rethink the ethics and practices of oral history from an Afrocentric perspective. Through its transdisciplinary and interdisciplinary lens, spanning history, indigenous knowledge studies, museum and archival studies, and folklore, this book advocates for the recognition of interviewees as knowledge holders, fostering meaningful exchanges rather than mere knowledge extraction. The authors emphasise the need to protect and expand oral history archives, ensuring the representation of marginalised voices and redressing past injustices. With original research, this volume sheds light on the transformative potential of oral history in South Africa, offering new arguments and perspectives. It aims to inspire scholars, researchers, and specialists to rethink conventional practices and to bridge the divide between written and oral histories. This is essential literature for scholars and practitioners in history, oral history, theology, museum studies, and related fields, as it reimagines the role of oral testimonies in producing inclusive and credible historical narratives.
