Seeing Shapes:

Seeing and Visualizing Zenon W. Pylyshyn, 2003 How we see and how we visualize why the scientific account differs from our experience Shapes of Imagination George Stiny, 2022-11-15 Visual calculating in shape grammars aligns with art and design bridging the gap between seeing Coleridge's imagination and combinatoric play Coleridge's fancy In *Shapes of Imagination* George Stiny runs visual calculating in shape grammars through art and design incorporating Samuel Taylor Coleridge's poetic imagination and Oscar Wilde's corollary to see things as they aren't Many assume that calculating limits art and design to suit computers but shape grammars rely on seeing to prove otherwise Rules that change what they see extend calculating to overtake what computers can do in logic and with data and learning Shape grammars bridge the divide between seeing Coleridge's imagination or esemplastic power and combinatoric play Coleridge's fancy Stiny shows that calculating without seeing excludes art and design Seeing is key for calculating to augment creative activity with aesthetic insight and value Shape grammars go by appearances in a full fledged aesthetic enterprise for the inconstant eye they answer the question of what calculating would be like if Turing and von Neumann were artists instead of logicians Art and design are calculating in all their splendid detail *I See Shapes* Marcia Fries, Rozanne Lanczak Williams, 1995-03 Basic shapes triangles circles squares rectangles suggest common objects for a birthday party *Seeing Things* Kartik Nair, 2024-02-13 In 1980s India the Ramsay Brothers and other filmmakers produced a wave of horror movies about soul sucking witches knife wielding psychopaths and dark caped vampires *Seeing Things* is about the sudden cuts botched prosthetic effects continuity errors and celluloid damage in these movies Such moments may very well be failures of various kinds but in this book Kartik Nair reads them as clues to the conditions in which the films were once made censored and seen offering a view from below of the world's largest film culture Combining extensive archival research and original interviews with close readings of landmark films including *Purana Mandir Veerana* and *Jaani Dushman* this book tracks the material coordinates of horror cinema's spectral images In the process *Seeing Things* discovers a spectral materiality one that informs Bombay horror's haunted houses grotesque bodies and graphic violence and gives visceral force to our experience of the genre's globally familiar conventions *Sensing the World* Moreland Perkins, 1983-01-01 *Looking and Seeing: Pattern and shape* Kurt F. Consciousness and the World Brian O'Shaughnessy,2002 Brian O Shaughnessy presents a bold original theory of consciousness one of the most fascinating but puzzling aspects of human existence He investigates what consciousness is and how it engages through perception with the world Whatever mystery there may be about origins of consciousness O Shaughnessy suggests that there is no mystery about what it is It is his contention that consciousness consists in a closely knit complex of occurrent mental phenomena and powers with thinking and self knowledge at the centre and nothing else He proceeds to give a philosophical elucidation of its nature analysing it into its constituent psychological parts He argues that consciousness has a determinate character as an internal but world oriented phenomenon and that there exist logically necessary and sufficient conditions for its presence Though consciousness is an internal state perception is its very foundation being the source of the material with which the mind develops and essential to the processes whereby it does so O Shaughnessy continues with an extended summary of the phenomena of perception and attention examining their their component elements and their relations with consciousness and with the world He demonstrates how close to the heart of consciousness is perception envisaged already in the very concept Perception is portrayed as a journey of the attention from the raw data of the senses outwards into physical reality The different modes of sensory perception are analysed in turn to give a full picture of how the mind opens out onto its environment and assembles for itself a representation of outer reality So it is that the gap is closed between the mental and physical domains and the epistemological basis of mind is established Consciousness and the World is a rich and exciting book a major contribution to our understanding of the mind
