Promise And Peril Of Environmental Justice:

The Promise and Peril of Environmental Justice Christopher H. Foreman, 2011-02-01 Are we environmentally victimizing perhaps even poisoning our minority and low income citizens Proponents of environmental justice assert that environmental decisionmaking pays insufficient heed to the interests of those citizens disproportionately burdens their neighborhoods with hazardous toxins and perpetuates an insidious environmental racism In the first book length critique of environmental justice advocacy Christopher Foreman argues that it has cleared significant political hurdles but displays substantial limitations and drawbacks Activism has yielded a presidential executive order management reforms at the Environmental Protection Agency and numerous local political victories Yet the environmental justice movement is structurally and ideologically unable to generate a focused policy agenda The movement refuses to confront the need for environmental priorities and trade offs politically inconvenient facts about environmental health risks and the limits of an environmental approach to social justice Ironically environmental justice advocacy may also threaten the very constituencies it aspires to serve distracting attention from the many significant health hazards challenging minority and disadvantaged populations Foreman recommends specific institutional reforms intended to recast the national dialogue about the stakes of these populations in environmental protection

Access to Environmental Justice Andrew Harding, 2007 Although it is commonly asserted that enhanced citizen participation results in better environmental policy and improved enforcement of environmental standards this hypothesis has rarely been subject to testing on a comparative basis The contributors to this book set out to study the extent to which citizens can and do exert influence over their urban environments through the legal and extra legal gateways in eleven countries spanning several continents as well as different

climates levels and type of economic development and national legal and constitutional systems as well as exhibiting a different set of environmental problems One interviewee questioned about access to environmental justice dryly remarked that in his city there was no environment no justice and no access to either Yet this view as will be seen requires to be nuanced While few people will be surprised by the finding that legal gateways to environmental justice are largely ineffective the reasons for this are revealing but also the richness of detail and the comparisons between the different countries and also the positive aspects which surfaced in several instances were indeed both encouraging and sometimes surprising This book presents the first comparative survey of access to environmental justice and will be of considerable use to lawyers policy makers activists and scholars who are concerned with the environmental issues which so profoundly affect and afflict our habitat and conditions of social justice throughout the world

Democracy and the Claims of Nature Ben A. Minteer, Bob Pepperman Taylor, 2002 In *Democracy and the Claims of Nature* the leading thinkers in the fields of environmental political and social theory come together to discuss the tensions and sympathies of democratic ideals and environmental values The prominent contributors reflect upon where we stand in our understanding of the relationship between democracy and the claims of nature *Democracy and the Claims of Nature* bridges the gap between the often competing ideals of the two fields leading to a greater understanding of each for the other

The Environmental Justice Reader Joni Adamson, Mei Mei Evans, Rachel Stein, 2022-02-08 From the First National People of Color Congress on Environmental Leadership to WTO street protests of the new millennium environmental justice activists have challenged the mainstream movement by linking social inequalities to the uneven distribution of environmental dangers Grassroots movements in poor communities and communities of color strive to protect neighborhoods and worksites from environmental degradation and struggle to gain equal access to the natural resources that sustain their cultures This book examines environmental justice in its social economic political and cultural dimensions in both local and global contexts with special attention paid to intersections of race gender and class inequality The first book to link political studies literary analysis and teaching strategies it offers a multivocal approach that combines perspectives from organizations such as the Southwest Network for Environmental and Economic Justice and the International Indigenous Treaty Council with the insights of such notable scholars as Devon Pe a Giovanna Di Chiro and Valerie Kuletz and also includes a range of newer voices in the field This collection approaches environmental justice concerns from diverse geographical ethnic and disciplinary perspectives always viewing environmental issues as integral to problems of social inequality and oppression It offers new case studies of native Alaskans protests over radiation poisoning Hispanos struggles to protect their land and water rights Pacific Islanders resistance to nuclear weapons testing and nuclear waste storage and the efforts of women employees of maquiladoras to obtain safer living and working environments along the U S Mexican border The selections also include cultural analyses of environmental justice arts such as community art and greening

projects in inner city Baltimore and literary analyses of writers such as Jimmy Santiago Baca Linda Hogan Barbara Neely Nez Perce orators Ken Saro Wiwa and Karen Yamashita artists who address issues such as toxicity and cancer lead poisoning of urban African American communities and Native American struggles to remove dams and save salmon The book closes with a section of essays that offer models to teachers hoping to incorporate these issues and texts into their classrooms By combining this array of perspectives this book makes the field of environmental justice more accessible to scholars students and concerned readers

