Their Voice Charles Keyes,2014-01-05 The rural Lao speaking people of northeastern Thailand constitute over a third of the entire population of Thailand Over the last century this ethnically separate community has evolved from a traditional peasantry into cosmopolitan villagers who are actively shaping Thai politics Eminent anthropologist Charles Keyes traces this evolution in detail beginning with the failure of a Buddhist millenarian uprising in 1901 2 and concluding with the successful election of the Thai Rak Thai Pheu Thai Party in the 2000s In the intervening century rural northeasterners have become more educated and prosperous and they have gained a sophisticated understanding of the world and of their position in it as Thai citizens Although northeasterners have often been thwarted in their efforts to press government agencies to redress

their grievances they have rejected radical revolutionary efforts to transform the Thai political system. Instead they have looked to parliamentary democracy as the system in which they can make their voices heard. As the country engages with the processes of democracy the Pheu Thai Party and the Red Shirt movement appear to have established the people of northeastern Thailand as an authentic voice in the nation's political landscape. *Highlights* Traces the evolution of a marginalized peasantry into a significant political force in Thai society. *Examines* the disjunction between the urban middle class negative perspectives on the northeastern Thai rural population and real characteristics of that population. *Highlights* the different views of political authority and legitimacy in Thailand that have contributed to the twenty first century crisis in the Thai political order. *What Others Are Saying* Finding Their Voice by anthropologist Charles Keyes is a culmination of decades of careful ethnography consistently combined with an astute political analysis and sense of history. Reminiscent of Eugen Weber's classic *Peasants into Frenchmen* Keyes's book shows that the people of Isan have become the makers and undoers of governments and are more firmly wedded to the modern notion of parliamentary democracy than are the refined urban elites. This book has as much to say about the polarized politics of Thailand as it does about the rich culture and history of Isan. Philip Hirsch University of Sydney

Environmental Governance in a Populist/Authoritarian Era James McCarthy, 2020-05-21 This volume explores the many and deep connections between the widespread rise of authoritarian leaders and populist politics in recent years and the domain of environmental politics and governance: how environments are known, valued and managed for whose benefit and with what outcomes. The volume is explicitly international in scope and comparative in design, emphasizing both the differences and commonalities to be seen among contemporary authoritarian and populist political formations and their relations to environmental governance. Prominent themes include the historical roots of and precedents for environmental governance in authoritarian and populist contexts; the relationships between populism and authoritarianism and extractivism; and resource nationalism. Environmental politics as an arena for questions of security and citizenship; racialization and environmental politics; the politics of environmental science and knowledge; and progressive political alternatives. In each domain using rich case studies contributors analyse what differences it makes when environmental governance takes place in authoritarian and populist political contexts. This book was originally published as a special issue of *Annals of the American Association of Geographers*

The Buddhist World John Powers, 2015-10-05 The *Buddhist World* joins a series of books on the world's great religions and cultures offering a lively and up to date survey of Buddhist studies for students and scholars alike. It explores regional varieties of Buddhism and core topics including buddha nature, ritual and pilgrimage. In addition to historical and geo-political views of Buddhism the volume features thematic chapters on philosophical concepts such as ethics as well as social constructs and categories such as community and family. The book also addresses lived Buddhism in its many forms examining the ways in which modernity is reshaping traditional structures, ancient doctrines and cosmological beliefs.

Approaching Natural Resources for Sustainable Development in

Indonesia Henny Warsilah, Agus Heri Purnomo, 2025-09-25 This book brings to light the sustainability dilemma in Southeast Asia with a sharp focus on Indonesia's rapid economic growth and its profound impact on natural resources ecosystems and society. It examines the complex challenge of fostering strong economic development while avoiding environmental degradation and social dislocation. Central to this discourse is the vital role of government regulation and the imperative of community involvement in managing natural resources. Indonesia's economic boom mirroring trends across Asia has triggered escalating land use conflicts in forests peatlands rural urban zones and karst landscapes. This is paralleled by expanding access to coal tin and oil and gas leading to large scale extractive operations and widespread environmental damage. The book adopts a sustainable development framework exploring its ecological economic social and political dimensions. Crucially it argues that today's socio ecological crisis is not just a consequence of growth but a systemic condition rooted in capitalism. Written by leading experts the book offers interdisciplinary perspectives socio cultural legal political and economic supported by detailed case studies. A timely and essential resource for policymakers researchers and practitioners committed to Indonesia's sustainable future.

