Saving Seeds Bonwoo Koo, Philip G. Pardey, Brian Wright, 2003-12-01 The conservation of genetic resources is vital to the maintenance of biodiversity and to the world's ability to feed its growing population There are now more than a thousand genebanks worldwide involved in the ex situ meaning away from the source storage of particular classes of crops Since the 1970s the eleven genebanks maintained by the centres of the Consultative Group on International Agricultural Research CGIAR have become pivotal to the global conservation effort However key policy and management issues usually with economic dimensions have largely been overlooked This provided the impetus for a series of detailed economic studies led by IFPRI in collaboration with five CGIAR centres CIAT based in Colombia CIMMYT Mexico ICARDA Syria ICRISAT India and IRRI Philippines This book reports these studies and discusses their wider implications

Environmental Decision-Making in Context Chad J. McGuire, 2017-09-25 Because of the complexity involved in understanding the environment the choices made about environmental issues are often incomplete In a perfect world those who make environmental decisions would be armed with a foundation about the broad range of issues at stake when making such decisions Offering a simple but comprehensive

understanding of the critical roles science economics and values play in making informed environmental decisions Environmental Decision Making in Context A Toolbox provides that foundation The author highlights a primary set of intellectual tools from different disciplines and places them into an environmental context through the use of case study examples The case studies are designed to stimulate the analytical reasoning required to employ environmental decision making and ultimately help in establishing a framework for pursuing and solving environmental questions issues and problems They create a framework individuals from various backgrounds can use to both identify and analyze environmental issues in the context of everyday environmental problems The book strikes a balance between being a tightly bound academic text and a loosely defined set of principles It takes you beyond the traditional pillars of academic discipline to supply an understanding of the fundamental aspects of what is actually involved in making environmental decisions and building a set of skills for making those decisions

Bioscience Entrepreneurship In Asia: Creating Value With Biology Paul S Teng,2008-07-29 When matched with Asian mega trends in culture demographics and economics BioScience products provide huge potential for exploitation and value creation in the coming years This potential will be further enhanced by the declining capacity of the world s oil reserves to provide hydrocarbons for fuel and materials and plants will become more important as bio factories for basic ingredients to sustain human societies Successful business models have been developed to harness the potential of BioScience to meet the demands for food feed and organochemicals based on value creation and value capture mechanisms These mechanisms are described in the book with real world case studies As BioScience applications become more basic in nature product development has increased in its complexity and requires special attention to obtain freedom to operate Controversy about novel gene technologies threatens to derail the BioScience Revolution as public concern about safety issues and bioethics are fuelled by opposition groups to the new biology This book describes communication techniques and messages to address such concerns and shows how early education programs can have high payoffs for companies that invest in novel products
