

The background of the cover is a composite image. The top half shows a dark, silhouetted city skyline at night, with several prominent domes and spires illuminated from below. The bottom half shows a street scene at night, likely in a European city, with many closed, light-colored patio umbrellas lining a sidewalk next to a building. The overall color palette is dark with warm, golden light from the city lights and street lamps.

Our Hundred Days In Europe (Volume 10) Oliver Wendell Holmes, 2022 *The Structure of Brazilian Development* Neuma Aguiar, 1979-01-01 Having experienced a period of crisis the young scholars included in this anthology provide evidence that critical periods can be favorable to the flourishing of the social sciences and that crises in society and the polity may provide new incentives for the profession The authors have used the most critical period of Brazil's change from a liberal to an authoritarian government to further their training in Europe and the United States returning to their country to shed new light on past and current events They have adapted their training to a non liberal environment and combined local research with a universalistic orientation in their analyses of Brazilian social structure This book investigates the roles of the peasantry in Brazilian society past and present It describes the pact established between traditional rural elites and the central government which favored the previous populist style of urban politics but left unaltered the rural social structure In addition to analyzing the political trade offs between the traditional elite and the central government the authors focus on the class structure within which peasant leagues emerged The country's political development is analyzed through a bipolar political structure wherein populist and authoritarian regimes alternate in power Other aspects of the military government's impact are discussed through the use of public policy models aimed at analyzing the output of both liberal and authoritarian regimes Continuity between the current administration and previous authoritarian governments is shown as well as new developments such as changes in municipal taxation which allow for the emergence of new technical elites The increase in authoritarian legislation is discussed within this analytical framework as is the expansion of entrepreneurial activities This book brings together the analytical result of recent research by a distinguished group of young Brazilian social scientists It is the first book written in English about Brazil by Brazilians and as such represents an extremely important contribution to the literature An up to date selected bibliography on social science research in Brazil from 1960-77 is an essential reference point for all future undertakings Shepard Forman Department of Anthropology University of Michigan *Unfabling the East* Jürgen Osterhammel, 2019-11-19 During the long eighteenth century Europe's travelers scholars and intellectuals looked to Asia in a spirit of puzzlement irony and openness In this panoramic and colorful book Jürgen Osterhammel tells the story of the European Enlightenment's nuanced encounter with the great civilizations of the East from the Ottoman Empire and India to China and Japan Here is the acclaimed book that challenges the notion that Europe's formative engagement with the non European world was invariably marred by an imperial gaze and presumptions of Western superiority Osterhammel shows how major figures such as Leibniz Voltaire Gibbon and Hegel took a keen interest in Asian culture and history and introduces lesser known scientific travelers colonial administrators Jesuit missionaries and adventurers who returned home from Asia bearing manuscripts in many exotic languages huge collections of ethnographic data and stories that sometimes defied belief Osterhammel brings the sights and sounds of this tumultuous age vividly to life from the salons of Paris and the lecture halls

of Edinburgh to the deserts of Arabia the steppes of Siberia and the sumptuous courts of Asian princes He demonstrates how Europe discovered its own identity anew by measuring itself against its more senior continent and how it was only toward the end of this period that cruder forms of Eurocentrism and condescension toward Asia prevailed

The School of Montaigne in Early Modern Europe Warren Boutcher, 2017-03-09 This major two volume study offers an interdisciplinary analysis of Montaigne's *Essais* and their fortunes in early modern Europe and the modern western university Volume one focuses on contexts from within Montaigne's own milieu and on the ways in which his book made him a patron author or instant classic in the eyes of his editor Marie de Gournay and his promoter Justus Lipsius Volume two focuses on the reader writers across Europe who used the *Essais* to make their own works from corrected editions and translations in print to life writing and personal records in manuscript The two volumes work together to offer a new picture of the book's significance in literary and intellectual history Montaigne's is now usually understood to be the school of late humanism or of Pyrrhonian scepticism This study argues that the school of Montaigne potentially included everyone in early modern Europe with occasion and means to read and write for themselves and for their friends and family unconstrained by an official function or scholastic institution For the *Essais* were shaped by a battle that had intensified since the Reformation and that would continue through to the pre Enlightenment period It was a battle to regulate the educated individual's judgement in reading and acting upon the two books bequeathed by God to man The book of scriptures and the book of nature were becoming more accessible through print and manuscript cultures But at the same time that access was being mediated more intensively by teachers such as clerics and humanists by censors and institutions by learned authors of past and present and by commentaries and glosses upon those authors Montaigne enfranchised the unofficial reader writer with liberties of judgement offered and taken in the specific historical conditions of his era The study