Energy, Governance and Security in Thailand and Myanmar (Burma) Adam Simpson, 2016-04-29 Across the world states are seeking out new and secure supplies of energy but this search is manifesting itself most visibly in Asia where rapid industrialisation in states such as China and India is fomenting a frantic scramble for energy resources. Due to entrenched societal inequities and widespread authoritarian governance however the pursuit of national energy security through transnational energy projects has resulted in devastating impacts on the human and environmental security of local populations. These effects are particularly evident in both Thailand and Myanmar Burma which located at the crossroads of Asia are increasingly engaged in the cross border energy trade. Based on extensive fieldwork and theoretical analysis this ground breaking book proposes a new critical approach to energy and environmental security and explores the important role that both local and transnational environmental movements are playing in the absence of effective and democratic governments in providing activist environmental governance for energy projects throughout the region. By comparing the nature of this activism under two very different political regimes it delivers crucial theoretical insights with both academic and policy implications for the sustainable and equitable development of the South's natural resources.

Mountain Environments and Communities Don Funnell, Romola Parish, 2005-08-18 Presents a broad introduction to the human and physical geography of mountains. The book explains the background physical environment and then explores the environmental and social dimensions of mountain regions.

The Age of Ecology Joachim Radkau, 2014-04-03 This book is the first major study of the history of environmentalism from its origins in romanticism and the nature cults of the late 18th century to the global environmental movements of today. Radkau shows that this is not a single story of the steady ascent of environmentalism but rather a multiplicity of stories each with its own dramatic tension between single issue movements and the challenges posed by the

interconnection of environmental issues between charismatic leaders and bureaucratic organizations and between grassroots movements and global players While the history can be traced back several centuries environmentalism has flourished since the environmental revolution of 1970 spurred on by the Chernobyl nuclear disaster in 1986 and the growing concern about global warming While environmentalists often opposed the scientific mainstream they were also often led by scientific knowledge Environmentalism is the true Enlightenment of our time so much so that we can call our era the age of ecology This timely and comprehensive global history of environmentalism will be essential reading for anyone concerned with the most pressing global issues of our time *Tropical Forests, International Jungle* M. Smouts, 2003-05-29 Marie Claude Smouts looks at the issue of rain forest depletion and global environmental policies Beginning with how the issue entered the world stage in the 1980s despite alarms over the issue in the 1950s *Tropical Forests International Jungle* explores the complexities of what are tropical forests what role they play not only in environmentalism but in trade health care and almost every facet of natural and social life for those living there and beyond Although for most in the developed world tropical forests have gained a status of part of our world heritage these forests are not really part of the global commons or a global public good Developing nations maintain control over the forests within their borders and often use the forests as they see fit The international system for mediating the issue is a fractured group of non governmental organizations and transnational networks often with competing views of how to manage tropical forests Despite this seemingly grim picture Smouts is optimistic A changing world view toward forest depletion is influencing countries both North and South Although forests will be used commercially it is a dynamic process that should maintain them far into the future *Southeast Asia* Peter Boomgaard, 2006-12-14 From Angkor Wat to Agent Orange Southeast Asia An Environmental History tells the story of some of the most dramatic effects humans have had on the natural and developed environment anywhere in the world and examines the ways in which environmental factors have helped shape the culture politics and societies of the region Ever since the first humanlike creatures arrived some 80 000 years ago Southeast Asia s varied and challenging environment has helped shape the course of human destiny From the importance of its spices to 17th century Europeans to the jungle canopies that sheltered Communist insurgents throughout much of the 20th century the region s environment has often proven decisive in human affairs Packed with key facts and analysis Southeast Asia provides an expert guide to the complex interplay between human societies and the environment from Burma to the Philippines and from Vietnam to Indonesia How has the environment helped shape politics trade and religion What are the likely consequences of ongoing deforestation for Southeast Asia s people and animals Part of ABC CLIO s Nature and Human Societies series this work charts the region s environmental history from prehistory to modern times and is essential reading for students and experts alike
