

Case Study Research

Stephen Elstub and Gianfranco Pomatto

Deliberative democrats are usually interested in finding evidence for different kinds of causal claims. For example, what causes people to change their mind? In which contexts is deliberation most likely to cause opinion change? What conditions are required for good quality deliberation? Under what conditions can deliberation be consequential? There are different ways of studying these questions. Statistical research usually focuses on responding to these questions across a large number of cases, paying particular attention to average effects.

There is a different way to answer these questions, however, and that is through case study research. Case study research can be defined as 'the study of the particularity and complexity of a single case, coming to understand its activity in important circumstances' (Stake 1995, ix). A case can be a person, event, activity, process, group, organization, or institution. The focus on an individual unit means that within-case analysis is conducted as opposed to comparative cross-case research (Ryan 2019; see also Ryan, Chapter 17 in this volume). This is to enable intensive and context-dependent data collection and analysis on important cases that include a large number of variables, thereby producing more depth, detail, richness, completeness, and variance than cross unit analysis can generally achieve. In general, the more cases there are, the less data is collected on each (Gomm et al. 2004). Case studies enable researchers to move beyond covariation between variables and focus on 'causes-of-effects' in a specific case (Mahoney and Goertz 2006).

Case study research has been prevalent throughout the history of deliberative democracy due to the depth of insight and attention to context that this method provides (Boswell and Corbett 2017). In this chapter, we argue that case study research has been integral in helping deliberative democracy develop from a new normative theory to an established and mature theory guided by significant empirical evidence. Moreover, we suggest that as deliberative democracy research moves towards a systemic approach, case studies will continue to be essential for understanding the practice of deliberative democracy across the huge variety of contexts that a system involves. Case studies are a research approach that is relevant to both positivist and interpretivist research traditions. However, in this chapter, we suggest that case study research can help deliberative democracy move beyond this distinction. Guidance is provided on how to select a suitable case and how to collect and analyse data, specifically in relation to the field of deliberative democracy.

authorities focus on literacy as a socially situated and global experience one that is evolving in relation to changes in contemporary culture and technological innovation Seeing for Ourselves Glenda L. Bissex, Richard H. Bullock, 1987 In Seeing for Ourselves practicing classroom teachers of English and graduate students studying to become teachers demonstrate the value of classroom based research for themselves and for their profession Through case studies of individuals from first graders through adults thirteen teacher researchers share the insights they have gained about their students their teaching and themselves resulting from year long or short term research projects The issues they explore include The uses of writing process pedagogy in teaching a learning disabled child The dynamics of the student teacher relationship in college level writing conferences The effects of an exposure to poetry on the language and writing of first graders Sixth grade writers views of teacher responses to their writing Ways of developing independent editing skills in eleventh graders Dangers of insisting that college freshman choose their own topics Intricacies of the writing process revealed by and adult writer The problems of a would be novelist The learning styles and strategies of a junior high teacher and their implications for teaching The possibilities of teaching art history through a writing process approach as seen through the development of three high school students **Empowering Ourselves and Transforming Schools** Judith Westphal Irwin, 1996-01-01 Examines the forces that keep educators and students from feeling fully empowered Contains self help and planning activities for teachers and administrators interested in transforming schools I-writing Karen Surman Paley, 2001 In this ethnographic study of the teaching of writing Karen Surman Paley reveals the social significance of first person writing and the limitations of a popular taxonomy of composition studies Paley looks critically at the way social constructionists have created an Other in the field of composition studies and named it expressivist Paley demonstrates the complexity of approaches to teaching writing through an ethnographic study of two composition faculty at Boston College a program that some would say is expressivist She prompts her colleagues to consider how family experiences shape the way students feel about and treat people of races religions genders and sexual preferences other than their own Finally she suggests to the field of composition that practitioners spend less time shoring up taxonomies of the field and more time sharing pedagogies **Teacher Education and the Struggle for Social Justice** Kenneth M. Zeichner, 2009-08-10 Clear articulate and cogent Zeichner exhibits a commitment to a vision of social justice that rightly demands the very best both from society and from those of us who work in schools communities and teacher education institutions Michael W Apple From the Foreword In this selection of his work from 1991 2008 Kenneth M Zeichner examines the relationships between various aspects of teacher education teacher development and their contributions to the achievement of greater justice in schooling and in the broader society A major theme that comes up in different ways across the chapters is Zeichner s belief that the mission of teacher education programs is to prepare teachers in ways that enable them to successfully educate everyone s children A second theme is an argument for a view of democratic deliberation in schooling teacher education and

educational research where members of various constituent groups have genuine input into the educational process Teacher Education and the Struggle for Social Justice is directed to teacher educators and to policy makers who see teacher education as a critical element in maintaining a strong public education system in a democratic society Introducing Teachers' Writing Groups Jenifer Smith, Simon Wrigley, 2015-11-06 Teachers writing groups have a significantly positive impact on pupils and their writing This timely text explains the importance of teachers writing groups and how they have evolved It outlines clearly and accessibly how teachers can set up their own highly effective writing groups In this practical and informative book the authors share the thinking and practice that is embodied by teachers writing groups provide practical support for teachers running a group or wishing to write for themselves in order to inform their practice cover major themes such as the relationship between writing teachers and the teaching of writing writing as process and pleasure writing and reflective practice writing journals and the writing workshop The authors provide a rationale for the development of writing groups for teachers and for ways of approaching writing that support adult and child writers and this rationale informs the ideas for writing throughout the book All writing and teaching suggestions have been extensively tried and tested by class teachers and will be of enormous interest to any teacher or student teacher wishing to run their own successful writing group **Ethnography Unbound** Stephen Gilbert Brown, Sidney I. Dobrin, 2012-02-01 These provocative new essays redefine the goals methods and assumptions of qualitative and ethnographic research in composition studies making evident not only the crucial importance of ethnographic research but also its resilience As Ethnography Unbound makes evident critical ethnographers are retheorizing their methodologies in ways that both redefine ethnographic practices and values and at the same time have begun to liberate ethnographic practices from the often disabling stronghold of postmodern critique Showing how ethnography works through dialogic processes and moves toward political ends this collection opens the doors to rethinking ethnographic research in composition studies **Ethnographic Writing Research** Wendy Bishop, 1999 The primary goal of Ethnographic Writing Research is to help you conduct your day to day research whether it means developing an informal classroom report writing a dissertation prospectus and study or participating in local civic literacy research
