Americans like to believe that theirs is the land of opportunity but the hard facts are that children born into poor families in the United States tend to stay poor and children born into wealthy families generally stay rich Other countries have shown more success at lessening the effects of inequality on mobility possibly by making public investments in education health and family well being that offset the private advantages of the wealthy What can the United States learn from these other countries about how to provide children from disadvantaged backgrounds an equal chance in life Making comparisons across ten countries Persistence Privilege and Parenting brings together a team of eminent international scholars to examine why

advantage and disadvantage persist across generations The book sheds light on how the social and economic mobility of children differs within and across countries and the impact private family resources public policies and social institutions may have on mobility In what ways do parents pass advantage or disadvantage on to their children Persistence Privilege and Parenting is an expansive exploration of the relationship between parental socioeconomic status and background and the outcomes of their grown children The authors also address the impact of education and parental financial assistance on mobility Contributors Miles Corak Lori Curtis and Shelley Phipps look at how family economic background influences the outcomes of adult children in the United States and Canada They find that despite many cultural similarities between the two countries Canada has three times the rate of intergenerational mobility as the United States possibly because Canada makes more public investments in its labor market health care and family programs Jo Blanden and her colleagues explore a number of factors affecting how advantage is transmitted between parents and children in the United States and the United Kingdom including education occupation marriage and health They find that despite the two nations having similar rates of intergenerational mobility and social inequality lack of educational opportunity plays a greater role in limiting U S mobility while the United Kingdom s deeply rooted social class structure makes it difficult for the disadvantaged to transcend their circumstances Jane Waldfogel and Elizabeth Washbrook examine cognitive and behavioral school readiness across income groups and find that pre school age children in both the United States and Britain show substantial income related gaps in school readiness driven in part by poorly developed parenting skills among overburdened low income families The authors suggest that the most encouraging policies focus on both school and home interventions including such measures as increases in federal funding for Head Start programs in the United States raising pre school staff qualifications in Britain and parenting programs in both countries A significant step forward in the study of intergenerational mobility Persistence Privilege and Parenting demonstrates that the transmission of advantage or disadvantage from one generation to the next varies widely from country to country This striking finding is a particular cause for concern in the United States where the persistence of disadvantage remains stubbornly high But it provides a reason to hope that by better understanding mobility across the generations abroad we can find ways to do better at home

Teaching, Research and Academic Careers

Daniele Checchi, Tullio Jappelli, Antonio Uricchio, 2022-08-12 This open access book evaluates research quality quality of teaching and the relationship between the two through sound statistical methods and in a comparative perspective with other European countries In so doing it covers an increasingly important topic for universities that affects university funding It discusses whether university evaluation should be limited to a single factor or consider multiple dimensions of research since academic careers teaching and awarding degrees are intertwined The chapters included in the book evaluate teaching and research also taking the gender dimension into account in order to understand where and when gender discrimination occurs in assessment Divided into five sections the book analyses the administrative data on the determinants of career completion

of university students increasing precariousness of academic careers especially of young researchers methods designed to assess research productivity when co authorship and team production are becoming the standard practice and interrelations between students achievements and teachers careers driven by research assessment It brings together contributions from a large group of economists statisticians and social scientists working under a project sponsored by ANVUR the Italian agency for the evaluation of teaching and research of academic institutions From an international perspective the findings in this book are particularly interesting because despite low tuition costs tertiary education in Italy has relatively low enrolment rates and even lower completion rates compared to those in other European and American countries This book is of interest to researchers of the sociology of education education policy public administration economics and statistics of education and to administrators and policy makers working in the area of higher education

On the Edge of Commitment Stephen Lawrence Morgan, 2005 This book offers a new model of educational achievement to explain why some students are committed to preparation for college

Student aid and tax benefits better research and guidance will facilitate comparison of effectiveness and student use. Cornelia M. Ashby, 2002 To assist Congress as it prepares for the reauthorization of the Higher Education Act a study was undertaken of Title IV aid programs and higher education tax provisions designed to assist students and families Focusing on the HOPE and Lifetime Learning tax credits Data from the National Postsecondary Student Aid Study and other databases were used In the 1999 2000 academic year it is estimated that the Lifetime Learning and HOPE tax credits provided more than 4 in 10 undergraduate students with benefits that equaled a varying share of tuition and fees charged and Title IV aid received Some students families had incomes too high to use the credits others had tax liabilities too low to use the credits or to use the credits to the maximum Among all dependent students who received the HOPE credit it equaled on average about 20% of the tuition and fees and for independent students the HOPE credit equaled about 30% of tuition and fees Taken together Title IV student aid and higher education tax credits now assist more than 70% of undergraduate students and families in paying for postsecondary education Five appendixes contain details about methodology and research comments from government agencies and a list of contacts and staff at the General Accounting Office Contains 14 tables 13 figures and 19 references SLD

