Secure Electronic Voting:

Secure Electronic Voting Dimitris A. Gritzalis, 2012-12-06 Secure Electronic Voting is an edited volume which includes chapters authored by leading experts in the field of security and voting systems The chapters identify and describe the given capabilities and the strong limitations as well as the current trends and future perspectives of electronic voting technologies with emphasis in security and privacy Secure Electronic Voting includes state of the art material on existing and emerging electronic and Internet voting technologies which may eventually lead to the development of adequately secure e voting systems This book also includes an overview of the legal framework with respect to voting a description of the user requirements for the development of a secure e voting system and a discussion on the relevant technical and social concerns Secure Electronic Voting includes also three case studies on the use and evaluation of e voting systems in three different real world environments Design, Development, and Use of Secure Electronic Voting Systems Zissis, Dimitrios, Lekkas, Dimitrios, 2014-03-31 In modern electoral processes Information and Communication Technologies play a crucial role whether used in voter registration ballot casting or processing of results Securing these systems is a necessary step in ensuring the fairness of the democratic process Design Development and Use of Secure Electronic Voting Systems analyzes current research on the integration of modern technologies with traditional democratic systems providing a framework for designing and deploying electronic voting systems in any context or society Stakeholders researchers architects designers and scholars interested in the use of electronic systems in government processes will use this book to gain a broader understanding of some of the latest advances in this emerging field **Electronic Voting** Robert Krimmer, Melanie Volkamer, Jordi Barrat, Josh Benaloh, Nicole Goodman, Peter Y. A. Ryan, Vanessa Teague, 2017-01-25 This book constitutes the thoroughly refereed conference proceedings of the First International Joint Conference on Electronic Voting E Vote ID 2016 held in Bregenz Austria in October 2016 The 14 full papers presented were carefully reviewed and selected from 57 submissions They represent a wide range of technological proposals for different voting settings be it in polling stations remote voting or even mobile voting and case studies from different countries already using electronic voting or having conducted first trial elections Evaluation of Electronic Voting Melanie Volkamer, 2009-07-14 Electronic voting has a young and attractive history both in the design of basic cryptographic methods and protocols and in the application by communities who are in the vanguard of technologies The crucial aspect of security for electronic voting systems is subject to research by computer scientists as well as by legal social and political scientists The essential question is how to provide a trustworthy base for secure electronic voting and hence how to prevent accidental or malicious abuse of electronic voting in elections To address this problem Volkamer structured her work into four parts Fundamentals provides an introduction to the relevant issues of electronic voting Requirements contributes a standardized consistent and exhaustive list of requirements for e voting systems Evaluation presents the proposal and discussion of a standardized evaluation methodology

and certification procedure called a core Protection Profile Finally Application describes the evaluation of two available remote electronic voting systems according to the core Protection Profile The results presented are based on theoretical considerations as well as on practical experience In accordance with the German Society of Computer Scientists Volkamer succeeded in specifying a Protection Profile for a Basic Set of Security Requirements for Online Voting Products which has been certified by the German Federal Office for Security in Information Technology Her book is of interest not only to developers of security critical systems but also to lawyers security officers and politicians involved in the introduction or certification of electronic voting systems