Investing in Democracy Carmen Sirianni, 2010-10-01 The health of American democracy ultimately depends on our willingness and ability to work together as citizens and stakeholders in our republic Government policies often fail to promote such collaboration But if designed properly they can do much to strengthen civic engagement That is the central message of Carmen Sirianni's eloquent new book Rather than encourage citizens to engage in civic activity government often puts obstacles in their way Many agencies treat citizens as passive clients rather than as community members overlooking their ability to mobilize assets and networks to solve problems Many citizen initiatives run up against rigid rules and bureaucratic silos causing all but the most dedicated activists to lose heart The unfortunate and unnecessary result is a palpable decline in the quality of civic life Fortunately growing numbers of policymakers across the country are figuring out how government can serve as a partner and catalyst for collaborative problem solving Investing in Democracy details three such success stories neighborhood planning in Seattle youth civic engagement programs in Hampton Virginia and efforts to develop civic environmentalism at the U S

Environmental Protection Agency The book explains what measures were taken and why they succeeded It distills eight core design principles that characterize effective collaborative governance and concludes with concrete recommendations for federal policy

Justice Alternatives Pat Carlen, Leandro Ayres França, 2019-07-11 Justice is one of the most debated and reinterpreted of concepts within the fields of law criminology and criminal justice Bringing together 35 leading thinkers analysts and campaigners from around the world this collection presents a range of on going struggles for justice from abolitionist transitional transformative indigenous green and restorative perspectives Against a background of contemporary concerns about dark money plutocracies and populism these chapters raise questions about the relationships between social justice and criminal justice and between democracy knowledge and justice Overall the chapters also demonstrate the breadth variety and vibrancy of contemporary criminology and include amongst other cutting edge contributions chapters by John Braithwaite Michelle Brown Ian Loader Pat O Malley Joe Sim Susanne Karstedt Phil Scruton Richard Sparks Lo c Wacquant and Sandra Walklate Justice Alternatives is essential reading for students of criminology criminal justice and law as well as

Effluent America Martin V. Melosi, 2001-09-02 What's the difference between an anthill and a city Protection from weather and predators living and working quarters transportation networks food storage capability all these they hold in common And while there are obvious differences between humans and ants both exist in the same space and time dimension in nature This simple idea imagining cities as part of the larger physical world has driven the work of the historian Martin Melosi for twenty five years Melosi is one of a handful of scholars who examine urban history from an ecological perspective using the city to help define the place of nature in human life Cities he maintains are places where humans live work play consume goods and make waste just as humans have in caves on farms and in villages To imagine the city as outside of nature limits what can be known about our past and our future Effluent America is a collection of essays spanning this innovative scholar's career and the growing field of urban environmental history Garbage wastewater hazardous waste these are the lenses through which Melosi views nineteenth and twentieth century America In broad overviews and specific case studies Effluent America treats the relationship between industrial expansion and urban growth from an ecological perspective He charts the development of city services the rationale for their implementation and how they affected growth He explores the environmental impacts of unprecedented methods of production the influence of new forms of energy and changing patterns of consumption during the Industrial Revolution and beyond In so doing he traces how one of the richest nations in the world became also the most wasteful a juxtaposition of affluence and effluence Other essays consider the important role of American cities in the history of the conservation and environmental movements Melosi sketches the reforms and reformers born out of such urban quality of life issues as pollution sanitation public health and the need for greenspace He also profiles the environmental justice movement whose response to environmental problems is a question Who bears the most risk Urban environmental history is a window on the past but it also directly informs issues of the present public health pollution the role of government in delivering services etc Effluent America is an important volume for students of history and urban affairs as well as for policymakers and all those concerned about the one world we inhabit

Environmental Politics and Policy, 1960s-1990s Otis L. Graham, 2010-11-01 This volume of original essays tells the story of how the agenda of the environmental movement in America has changed from the time Rachel Carson sounded her famous clarion call in the early 1960s up to our current era when the globalization of environmental issues has affected both the severity of the problems we all face and the political difficulty of dealing with them Besides the editor whose Introduction

and Epilogue frame the book the contributors include well known journalist Roy Beck activist civil servant Leon Kolankiewicz environmental scholar Michael E Kraft historian Martin V Melosi and political scientist David Vogel This volume was originally published as a special issue of The Journal of Policy History *Environmental Politics* Norman Miller, 2017-12-19

At every stage environmental policy is the result of the combat of stakeholders interested in and affected by the problem being addressed and the range of possible solutions The combatants include any or all of the following the federal government environmental advocacy groups and business the media the scientific community think tanks NGOs of every stripe trade associations and professional organizations and even state and local governments each of whom have their own interests in the resulting policy *Environmental Politics Interest Groups the Media and the Making of Policy* discusses political battles over the environment from ground level as they are fought in legislative chambers the daily newspaper on television and increasingly on the Internet The text explores environmental politics as a clash of interests not ideologies and environmental policy as a result of the reconciliation of those interests The author covers not only the conventional aspects of the policymaking process but more recent and less recognized elements and developments such as Proliferation of legislative riders and monument designations as major environmental strategies Evolving role of the media from science popularizer to agenda setter Growing influence on both Congress and the public of conservative and libertarian foundations and think tanks Devolution of environmental power from the Federal to state governments Metamorphosis of EPA in a business driven regulatory revolution Effect of globalization on US environmental policy Newly emerging role of the precautionary principle in marrying science and politics Increasing role of the Internet in promoting populist issues and promoting the decentralization of the environmental power structure No other book covers the politics of the environment the way this one does Written by an expert with 25 years of experience in environmental policymaking *Environmental Politics Interest Groups the Media and the Making of Policy* gives you an insider's view of how policies are forged By examining these issues through an interest group lens this book not only accounts for what policies have been adopted but also shows how you can influence policy and effect change *Environmental Governance Reconsidered, second edition* Robert F. Durant, Daniel J. Fiorino, Rosemary O'Leary, 2017-08-25