Tearing Down the Gates Peter

Sacks, 2007 *Tearing Down the Gates* is a superb book which exposes the dirty little secret of American education that while our public schools and universities are meant to be engines for social mobility they too often reinforce stratification. Peter Sacks is one of the great storytellers of American inequality, interweaving devastating statistics with poignant stories of individuals he came to know well in his reporting. While much of the literature on inequality rightfully tackles the barriers of race and gender, Sacks digs deeper, laying bare the taboo reality of social class in America. Richard D. Kahlenberg, Senior Fellow, The Century Foundation and author of *The Remedy: Class, Race, and Affirmative Action*, says Peter Sacks has been relentless in his writings that we as a nation are failing in our responsibility to provide access to a quality education for our poorest citizens. In his latest work *Tearing Down the Gates*, he provides compelling data and anecdotes to drive home the stark reality that our higher education system is not accessible to low-income students in the same way that it is for students from more affluent families. He challenges the education community in particular and all of our democratic institutions in general to remove the barriers that keep motivated low-income citizens from succeeding. Not only is it the right thing to do, our country's societal and economic survival may depend on it. William D. Boyd, Senior Associate Vice President, Student Affairs, San Diego State University, says Peter Sacks pulls no punches in pointing out the hypocrisy and resulting tragedy of our society's educational inequities, puncturing our self-serving belief in meritocracy that is not quite that. The results of his study will be controversial, but the topic could not be more pressing for all of us and for the future of our democracy and economy. Anthony W. Marx, President, Amherst College, says Peter Sacks has written a compelling account of the ways in which class determines educational opportunity. Made vivid by anecdotes supported by socioeconomic data, *Tearing Down the Gates* will give anyone concerned with higher education much food for thought about the ways in which our colleges reinforce class privilege, failing to provide the equal opportunity we value so highly. Carol T. Christ, President, Smith College, says A powerful, timely, and richly documented work on the stunning disparities in success and opportunity along the lines of class and race that undermine the promises of democratic education in America. Drawing upon vivid personal experience, Sacks brings a close lens to bear upon allegedly progressive institutions such as the Berkeley, California public schools and demonstrates the enduring contradiction between high ideals announced by a liberal community and the actual behavior of the parents of the privileged who go to school in such communities. In a valiant effort to open up an avenue of hope, the author identifies schools and universities that have attempted to tear down the gates which have perpetuated caste divisions in our nation and its pedagogic institutions, but in clear-sighted recognition of the potent backlash on the part of those who fervently defend inequities which benefit their children. This very important and disturbing book reminds us of the struggle still ahead. Jonathan Kozol, author of *The Shame of the Nation: The Restoration of Apartheid Schooling in America*. In the spirit of Jonathan Kozol's writing on K-12 education, Peter Sacks carries the story of inequity, social stratification, and unequal opportunities to the domain of higher education. While the story has been described by statisticians, Sacks puts a human face on the disparities in opportunity by

socioeconomic class through revealing portraits of individual young people from widely differing circumstances and the vastly different educational opportunities they face It is hardly surprising that as education has grown sharply in economic value wealthy parents will do whatever it takes to give their children every educational advantage what has not caught up to reality is our continuing belief that all children have equal opportunity One example of the punch of this book is his treatment of Berkeley High School where even in this most liberal of cities the wealthy have found ways to advantage their young A must read for all who care about the future shape of civil society in this country David Breneman University of Virginia

Creating an Opportunity Society Ron Haskins, Isabel V.

Sawhill, 2009-10-01 Americans believe economic opportunity is as fundamental a right as life liberty and the pursuit of happiness More concerned about a level playing field for all they worry less about the growing income and wealth disparity in our country Creating an Opportunity Society examines economic opportunity in the United States and explores how to create more of it particularly for those on the bottom rungs of the economic ladder Ron Haskins and Isabel Sawhill propose a concrete agenda for increasing opportunity that is cost effective consistent with American values and focuses on improving the lives of the young and the disadvantaged They emphasize individual responsibility as an indispensable basis for successful policies and programs The authors recommend a three pronged approach to create more opportunity in America Increase education for children and youth at the preschool K 12 and postsecondary levels Encourage and support work among adults Reduce the number of out of wedlock births while increasing the share of children reared by their married parents With concern for the federal deficit in mind Haskins and Sawhill argue for reallocating existing resources especially from the affluent elderly to disadvantaged children and their families The authors are optimistic that a judicious use of the nation s resources can level the playing field and produce more opportunity for all Creating an Opportunity Society offers the most complete summary available of the facts and the factors that contribute to economic opportunity It looks at the poor the middle class and the rich providing deep background data on how each group has fared in recent decades Unfortunately only the rich have made substantial progress making this book a timely guide forward for anyone interested in what we can do as a society to improve the prospects for our less advantaged families and fellow citizens

Economic Inequality,

Neoliberalism, and the American Community College Patrick Sullivan, 2017-05-11 This book aims to deepen public understanding of the community college and to challenge our longstanding reliance on a deficit model for defining this important powerful and transformative institution Featuring a unique combination of data and research Sullivan seeks to help redefine update and reshape public perception about community colleges This book gives serious attention to student voices and includes narratives written by community college students about their experiences attending college at an open admissions institution Sullivan examines the history of the modern community college and the economic model that is driving much of the current discussion in higher education today Sullivan argues that the community college has done much to promote social justice and economic equality in America since the founding of the modern community college in 1947 by the Truman Commission
