1963 E N Lorenz developed the Lorenz equation which was the first instance of a chaotic solution obtained from a deterministic equation in a dissipative system This first occurrence occurred after a significant amount of research had been conducted Period Three Implies Chaos 1975 written by Tienyien Li and James A Yorke is noteworthy for being the first publication to use the term chaos to characterize this phenomenon In 1976 Robert M May made the first suggestion for the Logistic map in an article Five years later in 1978 M J Feigenbaum conducted significant research on the topic and proposed that it be applied to all situations equally Ever since then there has been a significant advancement in the chaotic systems Chaos systems are characterized by a number of characteristics including aperiodicity nonlinearity sensitivity to initial conditions and so on These systems are both complex and dynamic The unexpected and difficult to control intricate behavior of chaotic systems has made them a popular topic in the field of nonlinear dynamics research that is now being conducted
