insight **A Metaphoric Mind** Joseph E. Couture, 2013 Dr Joe challenges the reader to examine both Aboriginal and non Aboriginal approaches to the world and demonstrates the differences between Indigenous knowledge and Western thought
Ed Buller *Sending My Heart Back Across the Years* Hertha Dawn Wong, 1992-03-12 Using contemporary autobiography theory and literary historical and ethnographic approaches Wong explores the transformation of Native American autobiography from pre contact oral and pictographic personal narratives through late nineteenth early twentieth century life histories to written contemporary autobiographies This book expands the definition of autobiography to include non written forms of personal narrative and non Western concepts of self highlighting the incorporation of traditional tribal modes of self narration with Western forms of autobiography and charting the historical transition from orality to literacy

My Elders Taught Me John F. Boatman, 1992-05-20 In this book the author examines various aspects of a selection of Western Great Lakes American Indian philosophical traditions and beliefs He combines over forty years of stories anecdotes and observations learned from Western Great Lakes tribal elders into a coherent and thought provoking philosophy text which challenges readers to look beyond their own cultural prepossessions and discover a method of asking questions where the answers come from within Contents Setting the Stages From Another Perspective The Atisokanak World Creation and the Early Earth World The Earth and its People The Star People The Inherent Primacy of Female Beings *A Companion to the Anthropology of American Indians* Thomas Biolsi, 2008-04-15 This Companion is comprised of 27 original contributions by leading scholars in the field and summarizes the state of anthropological knowledge of Indian peoples as well as the history that got us to this point Surveys the full range of American Indian anthropology from ecological and political economic questions to topics concerning religion language and expressive culture Each chapter provides definitive coverage of its topic as well as situating ethnographic and ethnohistorical data into larger frameworks Explores anthropology s contribution to knowledge its historic and ongoing complicities with colonialism and its political and ethical obligations toward the people studied
Uncertain Hazards Sylvia Noble Tesh, 2018-05-31 Ordinary citizens frequently organize around environmental issues on which little scientific evidence exists to back activists claims Should we then dismiss such claims as spurious Or should we side with citizens against the polluters *Uncertain Hazards* takes neither path In exploring the all too common problem of scientific uncertainty about links between pollution and public health Sylvia Noble Tesh shows that much of the problem can be traced to the newness of the environmental movement The inability of scientists to find data corroborating citizens claims stems partly from the pre environmentalist assumptions still influencing the environmental health sciences Tesh says On the other hand the conviction of activists that industrial pollutants threaten their health results from the environmental movement s success in promoting new ideas about nature Tesh points to ways that environmentalist ideas have begun to affect science thus making more likely the discovery of links between exposure to industrial pollutants and a community s health problems Those ways include the expansion of diseases construed as environmental in cause the study of

society's most vulnerable citizens in determining safe levels of pollution and a new focus on the effects of exposure to chemical mixtures. Using community activists' own words and experiences, Tesh argues against the familiar charge that activists are naive about science. It is inaccurate, she says, to characterize debates over the hazardous nature of pollution as debates between laypeople and experts. Instead, they are debates between two groups of experts. It is also inaccurate, however, to see the conflict over environmental pollution only in scientific terms. The conflict has culturally important moral dimensions, and community activists draw heavily, although often unconsciously, on the lessons taught by environmentalism.

What is Reality? Ervin Laszlo, 2016-10-04 Ervin Laszlo's tour de force *What is Reality* is the product of a half century of deep contemplation and cutting edge scholarship. Addressing many of the paradoxes that have confounded modern science over the years, it offers nothing less than a new paradigm of reality, one in which the cosmos is a seamless whole informed by a single coherent consciousness manifest in us all. Bringing together science, philosophy, and metaphysics, Laszlo takes aim at accepted wisdom such as the dichotomies of mind and body, spirit and matter, being and nonbeing, to show how we are all part of an infinite cycle of existence unfolding in spacetime and beyond. Augmented by insightful commentary from a dozen scholars and thinkers, along with a foreword by Deepak Chopra and an introduction by Stanislav Grof, *What is Reality* offers a fresh and liberating understanding of the meaning and purpose of existence. **Earth-Honoring Faith** Larry L.

Rasmussen, 2015 Larry L. Rasmussen offers a dramatic new way of thinking about human society, ethics, and the health of our planet. Rejecting the modern ethical assumption that morality applies to human society alone, *Earth Honoring Faith* argues that we must derive a system of ethics and morality that accounts for the wellbeing of all creation on Earth. Creation and Procreation Marta Weigle, 2016-11-11

This book is a volume in the Penn Press Anniversary Collection. To mark its 125th anniversary in 2015, the University of Pennsylvania Press rereleased more than 1,100 titles from Penn Press's distinguished backlist from 1899-1999 that had fallen out of print. Spanning an entire century, the Anniversary Collection offers peer-reviewed scholarship in a wide range of subject areas. **Social Trust and the Management of Risk** George

Cvetkovich, 2013-12-16 Social trust is a crucial issue to many aspects of modern society. Policy makers continually aspire to winning it, and corporations frequently run the risk of losing it. The trust deficit raises vital questions and problems to which, until recently, there have been few answers or solutions. Experts from both sides of the Atlantic explore the importance for trust of various influences, from individual perceptions to organizational systems, and consider the conditions involved in building or undermining trust. Several authors examine practical hazard management issues, including medical vaccination programmes and popular participation in pollution control and waste management, as strategies for enhancing social trust. This book provides insightful analysis for researchers and students of environmental and social sciences and is essential reading for those engaged in risk management in both the public and private sectors.
