Chan, Hung-gay Fung, Qingfeng "Wilson". shareholders propensity for activism The model both elaborates the collective benefits of activism as a means of achieving managerial accountability asks whether and when shareholder activism is rational for any individual shareholder The book then goes on to apply these findings to both the UK and China in order to explain the varying levels of shareholder activism in each jurisdiction The book is the first to take an in depth look at institutional shareholder activism in China providing prescriptions to promote greater shareholder engagement and exploring the potential it holds for improving corporate governance in the region **Chinese and Global Financial Integration through Stock Connect** Flora