draws on new ways of approaching literary history through the history of the book and of reading The *Essais* are treated as a mobile transnational work that travelled from Bordeaux to Paris and beyond to markets in other countries from England and Switzerland to Italy and the Low Countries Close analysis of editions paratexts translations and annotated copies is informed by a distinct concept of the social context of a text The concept is derived from anthropologist Alfred Gell's notion of the art nexus the specific types of actions and agency relations mediated by works of art understood as indexes that give rise to inferences of particular kinds Throughout the two volumes the focus is on the particular nexus in which a copy an edition an extract is embedded and on the way that nexus might be described by early modern people

The Seven Great Monarchies of the Ancient Eastern World George Rawlinson, 1884 A Catalogue of the Library of the London Institution: The tracts and pamphlets [A-Fyson London Institution. Library, 1897 Rethinking France Pierre Nora, 2001

How do we visualize a state or a nation Some might imagine territory the borders that divide countries that mark the space where power is exercised and history evolves Others might picture natural aspects like mountains rivers and landscapes that make their own country distinct For Pierre Nora these are historical and geographical conceptions of space And in the case of the French these conceptions are not separate but instead uniquely linked They are key to understanding French national identity In *Space* the second volume in the University of Chicago Press's translation of Nora's ambitious *Les Lieux de memoire* a group of France's leading historians and cultural commentators call attention to the meaning of space for the French and the firm connection between the nation's history and its geography The essays gathered here cover the most essential approaches to French space external and internal boundaries the base unit of local space and the mental construction that gives a general idea of the concept of landscape The analyses focus on three aspects of natural boundaries the forest the north and the south and the coastline Each region of France they show is a space of memory that is the fruit of all the knowledge that gives it shape statistical cartographical geological and historical A crucial piece in Nora's profound historical project on the way the French understand themselves this volume will be appreciated by any critical thinker with an interest in French history politics culture or philosophy

Subject Guide to Books in Print, 1993 *The Engineering Index*, 1929 **Darius in the Shadow of Alexander** Pierre Briant, 2015-01-05 A detailed and incisive analysis of the recorded history surrounding the last king of Achaemenid Persia Darius III The last of Cyrus the Great's dynastic inheritors and the legendary enemy of Alexander the Great Darius III ruled over a Persian Empire that stretched from the Mediterranean to the Indus River Yet despite being the most powerful king of his time Darius remains an obscure figure As Pierre Briant explains in the first book ever devoted to the historical memory of Darius III the little that is known of him

comes primarily from Greek and Roman sources which often present him in an unflattering light as a decadent Oriental who lacked the masculine virtues of his Western adversaries Influenced by the Alexander Romance as they are even the medieval Persian sources are not free of harsh prejudices against the king Dara whom they deemed deficient in the traditional kingly virtues Ancient Classical accounts construct a man who is in every respect Alexander's opposite feeble minded militarily inept addicted to pleasure and vain When Darius's wife and children are captured by Alexander's forces at the Battle of Issos Darius is ready to ransom his entire kingdom to save them a devoted husband and father perhaps but a weak king While Darius seems doomed to be a footnote in the chronicle of Alexander's conquests in one respect it is Darius who has the last laugh For after Darius's defeat in 331 BCE Alexander is described by historians as becoming ever more like his vanquished opponent a Darius like sybarite prone to unmanly excess Praise for Darius in the Shadow of Alexander Briant is the world's leading authority on the Persian empire that Alexander conquered one of few living scholars with the linguistic mastery to study both the Greco Roman and Persian sources and hence examine the reign of Darius from European and Asian perspectives In the intensely thorough analysis he conducts here he finds reasons to mistrust both traditions and thereby qualify the charge of cowardice that has shadowed Darius for more than two millennia His insights are penetrating and his mastery of the evidentiary record is unsurpassed Having deftly taken down much of the edifice supplied by the ancient accounts of Darius Briant finally turns architect and shows us how the rebuilding might begin James Romm The Wall Street Journal Briant's work as always is a significant contribution to Achaemenid studies a display of historiographical learnedness whose methods can benefit historians across ancient studies Jennifer Finn Bryn Mawr Classical Review