Key topics in the ongoing evolution of environmental governance with new and updated material This survey of current issues and controversies in environmental policy and management is unique in its thematic mix broad coverage of key debates and in depth analysis The contributing authors all distinguished scholars or practitioners offer a comprehensive examination of key topics in the continuing evolution of environmental governance with perspectives from public policy public administration political science international relations sustainability theory environmental economics risk analysis and democratic theory The second edition of this popular reader has been thoroughly revised with updated coverage and new topics The emphasis has shifted from sustainability to include sustainable cities from domestic civic environmentalism to global civil society and from global interdependence to the evolution of institutions of

global environmental governance A general focus on devolution of authority in the United States has been sharpened to address the specifics of contested federalism and fracking and the treatment of flexibility now explores the specifics of regulatory innovation and change New chapters join original topics such as environmental justice and collaboration and conflict resolution to address highly salient and timely topics energy security risk assessment communication and technology innovation regulation by revelation and retrospective regulatory analysis The topics are organized and integrated by the book's 3R framework reconceptualizing governance to reflect ecological risks and interdependencies better reconnecting with stakeholders and reframing administrative rationality Extensive cross references pull the chapters together A broad reference list enables readers to pursue topics further Contributors Regina S Axelrod Robert F Durant Kirk Emerson Daniel J Fiorino Anne J Kantel David M Konisky Michael E Kraft Jennifer Kuzma Richard Morgenstern Tina Nabatchi Rosemary O Leary Barry Rabe Walter A Rosenbaum Stacy D VanDeveer Paul Wapner

The New Encyclopedia of Southern Culture Martin V. Melosi, Charles Reagan Wilson, 2014-02-01 From semitropical coastal areas to high mountain terrain from swampy lowlands to modern cities the environment holds a fundamental importance in shaping the character of the American South This volume of The New Encyclopedia of Southern Culture surveys the dynamic environmental forces that have shaped human culture in the region and the ways humans have shaped their environment Articles examine how the South's ecology physiography and climate have influenced southerners not only as a daily fact of life but also as a metaphor for understanding culture and identity This volume includes ninety eight essays that explore both broadly and specifically elements of the southern environment Thematic overviews address subjects such as plants animals energy use and development and natural disasters Shorter topical entries feature familiar species such as the alligator the ivory billed woodpecker kudzu and the mockingbird Also covered are important individuals in southern environmental history and prominent places in the landscape such as the South's national parks and seashores New articles cover contemporary issues in land use and conservation environmental protection and the current status of the flora and fauna widely associated with the South

Environmental Movements and Waste Infrastructure Christopher Rootes, Liam Leonard, 2013-09-13 As rates of consumption grow the problem of waste management has increased significantly National and local waste authorities seek to manage such problems through the implementation of state regulation and construction of waste infrastructure including landfills and incinerators These however are undertaken in a context of increasing supra state regulatory frameworks and directives on waste management and of increasing activity by multi national corporations and are increasingly contested by activists in the affected communities Environmental Movements and Waste Infrastructure sheds new light on the structures of political opportunity that confront environmental movements that challenge the state or corporate sector A series of case studies on collective action campaigns from the EU US and Asia is elaborated in order to illuminate the similarities and differences between anti incinerator protests within different states Several contributions

share a concern about cross border or transnational waste flows Each case study looks beyond its initial local frame of reference and goes on to interrogate assumptions about NIMBYism or localism demonstrating the wider linkages and networks established by both grassroots campaigns and state and multinational agencies This book was previously published as a special issue of Environmental Politics **Varieties of Civic Innovation** Jennifer Girouard, Carmen Sirianni, 2014-12-22

In this collection of original essays empirical analysts and theorists across disciplines turn a critical eye to a variety of recent institutional forms and styles of innovation They examine lived reality and theoretical underpinning promise and accomplishment but also the pitfalls and capacity building challenges that face virtually all attempts to bring citizen voice knowledge and skill to the center of public problem solving Their analyses are both hopeful and hard headed and are guided by commitments to help understand appropriate fit and realistic sustainability Cases include face to face deliberation online networking and citizen journalism policy forums and community and stakeholder planning sessions across local state and federal contexts Policy issues run a broad gamut from community and regional economic development and environmental sustainability to minority rights and gay marriage
