Rebuilding the United States Douglas W. Sabbag, 2016-01-25 Rebuilding the United States is a cohesive common sense based list of improvements for the United States of America The ultimate purpose is to improve the health and success of the American Middle Class By extension if these goals are realized the American Dream may once again be enjoyed by the majority of Americans not just the elite Some people might suggest that America is doing fine and doesn't need to be rebuilt But there are too many statistics graphics general information empirical observations and warning signs which conflict with that belief And if nothing else I doubt many would argue that there isn't plenty of room for improvement Please read on to see what I have in mind per our Principles and good old American common sense We can rebuild our country for our mutual benefit including the Special Interests since what is best for us the average citizens is best for them too **Breathtaking**

Krassel,2011-01-19 An analysis of how America through its misguided and bankrupt economic financial and foreign policies and alliances has allowed China and its citizens to prosper at the expense and suffering of Americans who are picking up most of the global economic rehabilitation tab The ongoing domestic foreign economic and geopolitical policy failures of career politicians in Washington D C financed by their Wall Street backers and executed by their politically connected incompetent bureaucrats charged with implementing the congressional and presidential non starters are graphically analyzed and described America s career politicians and corporate titans are blamed directly for their stupid and misguided policies While America has spent more than 10 billion to 15 billion a month for five years on the wars in Iraq and Afghanistan

and continues to do so China has spent the same amount of money on education developing new technologies and building state of the art infrastructure relevant to the 21st century It doesn't take much to figure out which country made the better investment The 2008 Beijing Olympics where China won more gold medals than the U S are a reaction on how China has raised its game in the daily global competition for economic political and sports supremacy not military China is not a military threat to America China and America differ in their geopolitical and domestic approach and how each country's soldiers must serve their citizens Two visually poignant pictures of which country uses its armed forces more productively are the images of the People's Liberation Army helping the victims of the devastating Sichuan earthquake in 2008 and removing the masses of algae from a beach in Qingdao where the Olympic sailing events took place What a contrast to America scrambling to find emergency personnel to help out in the aftermath of Hurricane Katrina America is now playing catch up with its economic stimulus package in an effort to continue to be a relevant global inter local power America and China can continue to learn from each other as their people and economies become more intertwined Both countries must join hands to lead the world through climate economic and political change in the 21st century as true political partners to ensure that the world avoids Armageddon

Encyclopedia of Consumption and Waste Carl A. Zimring, William L. Rathje, Consulting Editor, 2012-02-27 Archaeologists and anthropologists have long studied artifacts of refuse from the distant past as a portal into ancient civilizations but examining what we throw away today tells a story in real time and becomes an important and useful tool for academic study Trash is studied by behavioral scientists who use data compiled from the exploration of dumpsters to better understand our modern society and culture Why does the average American household send 470 pounds of uneaten food to the garbage can on an annual basis How do different societies around the world cope with their garbage in these troubled environmental times How does our trash give insight into our attitudes about gender class religion and art The Encyclopedia of Consumption and Waste explores the topic across multiple disciplines within the social sciences and ranges further to include business consumerism environmentalism and marketing to comprise an outstanding reference for academic and public libraries
