Sap Abap Command Reference:

SAP ABAP Command Reference Dennis Barrett, 2002 MISTA tells the story of a year in the life of an inner city English teacher at an alternative high school. It details the day to day interactions with students, teachers, administrative staff and parents and delves into problems and issues that teachers can never adequately prepare for. *SAP R/3's ABAP/4 Command Reference* Dennis Barnett, 1997-08-01 *SAP R/3 ABAP/4 Command Reference* Dennis Barrett, 1997 This complete ABAP 4 command reference provides you with key information on the most important ABAP 4 commands. With a comprehensive index and exhaustive command reference section you will have all the essential information you need to master ABAP 4 commands at your fingertips. *SAP ABAP* Sushil Markandeya, Kaushik Roy, 2014-11-17 SAP ABAP Advanced Business Application Programming offers a detailed tutorial on the numerous features of the core programming platform used for development for the entire SAP software suite. SAP ABAP uses hands-on business oriented use cases and a valuable dedicated e resource to demonstrate the underlying advanced concepts of the OO ABAP environment and the SAP UI. SAP ABAP covers the latest version NetWeaver 7.3 and SAP application programming release 6.0 of the platform for demonstrating the customization and implementation phases of the SAP software implementation. Void of theoretical treatments and preoccupation with language syntax, SAP ABAP is a comprehensive practical one-stop solution which demonstrates and conveys the language's commands and features through hands-on examples. The accompanying e resource is a take-off point to the book. SAP ABAP works in tandem with the accompanying e resource to create an interactive learning environment where the book provides a brief description and an overview of a specified feature command, showing and discussing the corresponding code. At the reader's option, the user can utilize the accompanying e resource where a step-by-step guide to creating and running the feature's object is available. The presentation of the features is scenario-oriented, i.e. most of the features are demonstrated in terms of small business scenarios. The e resource contains the scenario descriptions, screen shots, detailed screen-cams, and ABAP program source to enable the reader to create all objects related to the scenario and run/execute them. The underlying concepts of a feature command are conveyed through execution of these hands-on programs. Further exercises to be performed independently by the reader are also proposed. The demonstration/illustration objects, including the programs, rely on some of the SAP application tables being populated, for example, an IDES system which is now a de facto system for all SAP training-related activities.
