Management Quality and Competitiveness Christoph H. Loch, Stephen Chick, Arnd Huchzermeier, 2008-06-24 He who stops getting better has stopped being good Hans Schneider General Manager of the Siemens Amberg Electronics Factory Industrial Excellence Award overall winner 2007 There is a general perception that inflexible labor markets and high labor costs are contributing to a massive displacement of manufacturing jobs and

investment from Western Europe to Eastern Europe and Asia The debate in Western Europe is highly charged but sometimes ill informed It is true that some low skilled jobs are moving into low labor cost countries On the other hand many more highly skilled jobs are actually being created in the highly developed countries The total impact on Western economies is much more complicated and there is some evidence of important benefits In this book we showcase examples of excellent industrial management that has managed to create substantial job growth in manufacturing This book is based on 14 years observation of the Industrial Excellence Award IEA in Germany and France the first ten years of which we summarized in our previous book Industrial Excellence Springer 2003 and on an additional five years of observation between 2002 and 2007 We have seen that management's first and noble responsibility to society is to achieve competitiveness Competitive organizations create growth and jobs even in Western Europe Competitiveness requires clearly articulated strategic positioning together with excellent execution and mobilization of all employees to apply their abilities and to pull in one direction
